PREFACE TO FIRST EDITION.

Degree courses in Sanskrit almost invariably include a Drama, of which a considerable portion is in Prakrit. In practice, whatever Examiners may imagine, the student reads the Sanskrit *chāyā*, which most editions provide for him on the same page. At any rate he begins that way; reading the Prakrit afterwards, noticing certain similarities, and *some* of the differences, so that he may be able to recognize a passage, with which he is already familiar in its Sanskrit form, and perhaps in an English translation. Even the more advanced student who reads the Prakrit as it comes, at the slightest check looks down at the 'shadow.' Consequently few students have any definite knowledge of any one of the Prakrits. One cannot blame them. The editions they use are often incorrect in the Prakrit portions, and there is no convenient book of reference in which they can find definite rules. One **object** of this *Introduction to Prakrit* is to provide students with a guide for the more attentive and more scholarly study of the Śaurasenī and Māhārāṣtrī passages in their Sanskrit Plays.

The **main object** however is to assist the student of the History of the great **Indo-Arayan Language** from Vedic times to the present day. The Indian student starts with an intimate knowledge of at least one **modern** Indo-Aryan language. In the Sanskrit he learns at school, he becomes familiarised with the stereotyped literary form of the ancient language If he studies Sanskrit in the University, he will discover that the Vedic language represents a still more ancient stage of

Indo-Aryan. For this there are accurate texts, and many works of reference available.[1]

The **middle** stage has been comparatively neglected. In India itself, the mediæval Prakrits are in a more real sense *dead* languages, than is Sanskrit itself. Outside India scholars have found in Pali, the language of the oldest Buddhist Scriptures, a convenient representative of this stage. The student of Indo-Aryan Philology needs a clear view of the main characteristics of the different Prakrits. It is hoped that this work may prove useful for this purpose.

Method of Study. Perhaps the best plan is to begin with the thorough study of *one* dialect, afterwards comparing others with this as a standard. This was the method of the Indian grammarians who took Māhārāṣṭrī as their standard. But the only *prose* extant in Māhārāṣṭrī was written by Jains, and that not in the same dialect as the songs in the dramas. There are excellent aids to the study of Pali, but Pali is too archaic to make a good central point, and it is a separate *subject* in our curricula, and generally regarded as appropriate only to students of Buddhism. Moreover the Sanskrit student does actually first come into contact with Prakrit in the plays, and most of it is Śauraseni. For this, among other reasons, it has been thought desirable to present a general view of the subject, with special stress on Śauraseni and Māhārāṣṭrī.

The student making use of this book is advised to read the general sections, and to study the chapters on Phonetics and Grammar with special reference to the two main Dramatic

Prakrits. The more important examples are printed in bold type and may be memorised: The Extracts 1 to 14 should then be thoroughly mastered, and the knowledge acquired applied to any play the student may be reading.[1]

The next step will be more philological, consisting in the comparison of the several stages and dialects as far as they are described in Chapters IV to X, and illustrated in Extracts 15 to the end.[2]

The specimens of Pali and of old Prakrit are intended as inducements to further study.

Modern forms have been occasionally quoted to show the historical continuity of words from ancient times. The student should be able to connect up a much larger number of forms from his mother tongue.

The Index is intended partly for convenience of reference, and partly to provide an instrument by which one may test one's ability to explain forms, and to recognize them out of their context.

Transliteration. The Roman script has been used for several reasons. Over a dozen years of teaching experience has convinced the writer that the slovenly spelling, so prevalent in both Roman and Devanāgarī scripts, is partly due to the fact that Hindi and Sanskrit are written in the same script, but with slightly different sound-values. A word written in Devanāgarī may be pronounced as in Sanskrit or as in Hindi, e.g.—भगवान्, as *bhagavān* or as *bhagvān,* धर्म as *dharma* or *dharam,*

---

[1] If he will read a play for the sake of these two Prakrits only, let him choose Karpūramañjarī (Konow's Edition).

[2] The most interesting play for variety of dialect is the Mṛcchakaṭikam.

सामवेद as *sāmaveda* or *sāmved* and so on. Confusion is increased if the student has to distinguish a Prakrit pronunciation when the spelling is identical with that of a modern word.

Another reason is that the Roman script being more atomic than Devanāgarī has advantages for stating phonetic laws in English.

Moreover any Indian student who aims at keeping abreast with modern scholarship should make himself thoroughly familiar with the use of this script. To make use of many books of reference, and Oriental Journals, it is almost as important to him, as Devanāgarī to the Western scholar.

These reasons seemed to outweigh the disadvantages of increased labour in proof-reading, and the initial feeling of unfamiliarity with Sanskrit in this guise that may be experienced by the beginner.

On doubtful points, such as derivations where "Doctors disagree," the authority of Pischel has generally been followed. Controversy has generally been avoided, and where any reference has been made to rival theories or matters of dispute, it is only to suggest to the student fields of enquiry that still await his enterprise.

Apart from facilitating the study of the Indian Drama, and of Indian Philology, it is hoped that this little book may lead some of our students and graduates to take an interest in the great field of Indian thought and literature that lies outside the Sanskrit circle. Without some knowledge of this, it is impossible to obtain an adequate idea of the life of mediæval India.

PREFACE TO SECOND EDITION.

The first edition was issued during the Great War. Proofs were read in intervals snatched from Civil and Military duties combined. In this second edition a number of misprints has been removed. In the meantime important contributions have been made to the history of the Indo-Aryan languages. The Chapters on Classification and Literature have been brought more up to date. Since this book first appeared there has been an increased interest in Prakrit in the Indian Universities and the general level of knowledge has risen. More attention is being given in several Universities to the history of the Indian languages. In view of this something has been said of Early Prakrit represented by Aśoka's Inscriptions and late Prakrit represented by Apabhraṃśa.

For reading the proofs and seeing the second part through the press, I am much indebted to my friend and colleague, once a pupil, Dr. Banarsi Das Jain, M.A., Ph.D., now Lecturer in Hindi at the Oriental College, who has also made a number of useful suggestions.

TABLE OF TRANSLITERATION.

Vowels.

अ a	आ ā	इ i	ई ī	उ u
ऊ ū	ए e	ओ o		

For Sanskrit add ऋ ṛ, ॠ ṝ, ऌ ḷ, ऐ ai, and औ au.

Note 1. अइ and अउ in Prakrit should strictly be written aï and aü to distinguish them from the Sanskrit diphthongs ऐ ai, औ au; but as the latter do not occur in Prakrit the dots can be omitted without any ambiguity, e.g. uttarai 'he crosses' can only represent उत्तरइ.

    2 ए and ओ in Prakrit sometimes represent short vowels. When distinguished these are written ĕ and ŏ (*vide* § 61).

Consonants.

क् k	ख् kh	ग g	घ् gh	ङ् ṅ
च् c	छ् ch	ज् j	झ् jh	ञ् ñ
ट् ṭ	ठ् ṭh	ड् ḍ	ढ् ḍh	ण् ṇ
त् t	थ् th	द् d	ध् dh	न् n

श् ś	ष् ṣ	स् s	ह् h.	

Visarga (not used in Prakrit) ḥ.

Anusvāra ṃ.

A nasalised vowel is represented as in ã, ũ.

Note 1. Sanskrit न् n is generally represented in Prakrit by ण् ṇ, but the dental n may occur before another dental, e.g., danta as in Sanskrit. This, however, is often written दंत daṃta. In Jain works the dental n is frequently written at the beginning of words.

2. Similarly other nasals are often represented by anusvāra.

> पंच paṃca for pañca
> संख saṃkha for saṅkha
> दंड daṃḍa for daṇḍa
> जंबु jaṃbu for jambu

but see § 35.

3. For the weak ẏ see § 9. Note.

4. **Hindi** ड़ is represented by ṛ, cerebral ळ by ḷ. In practice this causes no confusion with the vowels ऋ ṛ and ऌ ḷ. The letter ड ḍ was probably pronounced as a cerebral ṛ long before the diacritical dot for ड़ was devised.

5. In general it should be understood that transliteration is merely the substitution of one set of symbols for another, and does not tell us anything more about the pronunciation. It is quite possible that च ca was pronounced something like *tsa* in Māhārāṣtrī as in modern Marathi, and that in Magadha श a was pronounced as Bengali renders it to-day. Even if so, we may feel sure that a Midlander would use his own sounds in pronouncing either Prakrit.

INTRODUCTION TO PRAKRIT.

PART I.

CHAPTER I.

SUBJECT DEFINED.

The history of the North Indian or Indo-Aryan languages may be conveniently divided into three periods—ancient, mediæval, and modern.

(i) The speech of the ancient or **Old Indo-Aryan** period is represented in literature (*a*) by the language of the Ṛig Veda, (*b*) by that of later Vedic books. To this period belonged also those spoken dialects on which were based (*c*) the poetic diction of the Epics, and (*d*) the more highly polished **(Saṃskṛta)** literary language of Pāṇini, Patañjali, and thereafter of Kālidāsa and the others down to the present day.

(ii) The mediæval or **Middle Indo-Aryan** period is represented in literature by Pāli and the Prākṛits. It comprises all the dialects from the time (whenever it was) that certain *phonetic* changes, with some variations in grammar also, had produced a language obviously different from Old Indo-Aryan, down to the time (? about 1100 A.D.) when further phonetic changes and the complete break up of the old grammar had produced a new type of language similar to that of the modern vernaculars. Our knowledge of this period has to be pieced together from a variety of records, referring to different localities and different times. These records comprise inscriptions as well as literary works. Of the inscriptions the most famous are the Edicts of Aśoka. The literature comprises the Pāli Canon of the "Southern" or Hīnayāna Buddhists, the Prākṛit

Canon of the Jains, the Prākrit of Lyrics, Epics and Plays and the Prākrit grammars.

(iii) The beginning of the third or modern period has not been fixed with precision.   It lies between the latest sort of Prākrit, or **Apabhramśa** such as that described by Hemacandra in the twelfth century, and the earliest poetry of the Old Vernaculars.   The oldest poem in Western Hindi is the Prithi Rāj Rasau by Chand Bardai of Lahore (? about 1200 A.D.).

The middle period can be again divided into three stages : (1) **Old Prākrit** (or Pāli); (2) **Middle Prākrit**; (3) **Late Prākrit** or Apabhramśa.

(1) The Old Prākrit stage includes (a) Inscriptions from the middle of the 3rd century B.C. down to the 2nd century A.D. The dialect varies with time and place.

(b) Pāli of the Hīnayāna Canon and other Buddhist works, as the Mahāvamsa and the Jātakas.

In the Jātakas, or Birth Stories of the Buddha, the verses (gāthās) preserve a more archaic form of language than the prose.

(c) The language of the oldest Jain Sūtras.

(d) The Prākrits of early plays, such as those of Aśvaghoṣa of which fragments have been found in Central Asia.

(2) The Middle Prākrit stage includes (a) Māhārāṣṭrī, the language of the liquid lyrics of the Deccan, (b) the other Dramatic Prākrits, Śaurasenī, Māgadhī, etc., as found in the plays of Kālidāsa and his successors, and in the grammarians ; (c) the dialects of the later Jain books; (d) Paiśācī, in which the Bṛhatkathā is said to have been composed, but which is known only from the statements of grammarians.

(3) *Apabhramśas* were not much used for literary purposes. They represent the stage reached by ordinary colloquial speech when the Prākrit type of speech as found in the plays was already archaic, and had been refined and stereotyped by the grammarians.   By the time that Hemacandra recorded a

particular Apabhraṃśa of the West, this was probably already archaic.

This book is concerned in general with the second, mediæval, or **middle period** of the Indian language, and in particular with the **Middle Prākrit stage,** especially the Dramatic Prākrits.

Various uses of the word "Prākṛit."

Prākṛta derived from *prakṛti* has two lines of meaning : (*a*) the more precise meaning of something belonging to or derived from a *prakṛti*, that is from the original form of anything as opposed to a *vikṛti* its modification. (In Sāṃkhya Philosophy *prākṛta* means what is derived from Prakṛti, the original element) ; (*b*) the looser meanings of ' natural, ordinary, vulgar, provincial.'

It is probable that it was in the more general sense that ' *prākṛta* ' (Śauraseni ' *pāüda* ' Māhārāṣṭri ' *pāüa* ') was first applied to *ordinary common* speech as distinct from the highly polished, perfected *Saṃskṛitam.*

Grammarians and Rhetoricians of later days however explain *prākṛtam* as derived from the *prakṛti,* i.e. *saṃskṛtam.* This explanation is perfectly intelligible even if it be not historically correct. Practically we take Sanskrit forms as the basis and derive Prākrit forms therefrom. Nevertheless modern philology insists on an important reservation : Sanskrit forms are quoted as the basis in as far as they represent the Old Indo-Aryan forms, but sometimes the particular Old Indo-Aryan form required to explain a Prākrit word is not found in Sanskrit at all, or only in a late work and obviously borrowed from Prākrit.

If in "Sanskrit" we include the Vedic language and all dialects of the Old Indo-Aryan period, then it is true to say that all the Prākrits are derived from Sanskrit. If on the other hand "Sanskrit" is used more strictly of the Pāṇini-Patañjali language or "Classical Sanskrit" then it is untrue

to say that any Prākrit is derived from Sanskrit, except that
Śauraseni, the Midland Prākrit, is derived from the Old Indo-
Aryan dialect of the Madhyadeśa on which Classical Sanskrit
was mainly based.

In Europe the word Prākrit has been used (a) to refer to
particular languages classed as Prākrit in India, e.g. Māhārāṣṭrī,
or to the Prākrit passages in plays ;

(b) Of the Middle Period of the Indian languages (Pāli
and the early inscriptions forming an earlier stage were some-
times distinguished from Prākrit[1]) ;

(c) Of the *natural* spoken language as distinct from the
literary learned language. In this last sense some writers[2]
distinguish Primary, Secondary and Tertiary Prākrits as the
natural spoken dialects of the three great periods. Out of
these successive types of spoken speech grew the various
literary idioms which became stereotyped or fossilised as it
were, and remained in use alongside of the living and ever-
changing dialects.

[1] Dr. O. Franke in his *Pāli and Sanskrit* uses ' Pāli ' for the Middle
Period including Inscriptions.

[2] *Vide* Article on Prākrit by Dr. Sir George Grierson in Encyclopaedia
Britannica, XIXth Edition.

M. **Mahārāṣṭrī** was regarded as the Prākrit *par excellence.* Prākrit grammars gave the rules for this first. For others there were some special rules, and then "the rest is like Mahārāṣṭrī." Daṇḍin remarks (K.D.1.35) : *Mahārāṣṭrāśrayām bhāṣām prakṛṣṭam prākṛtam viduḥ·*

In the Drama ladies who speak Śaurasenī, sing their songs in Māhārāṣṭrī. The Māhārāṣṭrī lyrics were famous far beyond the limits of Māhārāṣṭram. The same language is used for the Prākrit Epics such as the Gaüdavaho. This language of the Deccan poets carries further than other Prākrits the principle of omitting single consonants between vowels (*vide* § 10). This is natural in a literary song-dialect, for in a song it is the melody and sentiment that matter most, the precise words or forms of words are less important. It is not to be supposed however that Māhārāṣṭri is a mere invention of the poets. It is based on the old spoken language of the country of the Godavari, and contains many features that survive as peculiarities of modern Marathi.

Ś. **Śaurasenī** was the Prākrit of the Madhyadeśa taking its name from Śūrasena the country round Mathurā (' Muttra '). This is the ordinary Prākrit of a Sanskrit drama. It is spoken by ladies and the Vidūshaka ; in the Camphor-cluster (Karpūramañjarī) even by the king. This Prākrit is the nearest to classical Sanskrit. It arose in the same country, and is descended from the spoken language, on which classical Sanskrit was mainly based. It thus forms an intermediate stage between Sanskrit and Hindi (that is, the Western Hindi on which Literary Hindi has been based). Owing however to this close kinship with the sacred tongue, Śaurasenī was overshadowed ; continually influenced by Sanskrit, it failed to make much independent progress.

Mg. **Māgadhī** is the Prākrit of the East. Its geographical centre was in the ancient Magadha not far from the land of modern Māgahī, a dialect of Bihārī. In the plays Māgadhī is

spoken by low people. Dialects of Māgadhi also occur, e.g.,
Ḍhakkī in the Mṛcchakaṭikam. This Prākrit differs conspicu-
ously from the others in its phonetics. स is replaced by श, and
र by ल. The nominative singular of -a stems end in -e. य
remains and even replaces ज. [For further particulars vide
Chap. X). Where other Prākrits say *hattho*, Māgadhī has *haste* ;
others *so rāā=* *so rājā*, Māgadhi śe lāā.

Jain Prākrits.

AMg. The oldest Jain Sūtras were composed in **Ardha
Māgadhī**, a Prākrit based on the dialect spoken between
Śūrasena and Magadha (about Oude). In its phonetic character
it resembles Māgadhī in some respects. It preserves more
traces of the old grammar than Śaurasenī, and shows a greater
independence from Sanskrit.

J. M. The non-canonical books of the Śvetāmbaras were
written in a form of Māhārāṣṭrī that has been termed **Jain
Māhārāṣṭrī**.

J. Ś. The language of the Digambara Canon in some res-
pects resembles Śauraseni and has been termed *Jain Śauraseni*.

Apabhraṃśa has been used in India (*a*) for anything
diverging from Sanskrit as the standard of correct speech, (*b*)
for spoken languages as distinct from literary " Prākrits,"
including non-Aryan as well as Aryan languages ; (*c*) a literary
form of any such vernacular. The only literary Apabhraṃśa
described in detail by the grammarians is the *Nāgara* Apa-
bhraṃśa which appears to have belonged to Gujarat. To this
is said to be related the *Vrācaḍa* Apabhraṃśa of Sindh.
Ḍhakkī and some other dialectic forms of the main Prākrits
are sometimes styled *apabhraṃśas*. If we had records of the
Apabhraṃśas spoken in the areas connected with each of the
main Prākrits an important link in the history of the Indian
languages would be supplied. Even as it is, the tendencies of
Apabhraṃśa in phonetics and grammar, help to bridge the
gap between typical Prākrit and the modern languages. The

number of text available gradually increases and these supplement the information contained in Hemacandra's grammar.

The use of various Prākrits in the Drama is discussed in Chapter XI on Prākrit Literature. Further details as to sub-dialects, Paiśācī dialects, the dialects used in Inscriptions, and their relationships, are given in Chapter X on the classification of Prakrits.

CHAPTER III.

GENERAL CHARACTER OF PRAKRIT.

Prākrit (including Pāli) was still a synthetic language. The ancient grammar had been somewhat simplified. The number of case forms and verbal form tends to dwindle. The Rigveda possessed a greater variety of forms than the later Vedas. Pāṇini's Sanskrit has discarded a number of forms used in the Brāhmaṇas. Pāli and old Ardhamāgadhī retain a good deal that has disappeared from the Māhārāṣṭrī and Śaurasenī of the lyrics and plays. Apabhraṃśa finally indicates the approaching dissolution of the last remnants of the old etymology. The time was approaching when a noun might have only two or three distinct endings, and the verb was reduced to little more than one tense and two participles. The ambiguity thus produced was avoided by new devices, and out of the ruins of the old language grew up the analytic languages of modern India.

Though simplified, yet the remaining Prākrit grammar is of the same type as Sanskrit grammar. There is a strong tendency to reduce all declension to one type, that of a-stems, and to conjugate all verbs according to one scheme, that of the old A. Conjugation. The Dative disappears. Nominative and Accusative Plurals tend to coincide. The Imperfect, Perfect and numerous Aorists had gone by the time of the Middle Prākrit stage. The Dual number was found

unnecessary. The Ātmanepada hardly survived after the Old
Prākrit stage and never in its original meaning. But it was
not yet necessary to resort to postpositions or auxiliary verbs.
The essentials necessary for ordinary conversation and even
verse-writing remained down to the Apabhraṃśa stage. For
more important work, for more exact thinking the tendency
was to resort to Sanskrit. As Pāli, Ardhamāgadhī and the
other Jain Prākrits successively lost the advantage of being
the language of the day, or of the locality, they were unable to
withstand this tendency and were eventually replaced by
Sanskrit.

Apart from this simplification the main changes arising in
Prākrit are **phonetic**. Conjunct consonants are mostly assimi-
lated: *rakta* became *ratta* (as Latin fructu-s became Italian
frutto); *sapta* became *satta* (as Latin septem became Italian
sette). Some of the sounds of the old language disappear: ·
ऋ *r̥*, ऐ *ai*, औ *au*, य *ya* (except in Mg. and a shadowy य to

bridge hiatus), श *śa* (except in Mg. where स is missing), ष ṣa and
Visarga; whereas the only sounds contained in Prākrit and not
recorded for Sanskrit are the short vowels ĕ and ŏ. Final
consonants are avoided. Not more than two consonants can
follow a short vowel, nor more than one follow a long vowel.

[For details see Chapters IV to VI.]

The cumulative effect to such changes in the case of a particu-
lar word may be such as to completely alter its appearance.
"Vappaïrāā" does not immediately suggest Vākpatirājā,
"oïṇṇa" is not very like *avatīrṇa*. On the other hand some
words are indentical with Sanskrit and the *majority* could
readily suggest a Sanskrit equivalent to anyone with a living
colloquial knowledge of the classical language. This is true
not only of Śaurasenī but also of the others.

From this circumstance it may be understood that the
different Prākrits were mutually intelligible among the edu-
cated. A speaker of Sanskrit, whose *mother* tongue was the

spoken form of any one of the Prākrits, would readily under-
stand any of the literary Prākrits. Moreover a speaker of
Śauraseni would easily learn to recognise many Sanskrit words,
and even grasp the meaning of a Sanskrit sentence without
being able to speak Sanskrit. In the older stage the difference
was still less marked. Still further back we should find only
the difference between 'correct' and 'incorrect' pronunciation,
grammatical speech and ungrammatical, standard speech and
dialectical—the differences between the speech of educated and
uneducated people speaking substantially the same language.
At this stage though differences existed the new speech had
not attained a separate existence, it was not yet distinct
enough to be recognized as a separate language capable of
having a fixed grammar and a literature of its own.

Even in the Rigveda we find " *prākritisms*," that is phonetic
variations along just those lines that were followed by the
Prākrits. For instance *śithirá*=" loose " instead of *śrithriá*
as might be expected from the root *śrath*. From this and
similar instances it is not necessary to deduce a wide difference
between the language of the hymns and contemporary speech.
Rather the inclusion of such " prākritisms " in the sacred texts
indicates that the priests regarded them as possible forms in
the same language, and were not yet conscious of any gulf
between the two kinds of speech.

An interesting parallel to the history of the Indo-Aryan
languages is shown by that of the Romance languages in Europe.
Of several old Italic dialects, that of the Latin tribe prevailed,
and Latin became the dominant language of Italy—and then
of the Roman Empire. It became the language of the largest
Christian Church of the middle ages, and thence the language
of Science and Philosophy until the modern languages of
Europe asserted their independent existence. Like Sanskrit
in India, Latin was long the medium of conversation between
educated men of different nations. Again, as the language of
religion, Latin was always to be heard in the mouths of priests,

and common people caught stray phrases of it. The mediæval quack or schoolmaster, however ignorant, must needs air his Latin.[1]   Here again phonetic changes and the working of analogy have gradually simplified the old grammar until prepositions and auxiliary verbs had to be used to avoid ambiguity.

Some speculation has been devoted as to the *causes* of such changes as in India may be styled prakritic.   Economy of effort, progressive refinement especially in courts and cities, softening influence of a semi-tropical climate, influence of the speech habits of non-Aryan peoples who adopted the Aryan speech—all these may have been at work both in India and in Europe.

PHONETICS.

SINGLE CONSONANTS.

§ 1. **A. Initial.**   The general rule is that a **single consonan t at the beginning of a word remains unaltered,** except n, y, ś, and ṣ.   (न, य, ग्, ष).

n is cerebralised (§ 7).

y becomes j (except in Mg.).

jadhā=*yathā* (Mg. yadhā). **jaï**=*yadi*, Śaur. also has **jadi** (Mg. yaï, yadi).   **jogī**=*yogī*.

ś and ṣ become s (§ 8).

§ 2. The initial consonant of the second member of a compound is usually treated as if it was in the middle of a word. A verbal root however often retains its initial letter.

putta=*putra,* but *āryaputra* becomes **ajjaütta.**

M. **paāsei**=*prakāśayati.* Ś. **āadaṁ** or **āgadaṁ**=*āgatam*. (M. āaaṁ or āgaaṁ)

[1] See Love's Labour Lost, Act V.   Holofornes the Schoolmaster.

§ 3. Enclities are similarly treated. **kiṃ uṇa**=*kiṃ punar.*
vi=(*a*)*pi.* **a**=*ca.*

In *tāvat* and *te* (2nd pers. pron.) Śaur. and Mg. change *t*
to *d* as in the middle of a word. **mā dāva**=*mā tāvat.* ǁ ư
ṇa de=*na te.* **piduṇo de**=*pitus te.* **tado de**=*tatas te.* ǁ

§ 4. In several dialects **bh** becomes **h** in the root **bhū** and its
derivatives. M. **hoï**=*bhavati* (Saur. **bhodi**).
Ś. **havissadi** (Mg. **haviśśadi**)=*bhaviṣyati.*
Ś. Mg. **hodavva**=*bhavitavya.*

(5). **Ph** at the beginning of the second member of a compound
is often retained as at the beginning of a word.
Ś. **cittaphalaa**=*citraphalaka,* **bahuphala,** **saphala.**

(6). *Aspiration.*
kh for **k.** **khujja**=kubja. √**khel**=√*krīḍ.* [Skt. has
khel 'shake, play' as early as the Rāmāyaṇa (J. Bloch),
which may be Prakritic.]
ph for **p.** Ś. **phaṇasa.** M. **paṇasa**=*panasa* "bread-fruit
tree." An aspirated sibilant becomes **ch.** AMg. **chāva**=
Pāli **chāpa**=*śāba* or *śāva* "young animal." M. AMg.
cha=*ṣaṭ,* **chaṭṭha**=*ṣaṣṭha.*

(7). *Change of Place of Articulation.*
Examples. Palatal for Dental. M. **citthaï.** S. **citthadi.**
Mg. **cisṭhadi**=*tisṭhati.*
Cerebral for Dental. M. **ḍhaṅkha**=*dhvāṅkṣa* "crow."
ṇ for **n.** **ṇūṇa**=*nūnam,* **ṇaaṇa**=*nayana.*

(8). The three sibilants **ś, ṣ, s** (**श ष स**) are reduced to one, the
dental **s** (except in Māgadhî where we have the pala-
tal **ś**).

§ 9. **B. Medial. Medial or intervocal k, g, c, j, t, d, are
generally dropped.** (**क, ग, च, ज, त, द्**).
M. **loa**=*loka,* **saala**=*sakala,* **aṇurāa**=*anurāga,* **juala**=
yugala, **ṇaara**=*nagara,* **paüra**=*pracura,* **bhoaṇa**=
bhojana, **rasāala**=*rasātala,* **hiaa**=*hṛdaya.*

Medial p, b, v, are sometimes dropped. (**प, ब, व**).

M. rūa=*rūpa*, viuha=*vibudha*, diaha=*divasa*.

Medial y is always dropped (य).

vioa=*viyoga*, pia=*priya*.

Note.—In place of the omitted consonant was pronounced a weakly articulated *ẏa* (*laghu-prayatnatara-ya-kāra*). This was weaker than the **य** of Sanskrit or Māgadhī, and was not expressed in writing, except in MSS. written by the Jains, e.g., hiẏaẏa=*hṛdaya*.

§ 10. This principle of omitting single consonants between vowels was carried to great lengths in the literary form of Mahārāṣṭrī used in Lyrics. It naturally leads to ambiguity. **Kaï** may represent *kati, kavi,* or *kapi*! A string of vowels like **uaa** (=*udaka*) has lost all the character of the original word. The fact that such changes were possible at all shows that the Indian consonants were, as now, weaker in articulation than the English consonants. The actual workaday dialects however were more conservative. In Apabhraṃśa, Hemacandra tells us, k, t, p between vowels were not dropped, but became **g, d, b**, respectively. ṇāagu=*nāyakaḥ*, āgado=*āgataḥ*, sabhalaü=*saphalakam*. Some of the literary Prākrits also have the same change. In the older stage, as in Pāli, k, t, p remain unchanged, or dialectically became sonants: Sāgala=*Sākala*.

§ 11. *Examples.*

Śaur : adidhi=*atithi*, kadhedu=*kathayatu*, pāridosia= *pāritoṣika*, bhodi=*bhavati*, kadhido=*kathitaḥ*, Kira-da=*Kirāta*, āṇedi=*ānayati*, tado=*tataḥ*, kida=*kṛta*, gada=*gata*, sakkada=*saṃskṛta*, Sarassadī=*Sarasvati* (M. Sarassaï).

Māgadhī: pālidośia=*pāritoṣika*, śāadaṃ=*svāgatam*, hage ("I")*ahakaḥ*, a derivative of *aham*.

Ardha-Māgadhī and Jain Māhārāṣṭrī : Asoga=*Aśoka*, loga =*loka*, āgāsa=*ākāśa*.

Pāli : loka, gacchati, rūpa.

§ 12. In this treatment of medial t we have one of the charac-
teristic distinctions between the Śaurasenī and Mahā-
rāṣṭrī of the plays. Compare the following:—

Śauraseni.	Māhārāṣṭri.	Sanskrit.
jāṇādi	jāṇāï	jānāti.
edi.	ei	eti.
hida	hia	hita.
pāuda	pāua	prākṛta.
maragada	maragaa	marakata.
ladā	laā	latā.
ṭhida	ṭhia	sthita.
pahudi	pahui	prabhṛti.
sada	saa	śata.
edaṃ	eaṃ	(etad).

§ 13. **The aspirates kh, gh, th, dh, ph, and bh between
vowels are generally reduced to h. (ख, घ, थ, ध, फ,
and भ become ह).**

muha=*mukha*, **sahī**=*sakhī*, **meha**=*megha*, **lahua**=*la-*
ghuka, **jūha**=*yutha*, **ruhira**=*rudhira*, **vahū**=*vadhū*
sahara=*śaphara*, **ahiṇava**=*abhinava*, **ṇaha**=*nabhas*
or *nakha*.

§ 14. Here again Śaurasenī, Māgadhī and some other dialects
merely replace the surd **th** by the sonant **dh.**

Ś. **adidhi, kadhedu, tadhā, adha, jadhā**=*yathā*.

Mg. **yadhā**=*yathā*, **tadhā**. (Pāli retains the surd—atha,
yathā, tathā.)

This forms another distinction between Śaurasenī and
Māhārāṣṭrī, e.g. :—

Śauraseni.	Māhārāṣṭri.	Sanskrit.
adha	aha	atha.
maṇoradha	maṇoraha	manoratha.
kadhaṃ	kahaṃ	katham.
ṇādha	ṇāha	nātha.

§ 15. Sometimes instead of being dropped (§ 9) or reduced to
h (§ 13) a consonant between vowels is **doubled**.

Ś. **ujju**=*r̥ju*, M. **ṇakkha**=*nakha*, M. Ś. **ĕkka**=*eka*.

Note 1.   Other consonants are similarly doubled, e.g. :—
jŏvvaṇa=*yauvana*, **tĕlla**=*taila*, **pĕmma**=*preman*.

Note 2.   The vowel before the double consonant is always
short.   Here **ए** and **ओ** represent the short vowels
ĕ, ŏ.   (§ 68.)

Note 3.   An aspirate is doubled by prefixing the corres-
ponding non-aspirated sound : kkh, ggh, and so on.

Some MSS. literally double the aspirates, writing khkh,
chch, and so on.   This is merely an orthographical
difference, the pronunciation was the same.

§ 16. *Cerebral surds* ṭ ṭh *between vowels become sonant* ḍ ḍh *(*ट,
ठ *become*ड, ढ*).*

paḍa=*paṭa*, **paḍāa**=*paṭāka*, **kuḍila**=*kuṭila*, **kuḍumba**
=*kuṭumba*, **vaḍa**=*vaṭa*, **paḍhaṇa**=*paṭhana*.

Some dialects had the further change of ḍ to ḷ. (§22)
M. **kakkoḷa**=*karkoṭa*. Mg. **śaaḷa**=*śakaṭa* (Śaur. saaḍa).
Mg. **yūḷaka**=*jūṭaka* (Śaur. *jūḍaa).

(17) P *if not omitted becomes* V.   (**प** becomes **व**).
rūva=*rūpa*, **dīva**=*dīpa* (cf. Dīwālī), **uvari**=*upari*, **uva-**
araṇa=*upakaraṇa*, **uvajjhāa**=*upādhyāya* (cf. Ojha).
avi=*api*, **avara**=*apara* (Hindi aur), **tāva**=*tāpa*.

(18) B *becomes* V.   (**ब** becomes **व**).
kavala=*kabala*, **savara**=*śabara*.

(19). **Aspiration.**   Prakrit sometimes has k̲h̲ instead of Sans-
krit **k** (§ 6).   This in the middle of a word generally be-
comes **h.**

M. **ṇihasa**=*nikaṣa*, M. Ś. **phaḷiha**=*sphaṭika*.

ṭa through **ṭha** becomes **ḍha.**   AMg. **vaḍha**=*vaṭa*, **ṭa**
becomes **ṭha**, then **ha.**   M. **bharaha**=*bharata*, **vasahi**=
vasati Rarer ;   **p**   through **ph** becomes **bh.**   AMg.
kacchabha=*kacchapa*.   **ṇ, m, l** and the sibilants are

sometimes aspirated. M. ṇhāvia (but Ś. Mg. ṇāvia)= *nāpita* i.e., **snāpita* from √ *snā*.

AMg. lhasuṇa (also lasuṇa)=*laśuna*, cf. § 30.

Aspiration is sometimes shifted. M. dihi from **diṭhi= dhṛti.* M. dhūā Ś. Mg. dhūdā=*duhitā*, Ś. Mg. bahiṇī =*bhaginī*, M. ghĕttuṃ=*grahītum* (through **ghṛptum*). Aspiration is sometimes lost. Ś. saṅkalā=*śṛṅkhalā* but saṅkhalā and siṅkhalā are also found.

(20) *Change of place of articulation.* ·
   Cerebral for Dental.
   paḍi=*prati*, M. paḍia Ś. Mg. paḍida=*patita*, paḍhama =*prathama.* This cerebralising is much commoner in Ardhamāgadhī :
   AMg. osaḍha=*auṣadha* (M. Ś. osaha).

   In most dialects n regularly becomes ṇ (ण for न) ṇūṇa, ṇaaṇa.

(21) **Sïbilants.** *The three sibilants of Sanskrit are represented by the dental* s (except in Māgadhī which has only the palatal ś), **asesa**=*aśeṣa*, etc.
   Mg. keśeśu=*keśeṣu* (Śaur. etc. kesesu).

(22) **Ḍ** often becomes ḷ. (§ 16) (ड becomes ळ).
   In North India books and MSS. use व for ळ.
   M. garuḷa (Ś. garuḍa ; Mg. galuḍa), M. Ś. kīḷā=*krīḍā.*

(23) **T** *and* **d** *sometimes become* ḷ *or* l. (त, ड become व or ळ).
   Ś. alasī=*atasī*, M. Ś. vijjuliā=**vidyutikā* "lightning" (whence Hindi bijlī). M. Sālavāhaṇa=Sātavāhana. M. Ś. dohaḷa=*dohada.*

(24) **Ḍ** becomes r in adjectival and pronominal compounds with -*dṛś-dṛśa-dṛkṣa.*
   erisa=*īdṛśa* (Ś. also īdisa) **kerisa, aṇṇārisa tumhārisa, sarisa.**

(25) In dialects **m** sometimes became **v**. (म become व).

　　So M. **vammaha** Śaur. **mammadha**=*manmatha*. M.
　　oṇavia=*avanata* (from *avanamita).

　This change is more frequent in Apabhraṃśa which at
　　the same time nasalises the preceding vowel and the
　　semivowel, and then often omits either the semivowel
　　or the nasal element. Thus Apa. kãvala=*kamala*,
　　Jãüṇā=Yamunā, ṇavahī=*namanti*. This nasalisation
　　also appears in M., e.g. Cãuṇḍā=Śaur. Cāmuṇḍā.

　This change accounts for forms like " <u>Kanwar</u> " from
　　Kumāra, and <u>gãv</u> (गांव) with its many minute variations
　　in the modern dialects. (Skt. *grāma*. Pāli and most
　　Prākrits (g)gāma-). Cf. Beames, I, 254.

(26) In Māgadhi **r** always become **l**, in other dialects the
　　change is exceptional. (र become ल).

　　M. Ś. **dalidda**=*daridra*, **muhala**=*mukhara*.

　The change is more frequent in Ardha Māgadhī than in
　　M. or Ś.

(27) Sometimes sibilants are replaced by **h**, either as a
　　dialectic variation or in a particular group of words.

　　M. dhaṇuha=*dhanuṣa for *dhanus*,

　　M. paccūha=*pratyūṣa* ' morning sun ' but paccūsa ' dawn '
　　(Pischel. Gr. § 263).

　　M. pāhāṇa=*pāṣāṇa*.

　　M. anudiaham (Ś. aṇudiasaṃ)=*anudivasam*.

　Futures like M. ṇehii for *neṣyati*, AMg. gāhii for *gāsyati*,
　　JM. pāhāmi for *pāsyāmi*, AMg. gamihii for *gamiṣyati*.

　Genitives like Mg. kāmāha=*kāmasya*, Apa. kavvaha=
　　kāvyasya.

　Pronominal forms like Apa. eho=*eṣa*, Pkt. tumhe=
　　*tuṣme, M. tāha beside tāsa for tassa=*tasya*, tahiṃ
　　for tassiṃ=*tasmin*.

　This phenomenon is commoner in Apabhraṃśa and has
　　been used to explain several features in the later system

of declension and conjugation. The history of the change however is obscure and the extent of its influence has been questioned. (See Pischel Gr. § § 263, 422, 425, 520 ; J. Bloch Langue marathe, § 162 ; S. K. Chatterji, Bengali Language, pp. 549, 550, 555, 751, 963.)

(28). Sometimes instead of **h** in Sanskrit we find an aspirate **dh** etc. in Prākrit, e.g. Ś. Mg. **idha**, M. **iha**, cf. Pāli idha. Here Śauraseni preserves the more original sound. H in Sanskrit often represents an original sonant aspirate. Cf. *hanti* and *aghnan, jaghāna.*

§ 29. C. *Final.* All final mutes are dropped.

Nasals become anusvāra. **aḥ** becomes **o**, otherwise visarga is dropped. Sometimes the final vowel is then nasalised.

For treatment of finals in compounds see Sandhi (Ch.VII).

CHAPTER V.

COMPOUND CONSONANTS.

§ 30. **At the beginning of a word only a single consonant can remain.**

Exceptions 1. **ṇh**, e.g., **ṇhāṇa**=*snāna.*

2. **mh** as in **mhi**=*(a)smi,* **mho mha**=*smaḥ* (enclitic).

3. At the beginning of the second member of a compound.

Note.—If ṇh and mh are regarded as aspirated ṇ and m rather than as conjuncts they are not exceptions.

The weakness of final consonants is a phenomenon observed in many languages. A final mute ceases to " explode " becoming merely " implosive." The vocal organs take up the right position but there is no sudden release of

2

air, no "explosion," and no audible glide to another
sound. There is only a moment of silence for a surd,
a moment of vocal murmur for a sonant. The next
stage is to omit the effort of taking up the position,
then there is no on-glide and even the "implosive"
has been lost.

The nasal resonance is more audible and survives.

§ 31. **In the middle of a word no group may exceed two**
     consonants, and these must be only
     (1) **Doubled**, e.g, kk (or for aspirate kkh),
     (2) **Mute after nasal** of the same class, e.g. ṅk, ṇḍ, *or*
     (3) **Aspirated Nasal** (or lh).

§ 32. Consequently most compound consonants are either
     assimilated or separated by a **svarabhakti** vowel.

§ 33. **Assimilation.** The general rule is that **between equals**
     the second prevails, between unequals the stronger
     prevails.

     The consonants can be arranged as follows in a scale of
     decreasing strength for this purpose.
     (i) Mutes. (The five vargas less the nasals.)
     (ii) Nasals.
     (iii) l, s, v, y, r, in order.
            h stands by itself (§§ 52–54).

§ 34. **Two mutes.** According to the rule given above, k + t
     becomes tt, g + dh becomes ddh, d + g becomes gg and
     so on.
     Examples. **jutta**=*yukta*, **vappaïrāā**=*vākpatirājā*, **dud-**
     dha=*dugdha*, **chaccarṇa**=*saṭ + caraṇa* (§ 6), **khagga**
     =*khaḍga*, **balakkāra**=*balātkāra*, **uppala**=*utpala*,
     uggama=*udgama*, **sabbhāva**=*sadbhāva*, **sutta**=*supta*,
     khujja=*kubja* (§ 6), **sadda**=*śabda*, **laddha**=*labdha*.
     Thus of two mutes (nasals excluded) the assimilation is
     "progressive," *i.e.* the first is assimilated to the second.

This has been explained by the tendency of the first mute in a conjunct to be merely "implosive."

§ 35. A nasal before a mute of the same class remains, before a mute of another class it becomes anusvāra.

Saṅkhala=*śṛṅkhala*, kŏñca=*krauñca*, kaṇṭha, manthara, jambū, but dimmuha=*diṅmukha*, paṃti=*paṅkti*, vimjha=*vindhya* (§ 44).

§ 36. A nasal following a mute is assimilated

aggi=*agnih*, viggha=*vighna*, savatti=*sapatnī*, jugga =*yugma*.

Exceptions. (*a*) jña becomes ṇṇa. āṇavedi=*ājñāpayati*. aṇahiṇṇa=*anabhijña*. jaṇṇa=*yajña*.

Note 1. At the beginning of the second member of a compound *jña* can become *jja*, e.g. maṇŏjja=*manojña*.

Note 2. Māgadhī has *ñña* according to Hemachandra (4-293).

(*b*) *ātman* in M. nearly always, in Apa. always becomes appa (cf. Hindi āp). The other dialects vary between appa and atta.

(*c*) *dma* becomes *mma*, pŏmma=*padma* (also paüma, § 57).

§ 37. L with a mute is assimilated.

vakkala=*valkala*, phagguṇa=*phalguna*, appa=*alpa*., kappa=*kalpa*. [Exception √*jalp* becomes √jamp, but also japp]. pavaṃga=*plavaṃga*.

§ 38. Mute and Sibilant. The mute of course can only be a surd. **When the sibilant comes first, it is assimilated, and the mute is aspirated,** e.g. sta becomes tth. When however the sibilant stands at the end of the first member of compound, the following mute need not be aspirated, especially if the first member is a prefix like *dus*. Śca becomes ccha, accharia=*āścarya*, pacchā=*paścāt* but ṇiccala=*niścala*, duccarida=*duścarita*.

[In Māgadhī *śca* remains : niścala.]

Ṣka and ṣkha become kkh. Ś. pŏkkhara=*puṣkara,*
sukkha=*śuṣka.* In this case however the aspiration is
often omitted.

M. caükka. Ś. cadukka=*catuṣka.* M. Ś. dukkara=
duṣkara. ṇikkam—for *niṣkram*—etc.

Ṣṭa and ṣṭha become ṭṭh. diṭṭhi=*dṛṣṭi,* suṭṭhu=*suṣṭhu.*
Exception veḍha=*veṣṭa* (cf. Pāli veṭhati).

Ṣpa and ṣpha become pph. puppha=*puṣpa,* ṇipphala
=*niṣphala.*

Sta and stha become tth. thaṇa=*stana,* atthi=*asti,*
hattha=*hasta* (cf. Panjabi hatth), avatthā=*avasthā,*
kāatthaa=*kāyasthaka.* Compound. duttara=*dustara.*
Sometimes this tth is cerebralised. M. Ś. aṭṭhi=*asthi.*
The √ *stha* especially varies between tth and ṭṭh. Śaur.
thida or ṭhida=*sthita* (M. thia or ṭhia), M. Ś. ṭhāṇa
=*sthāna* (M. also thāṇa). Ś. thidi or ṭhidi=*sthiti* (M.
tshii or ṭhii.)

Spa and spha become pph. phaṃsa=*sparśa* (§ 49).
phaḷiha=*sphaṭika.* A. Mg. phusaï=*spṛśati.*

§ 39. When the sibilant follows the mute they become cch.

acchi=*akṣi,* riccha=*ṛkṣa,* M, chuhā=*kṣudhā,* macch-
ara=*matsara,* vaccha=*vatsa* (also=*vṛkṣa*), acchārā=
apsarā, jugucchā=*jugupsā.*

§ 40. Kṣa however more generally becomes kkh.

Śaur.
khattia=*kṣatriya,* khitta=*kṣipta,* akkhi=*akṣi,*
ṇikkhividuṃ=*nikṣeptum,* sikkhida=*śikṣita,* dak-
khiṇa=*dakṣiṇa* ("Deccan").

Sometimes the dialects vary between cch and kkh.
M. ucchu, Ś. ikkhu=*ikṣu,* M. kucchi, Ś. kukkhi=*kukṣi,*
M. pĕcchaï, Ś. pĕkkhadi=*prekṣate,* M. Ś. sāriccha, Ś.
sārikkha=**sādṛkṣa.*

Sometimes kṣa becomes jjh.

Ś. pajjharāvedi=**prakṣarāpayati,* M. Ś. jhīṇa=*kṣīṇa* (also
khīṇa).

Note. Pischel distinguishes : (*a*) original kṣa (Avestan xša) becomes kkh, (*b*) kṣa from śṣa (Avestan ša) becomes ccha, (*c*) kṣa from źẓa becomes jjha. Śṣa and źẓa would seem rather difficult to pronounce. Presumably śṣa represents in origin a front palate stop plus the corresponding fricative, and źẓa the sonant equivalent, while the original kṣa is a back palate stop plus a fricative. The प in ष can hardly have been originally identical with the Indian cerebral sibilant. The history of the different pronunciations of प and ष, and the relation in Iranian languages of χ and š, need further investigation. Inscriptions and some other evidence suggest a dialectic division in India, cch in the West and North-West, kkh in the East. (J. Bloch. Langue marathe. § 104. cf. Pischel. Gr. §§ 318 to 321. Geiger. Pali Gr. § 56.)

§ 41. In compounds $-t + ś-$ or $-t + s-$ become $-ss-$ or with lengthening of previous vowel simply s – pajjussua —*paryutsuka*, ūsava=*utsava*, Ś. ussāsa, M. ūsāsa= *ucchvāsa*.

§ 42. **V with a mute is assimilated.**

M. kaḍhia S. kaḍhida=*kvathita*, Ś. pakka—*pakva*, ujjala =*ujjvala*, satta=*sattva*, dia=*dvija*, but uvvigga= *udvigna*, and so always with the prefix ud.

§ 43. **Y with a mute is assimilated.**

Cāṇakka=*Cāṇakya*, sŏkkha=*saukhya*, jŏgga=*yogya*, ṇaṭṭaa=*nāṭyaka*, abbhantara=*abhyantara*.

§ 44. *A dental is first palatalised.*

Sacca=*satya*, ṇevaccha=*nepathya*, accanta=*atyanta*, racchā=*rathyā*, ajja=*adya*, uvajjhāa=*upādhyāya*, saṃjhā=*sandhyā*, majjha=*madhya*.

§ 45. **R with a mute is assimilated.**

takkemi=*tarkayāmi*, cakka=*cakra*, magga=*mārga*, gāma=*grāma*, samucchida=*samucchrita*, ṇibbandha

=*nirbandha*, **citta**=*citra*, **patta**=*pattra*, **attha**=*artha*,
bhadda=*bhadra*, **samudda**=*samudra*, **addha**=*ardha*.
Exception—*atra* becomes **attha**, *tatra* becomes **tattha**.
[When R precedes a dental it sometimes cerebralises it
first, especially in AMg. *vaṭṭadi*=*vartate*.]

§ 46. **Two Nasals.** ङ *ṅ* and ण *ṇ* before म *m* become anusvāra :

न *n* is assimilated to following म *m* and म *m* to following

न *n* (i.e., ण *ṇ*).

diṃmuha=*diṅmukha*. M. **chaṃmuha**=*saṇmukha*. **um-
muha**=*unmukha*, **ṇiṇṇa**=*nimna*, **Pajjuṇṇa**=Prady-
umna.

§ 47. **Nasal with sibilant.** If the nasal precedes it becomes
anusvāra. **When the sibilant precedes it becomes h
and the order is reversed.**
Śna becomes ṇha. **paṇha**=*praśna*.
Śma becomes mha. **Kamhīra**=Kāśmīra.
Ṣṇa becomes ṇha. **uṇha**=*uṣṇa*, **Kaṇha**=Kṛṣṇa.
Ṣma becomes mha. **ġimha**=*grīṣma*.
Sna becomes ṇha. **ṇhāṇa**=*snāna*.
Sma becomes mha. **amhe**=*asme*, **vimhaa**=*vismaya*.

Exceptions :

    (1) *raśmi* always becomes **rassi**,
    (2) Initial *śma becomes m.* **masāṇa**=*śmaśāna*.
    (3) *Sneha, snigdha,* either **ṇehā ṇiddha** or **siṇeha,
    siṇiddha.**
    (4) Loc. Singular Pronominal ending—*ṣmin* becomes
       mmi ; —*smin* becomes either —*ssiṃ* or —*mmi*.
    Ś. **edassiṃ**=*etasmin* M. **eassiṃ** or **eammi**. (AMg.
    ṃsi **logaṃsi**=*loke*).

§ 48. **Nasal with semivowel.** The semivowel is assimilated.
ġumma=*gulma*, **mĕccha**=*mleccha*, **aṇṇesaṇā**=*an-
veṣaṇā*, **puṇṇa**=*puṇya*, **aṇṇa**=*aṇya*, **sŏmma**=*saumya,*
dhamma=*dharma*, **kaṇṇa**=*karṇa*.

Note. *my* after a long vowel become *m.* **kāmāe**=*kāmyāyā.*

§ 49. Sibilant and semivowel. The semivowel is assimilated. sāhaṇīa=*ślaghanīya*, pāsa=*pārśva*, M. āsa Ś. assa= *aśva*, avassaṃ=*avaśyam*, M. mīsa Ś. missa=*miśra*, maṇussa=*manuṣya*, Ś. parissaadi=*pariṣvajate*, rahassa =*rahasya*, vaassa=*vayasya*, tassa=*tasya*, sahassa= *sahasra*, sahattha=*svahasta*, Ś. Sarassadī=Sarasvatī, sāadaṃ=*svāgatam*.

> *Note* 1. Sometimes this *ss* is reduced to *s* with (*a*) lengthening of the previous vowel (M. *mīsa, āsa* above) or (*b*) nasalisation of the previous vowel, which is more frequent from *śra* and general with *rśa*. **Aṃsu**=*aśru*, **phaṃsa**=*sparśa*, **daṃsaṇa**=*darśana* (§ 64.)

> *Note* 2. A further dialectic change is *s* becomes *h*. So Māgadhī kāmāha, Apabhraṃśa kāmahŏ. Later on this had an important effect on inflections. (§ 27.)

§ 50. Two semivowels. The stronger prevails in the order l, v, r, y. gallakka=*galvarka*, mulla=*mūlya*, dullaha=*durlabha*, kavva=*kāvya*, parivvājaa=*parivrājaka*, savva=*sarva*.

> *Exception.* In **ry** *y* becomes *j*, hence it becomes **jj, ajja** =*ārya*, kajja = *kārya*. Sometimes *r* becomes *l*, hence **ll,** pallattha=*paryasta*.

> Note. *yya* becomes *jja*, except in Māgadhī.

§ 51. Visarga *before* **k, kh, p, ph,** *is treated like a sibilant* dukkha=*duḥkha*, antakkaraṇa=*antaḥkaraṇa*; *so is visarga before a sibilant.* Ś. cadussamudda=*catuḥsamudra*, dussaha=*duḥsaha* (also M. Ś. dūsaha).

§ 52. *When* **h** *precedes a nasal or* **l,** *the group is inverted.* avaraṇha=*aparāhṇa*, majjhaṇha=*madhyāhna*, M. geṇhaï, Ś. geṇhadi=*gṛhṇāti*, ciṇha=*cihna* (M. also cindha), bamhaṇa=*brāhmaṇa*, palhattha=**prahlasta* (from √*hlas*=*hras*).

§ 53. *In* **hy** *the semivowel becomes j and then the group becomes* **jjh.** Sajjha=*sahya*, aṇugejjhā=*anugrāhyā*,

§ 54. *Hv* becomes either *bbh* (through *vh*) or *h*. vibbhala=
vihvala, **jīhā**=*jihvā* (AMg. jibbhā). (For *hr*, *rh* see § 57.)

§ 55. **Cerebralisation.** Dental groups sometimes become
cerebral. Ś. maṭṭiâ=*mṛttikā*, Ś. M. vuḍḍha=*vṛddha*,
gaṇṭhi=*granthi*.

 In M. and Ś. this usually happens after an original **r** or **ṛ**;
but in AMg. in other words also, especially after a
sibilant. (Pischel. Gr. 289. cf. Geiger. Pali Gr. 64.)

§ 56. The same principles apply to groups of three consonants,
e.g., *matsya* becomes maccha, *arghya* aggha, *astra* attha,
and so on.

§ 57. **Svarabhakti.** *When one of two consonants is a nasal or a
semivowel, the two may be separated by an inserted svara-
bhakti vowel.* The two consonants are then treated
according to the rules for simple consonants. The
vowel is generally *i*, or *u* with a labial, but sometimes *a*.
 M. **raaṇa**, Ś. **radaṇa**, Mg. ladaṇa=*ratna*, M. Ś. salāhā=
ślāgha, āmarisa=*āmarṣa*, **varisa**=*varṣa*, **harisa**=*harṣa*,
kilanta=klānta, **kiliṇṇa**=*klinna*, **milāṇa**=*mlāna*,
tuvara=*tvara(sva)*, duvāra duāra=*dvāra*, **suvo**=*svaḥ*,
ariha=*arha*, **paüma**=*padma* (Pāli paduma) Ś. sumara-
di=*smarati*.

§ 58. *If one of the consonants is y, this is then omitted.* **ācāria**=
ācārya. (The actual difference of pronunciation here is
slight) verulia=*vaidūrya*, coria=*caurya*, hio=*hyas*.
 Sometimes ī appears. accharia *or* Ś. accharīa=*āścarya*
(M. also acchera § 76). Ś. paḍhīadi=Pāli paṭhīyate
=*paṭhyate*.

CHAPTER VI.

VOWELS.

§ 59. The sonants *r̥* and *l̥* (ऋ and ऌ) counted as vowels in Sanskrit Grammar disappear in Prākrit, as in Pāli. In the old Indian language ऋ was not pronounced *ri* (रि) as it is nowadays. It was not a consonant plus a vowel, but a "sonant" fricative used as a vowel. Its pronunciation may have been similar to the sonant *r* in some Slavonic languages, e.g. Srbi, the name of the Serbs in their own language. Languages not possessing this sound naturally represent it either with the neutral vowel *ə* or introduce a vowel sound before or after the consonant *r*. (Sometimes both before and after.) Hence it is more intelligible why (*a*) the guṇa of *r̥* is *ar* (not *re*), (*b*) Vr̥trahan appears in Avestan as Vĕrĕth raghna, *r̥ju* as ĕrĕzu, (*c*) Pāli has iritvija for *r̥tvij*, irubbeda for *r̥gveda*, and (*d*) Prākrits not possessing *e* (or a sign for it) replace *r̥* by *a, i,* or *u* as well as by *ri*.

Still less does *lri* express the old pronunciation of ऌ. This was more like the final sound ('sonant' or syllabic *l*) in English "battle" where there is no vowel between the *t* and the *l*. Its guṇa is *al*. It is represented in Prākrits by *ili, li,* or *a*. Kilitta=*kl̥pta*.

§ 60. **Substitutes for r̥.**

ri. (for initial *r̥*) [Māgadhī li.]

riddhi=*r̥ddhi*, riccha=*r̥kṣa*, risi=*r̥ṣi*.

a. M. kaa S. kada=*kr̥ta*, vasaha=*vr̥ṣabha*.

i. (commonest) kiviṇa=*kr̥paṇa*, giddha=*gr̥dhra*, ditthi=*dr̥ṣṭi*, siāla=*sr̥gāla*, hiaa=*hr̥daya*.

u. (after labials or when another u follows).

M. ṇihua Ś. ṇihuda=*nibhr̥ta*, M. pucchai Ś. pucchadi=*pr̥cchati*, muṇāla=*mr̥ṇāla*, vuttanta=*vr̥ttānta*.

Note 1. The vowel often varies even in the same dialect.

Ś. daḍha or diḍha=*dṛḍha*. M. ṇiatta or ṇivutta=*ni-vṛtta*.

Note 2. Nouns in *ṛ* generally have *u* for *ṛ* before the suffix -*ka*, and when they begin compounds. Ś. jāmā-dua=*jāmātṛka*, bhādusaa=*bhrātṛ-śata*. But *i* also oc-curs : Ś. bhaṭṭidāraa=*bhartṛdāraka*.

Note 3. *a*, *i*, *u*, also occur at the beginning of a word. AMg. aṇa=*ṛṇa*, Ś. isi=*ṛṣi*, ujju=*ṛju*.

(M. acchai, Pāli acchati derived by Pischel from *ṛcchati* is explained by others as an inchoative from *as* or *ās*. Pischel, Gr., § 480. Geiger, Pāli Gr., § 135. 2.)

Note 4. Long *ṝ* becomes *ī* or *ū*.

Note 5. For a dialectic division : S.W. *a*, E. Centre and N. *i* with *u* after labials, see J. Bloch, Langue marathe, § 31 ; S. K. Chatterjee, Bengali Language § 173 ; cf. Pischel, §§ 49–51 ; Geiger, Pāli Gr., § 12.

§ 61. *The Diphthongs* **ai, au** *are replaced by* **e, o.** Before double consonants ĕ and ŏ are short (§§ 15, 68).

Ś. edihāsia=*aitihāsika*, Erāvaṇa=*Airāvaṇa* tĕlla=*taila*, vĕjja=*vaidya*.

M. komuī, Ś. komudī=*kaumudī*, jŏvvaṇa=*yauvana*, sŏmma=*saumya*.

Note. Sometimes in M. and other dialects *ai* become *a—ï*, and *au* becomes *aü*, e.g. vaïra=*vairin*, maüli=*mauli*. This is not correct for Śauraseni or Māgadhī.

§ 62. **Change of Quantity.** *A long vowel can be followed by only one consonant, and therefore every vowel before a double consonant is short.* This law obviously covers many cases where a long vowel in Sanskrit appears as a short vowel in Prākrit. There was also a tendency to shorten the consonant and lengthen the vowel in such cases. This is commoner in Māhārāṣṭrī (and especially in Ardha—Māgadhī and Jain-Māhārāṣṭrī) than it is in Śauraseni or Māgadhī. This principle has

played a great part in the modern Indian languages (cf.
Pr. aggi Panjabi agg, but Hindi āg).

§ 63. **Lengthening of short vowel.**

This occurs most frequently before r+consonant (espe-
cially a sibilant), and before sibilant+ya, ra, va, or
sibilant. Ś. kādum=*kartum*, kādavva=*kartavya*. AMg.
phāsa=*sparśa*, AMg. maṇūsa=*manuṣya* (Śaurasenī
maṇussa) M. āsa=*aśva* (Ś. assa). M. Ś. ūsava=*utsava*,
dūsaha=*duḥsaha*.

§ 64. *Instead of being lengthened in such cases the vowel is often
nasalised.* daṃsaṇa=*darśana*, phaṃsa=*sparśa* (§ 49)
M. aṃsu=*aśru* (Ś. assu), AMg. aṃsi=*asmi* (Ś. mhi).

§ 65. Vice versa a vowel is sometimes lengthened instead of
being nasalised before r, s, or h.

dāḍhā=*daṃṣṭrā*, M. pīsaī, Ś. pīsedi=**piṃsati* for *pinaṣṭi*,
M. sīha=*siṃha* (also siṃgha, Ś. siṃha).

§ 66. There are a number of other cases where the vowel is
lengthened: sometimes in the middle of a compound,
before certain inflections, or by analogy with other
words, e.g. M. Ś. sāriccha, Ś. sārikkha=**sādṛkṣa* for
sadṛkṣa by analogy with *tādṛkṣa*, *yādṛkṣa*.

§ 67. **Shortening of vowels.** As stated above every vowel
followed by a double consonant must be short, so must
every vowel with anusvāra and a consonant.

A vowel is sometimes shortened when the previous vowel
is accented: alia=*álīka*: or when the following vowel
is accented: M. maṃjara=*mārjārá*, but also maṃjāra
(Ś. majjāra).

Note. Māhārāṣṭrī follows rather the Vedic, and Śaura-
senī the classical Sanskrit accent. The difference often
accounts for divergences between Marathi and Hindi.

§ 68. A long vowel before a single consonant is often shortened,
the consonant being doubled, if the word was originally
accented on the last syllable.

ĕvvaṃ=*evám*. Jŏvvaṇa=*yauvaná*, tĕlla=*tailá*, pĕmma
=*premán*.

Note 1.   Final vowels are shortened before enclitics with
double consonants, e.g. M. ṭhia mhi=*sthitâsmi*.

Note 2.   Śauraseṇī *jeva jĕvva*=*eva* becomes *jjeva jjĕvva*
after a short vowel : e.g. ajjassa jjĕvva=*āryasyaiva* : or
after a shortened ĕ ŏ : bhūmiĕ jjĕvva=*bhūmyāmeva*,
idŏ jjĕvva=*ita eva*.

Note 3.   Śrī becomes Siri.

Note 4.   In M. the final *ā* of adverbs is very often short-
ened : jaha=*yathā*.

§ 69. **Vowel for vowel.**   Examples.

a becomes i in syllables preceding the accent.   (Commoner
in M. than Ś. or Mg.) pikka=*pakvá* (Ś. also pakka).

M. majjhima but Ś. majjhama—*madhyama*,

M. kaïma but Ś. kadama—*katama*.

[*Note*.   Hindi has pákkā, Marathi pikā̀.]

a becomes u (i) with labials : puloedi—*pralokayati* (com-
moner in M. AMg. than in Ś.)

(ii) stems in *a* especially- *jña :* savvaṇṇu—*sarvajña*.

ā becomes i (sometimes) after the accent : M. jampimo=
jálpāmaḥ ; before the accent : AMg. vihatthimitta=
vitastimātra.   In this case i generally becomes ĕ mĕtta-
=*mātra-*.

§ 70. *i becomes u* if an *u* follows : M. ucchu=*ikṣu*, AMg. usu
=*iṣu*. (But Ś. ikkhu.)

i becomes ĕ before a double consonant : ĕttha—*itthā*,
gĕjjha—**gṛhya* (from* gijjha, from* gṛhya for *grāhya*).

ī becomes e in *īdṛśa* etc., *or* it remains : Ś. erisa, generally
īdisa, so kerisa, kīdisa.

[*Note*.   erisa is really from Vedic *ayá̄*+*dṛś* Pischel § 121.]

§ 71. *u becomes a* in the first syllable when the second contains
u.   garua—*guruka*, maüla—*mukula*.

u becomes i. **purisa**—*purusa* (Mg. puliśa).

u becomes ŏ before a double consonant. Ś. pŏkkara=
puṣkara, pŏtthaa=*pustaka* (cf. Hindi pōthī), mŏggara
=*mudgara,* M. gŏccha=*guccha.*

ū becomes ŏ *or* o before double consonant, or where a
compound consonant has been simplified. M. mŏlla=
mūlya, thora from *thŏrra=sthūra,* so **tambola**=*tām-*
būla [tāmbūla—*tambulla—*tambŏlla—tambola].

§ 72. *e becomes i* (i) in unaccented syllables : M. iṇá—*ená,*
viaṅā=*vedanā́,* diará=*devará.*

(ii) before double consonants : Ś. Mittea=Maitreya.

(iii) (dialect) after a long vowel : Ś. Mg. ediṇā=*etena*
(also edeṇa).

§ 73. *o becomes u* (i) before double consonants: M. aṇṇuṇṇa
for aṇṇŏṇṇa (§ 61)—*anyonya.*

(ii) In Apabhraṃśa where *o* comes from *aḥ,* as in the
Nom. Sing. of nouns in *a* : e.g. loü=*lokaḥ,* sīhu
=*siṃhaḥ.* [This survives in Sindhī, e.g. caṇḍu.
or caṇḍru="moon."]

§ 74. **Omission of Vowels.** Examples.

AMg. posaha=*upavasathá,* Ś. vaṭṭhida=*avasthita.* M
raṇṇa=*araṇya* ("Rann" of Kach).

api after anusvāra becomes **pi,** after vowels **vi.**

iti after anusvāra becomes **ti,** after vowels **tti.**

Ś. Mg. idānīṃ in its weaker sense "then" becomes
dāṇiṃ.

M. piussiā=*pitṛṣvasṛkā* from *piusasiā.*

M. Ś. pŏpphali=*pūgaphalī* – **khu** =*khalu.*

majjhaṇṇa=*madhyáṃdina,* Ś. Mg. **dhīdā**=*duhitā* (*du-*
hītā).

Note. Only unaccented vowels are omitted. Such omis-
sion therefore sometimes throws light on the accentua-
tion of a word.

§ 75. **Saṃprasāraṇa.** The reduction of *ya* to *i* and of *va* to *u* is more frequent than in Sanskrit. *Aya* and *ava* become *e* and *o*. Ś. tiriccha=*tiryakṣa* from *tiryaka*, turida=*tvarita*, **kadhedu**=*kathayatu*, **odāra**—*avatāra* **ṇomāliā**=*navamālikā*, M. loṇa=*lavaṇa* Ś. bhodi= *bhavati*.

§ 76. **Epenthesis.** -*aria* from -*ărya* sometimes becomes -*era*, peranta=*paryanta*, M. acchera=*āścarya* (but also accharia as in Ś.), M. kera=*kārya*. Ś. tumhakera, amhakera.

   [*Note.* From a derivative keraka was derived the Old Hindi and Old Gujarati kerō kerī used to form a genitive. Beames disputed the derivation of keraka from *kārya*, vide B. ii. 286. H. kā, kī, etc., Rājasthānī -ro -ri, etc., and Bengali -er have been derived from keraka, but see S. K. Chatterji. Bengali Language § 503.]

CHAPTER VII.

SANDHI.

A. Consonants.

§ 77. As Prākrit does not allow final consonants (§ 29) most of the complications of Sanskrit external sandhi disappear.

   Sometimes however the final consonant, usually dropped has *survived* before a *vowel :*

   AMg. jad atthi=*yad asti.* Mg. yad iścaśe=*yad icchase,* or before an *enclitic :* AMg. chacceva=*ṣad eva* chap pi=*ṣad api.* (These are common fixed phrases.)

   R in *dur* and *nir* regularly remains.

   Ś. durāgada=*durāgata,* ṇirantara.

   m sometimes survives as in M. ĕkkam-ĕkkam=*ekaikam.*

§ 78. This form is then declined, e.g. ĕkkam-ĕkke. Thus *m* comes to be used as a *sandhi consonant*, e.g. aniga-m-aṅgammi=*aṅge' ṅge*, AMg. goṇa-m-āī=*gavādayo*, esa-m- aggī=*eṣo'gnih*.

More rarely *ẏ* and *r* are used as sandhi consonants.
AMg. dhi-r atthu=*dhig astu*.

§ 79. In *compounds* the final consonant of the first number is usually assimilated to the initial consonant of the second member : but sometimes the two are treated as separate words.

M. sarisaṃkula=*saritsaṃkula*, dulaha=*durlabha* (usually dullaha), dusaha=*duḥsaha* (usually dussaha or dūsaha).

B. Vowels.

§ 80. Prākrit is tolerant of *hiatus* : but in *compounds* the final vowel of the first member is usually combined with the initial vowel of the second, as in Sanskrit.

Ś. kilesāṇala=*kleśānala*, jammantare=*janmāntare* (ă before two consonants) rāesi=rāa+isi=*rājârṣi*.

Sometimes however they are not combined. Ś. pūāariha =*pūjārha*, vasantussava-ūvāaṇa=*vasantôtsavôpāyana*.

§ 81. If the second member of a compound begins with *i* or *u* before a double consonant, or with *ī*, *ū*, the final *a* or *ā* of the first member is dropped.

M. gaïnda=*gajendra* Ś. ṇarinda=*narendra* manda-mārud'-uvvĕllida=*manda-mārutodvellita*, mah'ūsava=*mahotsava*, vasantūsava.

Exception. Sometimes when the second member begins with long *ī*, *ū* followed by a single consonant, the vowels are combined: Ś. mantharoru; so regularly with a prefix: Ś. pĕkkhadi, M. pĕcchaï, Mg. pĕskadi= *prekṣate*. Hiatus between ĭ or ŭ and a dissimilar vowel remains.

§ 82. *Hiatus caused by dropping intervocal consonants remains.*

 Exceptions. (i) Similar vowels are sometimes contracted :
  pāikka for pāāikka=*pādātika* ' foot-soldier.'

  (ii) *ă, ā* followed by *ĭ, ī* or *ŭ, ū,* **thera** for **thaïra=**
   sthavira.

  M. pŏmma Ś. paüma=*padma,* **mora**=*mayūra* (also
   maūra), M. moha=*mayūkha* (also maūha).

  (iii) In compounds. M. andhāria=*andhakārita.* D.
   cammāraa=*carmakāraka.* AMg. lohāra=*loha-*
   kāra. **deula**—*devakula,* Mg. lāüla=*rājakula.*

§ 83. *Between words in a sentence hiatus remains.*

 Exceptions. (i) *Na* ("not") is often combined with an
  initial vowel. **natthi**=*nāsti,* **nāham**=*na+aham.*

  Ś. nādidūra=*nâtidūra,* nĕcchadi=*na+icchati.*

  (ii) In Śaur. Mg. *nu+etad* make one word **nedam.**

  (iii) Initial *a* after *e, o* is sometimes dropped, as in
   Sanskrit.

CHAPTER VIII.

DECLENSION.

§ 84. Prākrit declensions differ from those of Sanskrit mainly
  through (*a*) the working of the phonetic rules given
  above and some others affecting particular inflections,
  (*b*) the simplification effected by transferring words
  from one declension to another, i.e. by *analogy.* There
  are a few cases where the Prākrits preserve old endings
  or methods not found in Sanskrit. There is little that
  is new. On the whole Prākrit Grammar represents the
  gradual wearing away of the old system rather than
  the building up of a new one.

§ 85. The **Dual** has been lost. The **Dative** is almost entirely
  merged in the Genitive—(Dat. sing. of a-stems occurs in

M.). The general phonetic rules rule out the **consonan-tal** declension, though some traces of it remain.

The great majority of nouns are declined as :—

   1. Masculine or Neuter stems in *a*.

   2. Masculine or Neuter stems in *i* or *u*.

   3. Feminine stems in *ā, i, ī, u, ū*.

§ 86. Declension of A stems. Normal.

Masc. : **putta**=*putra* " son."

		Śauraseni.	*Māhārāṣṭri.*
Singular :	Nom.	putto	putto
	Acc.	puttaṃ	puttaṃ
	Instr.	puttena	puttena(ṃ)
	Dat.	——	puttāa
	Abl.	**puttādo**	**puttāo**
	Gen.	puttassa	puttassa
	Loc.	putte	**puttammi** or putte.
Plural :	Nom.	puttā	puttā
	Acc.	**putte**	puttā or putte
	Instr.	**puttehiṃ**	puttehi(ṃ)
	Abl.	**(puttehiṃ-to)**	(various)
	Gen.	puttāṇaṃ	puttāṇa(ṃ)
	Loc.	puttesu(ṃ)	puttesu(ṃ).

Note. (i) puttādo puttāo, abl. sing.=*putratas. Before this ablatival ending -*tas* a short vowel is lengthened, though when used adverbially it can keep the short vowel, e.g. aggado=*agrataḥ*, jammado=*janmataḥ*.

Probably puttādo has been influenced by *putrāt*.

(ii) putte acc. plur. by analogy with pronouns tumhe, ime, etc.

(iii) puttehiṃ instr. plur.=*putrebhiḥ (as in the Ṛgveda) (§ 29).

(iv) abl. plur. is rarely found except in AMg. The form quoted=Instr. plur. + *tas*.

(v) puttammi=*putrasmin. pronom. declension.

3

§ 87. Neut.: **phala,** " fruit."

This is declined like putta except :

Nom. Acc. Sing. phalaṃ.   N. Acc. Plural **phalāiṃ.**

§ 88. **Declension of I stems, Normal.**

Masc. :   **aggi**=*agni*, " fire."

Singular : Nom.   aggī.

Acc.   aggiṃ.

Instr.   agginā.

Abl   Not common.   Various forms.

Gen.   **aggiṇo** or in M. **aggissa.**

Loc.   **aggimmi.**

Plural :   Nom.   **aggīo** or **aggiṇo** (M. aggiṇo or **aggī**).

Acc.   aggiṇo.

Instr.   **aggīhiṃ** (M. aggīhi).

Gen.   aggīṇaṃ (M. *or* aggīṇa).

Loc.   aggīsu(ṃ).

Note. (i) Gen. Sing. aggiṇo like the Neuter in Sanskrit
is borrowed from the declension of *in*-stems ; aggissa by
analogy with puttassa.

(ii) Loc. Sing. aggimmi compare puttammi.

(iii) Nom. Acc. Plural aggiṇo from *in*-stems aggīo com-
pare the Feminines in *ī* plural-*īo*=*ī as.*

(iv) M. aggī by analogy with puttā from putta.

(v) aggīhiṃ Instr. Plur.   The vowel is always lengthened
before the endings -*hi hiṃ*, cf. puttehiṃ.   The final
anusvāra is optionally omitted in all these forms by
M. and some other dialects.

§ 89. Neut. **dahī**=*dadhi*, " curd."

This is declined like aggi except :

Nom. Acc. Sing. **dahiṃ** or dahi.   Plur. **dahīiṃ.**

§ 90. *Closely parallel are the U stems.*

Thus **vāu**=*vāyu* (wind) has Sing. Nom. vāū, Acc. vauṃ,
Instr. vāuṇā, Gen. vāuṇo (or in M. vāussa), Loc. vāummi.

Plur. Nom. vāuṇo (or in M. vāū), Acc. vāuṇo, Instr.
vāūhi(ṃ), Gen. vāūṇa(ṃ) Loc. vāūsu(ṃ).

Neuter. **mahu**=*madhu*, 'honey,' has Nom. Acc. Sing. mahu(ṃ). Plur. mahūiṃ.

§ 91. **Feminine Declension.** The instrumental, genitive and locative singular have fallen together. Nouns in ā, ī, ū are exactly parallel.

Singular :	Nom.	mālā	devī	vahū,' bride.'
	Acc.	mālaṃ	deviṃ	vahuṃ.
	Abl.	mālādo	devīdo	vahūdo.
		(M. mālāo)	(M. devīo)	(M. vahūo).
I. G.	Loc.	**mālāe**	**devie**	**vahūe.**
	Voc.	māle	devi	vahu.

Plural :	Nom. Acc.	**mālāo** mālā devīo		vahūo.
	Instr.	mālāhi(ṃ)	devīhi(ṃ)	vahūhi(ṃ).
	Abl.	(mālāhiṃto	devīhiṃto	vahūhiṃto).
	Gen.	mālāṇa(ṃ)	devīṇa(ṃ)	vahūṇa(ṃ).
	Loc.	mālāsu(ṃ)	devīsu(ṃ)	vahūsu(ṃ).

Note 1. Abl. Sing. **ādo-āo** from the masculine declension. Śauraseni also uses *āe*.

2. I. G. Loc. Sing. -**āe** from Skt -*āyai* used for Gen. Abl. in Yajur Veda and Brāhmaṇas.

3. Nom. Plural -**āo** by analogy with devīo, etc. $(-\bar{\imath}o = \bar{\imath} + ah)$.

§ 92. **Variants in the Normal Declensions.**

A stems. (i) Nom. Sing. in Mg. and AMg. ends in *e* : Mg. puliśe. AMg. purise=*puruṣaḥ* ; in Apabhraṃśa Nom. Acc. Sing. in *u*.

(ii) AMg. has a Dat. Sing. in *āe* (from fem. decl.) : devattāe=*devatvāya*.

(iii) Abl. Sing. -*āo* in M.AMg. becomes *āü* metri causa. raṇṇāu=*araṇyāt*.

M. AMg. have also a form in *ā* from -*āt* : vasā= *vaśāt*, gharā=*gṛhāt*.

Common in M. is Abl. Sing. in *hi* : mūlāhi, dūrāhi. Rarer is -*hiṃto* : hiaāhiṃ-to= *hṛdayāt*.

    (iv) Gen. Sing. Mg. has *-śśa* or=*ha*. Cāludattaśśa or
        Cāludattāha.

    (v) Loc. Sing. In M. forms in *-e -ammi* often stand
        together : gaammi paose=*gate pradoṣe*.
        In AMg. the commonest form is in *ṃsi* (=*smin*
        §47). logaṃsi=*loke*.
        Some dialects have Loc. in *-hiṃ*. Mg. davaha-
        ṇāhiṃ=*pravahaṇe*.

    (vi) Neut. Plur. M. *āiṃ -aī -ai*. Forms in *āṇi* also
        occur in AMg. and Śaurasenī.
        Dialectic also *ā* (as in Veda) Ś. midhuṇā, jāṇa-
        vattā=*yānapātrāṇi*.

    (vii) Acc. Plur. Masc. Dialectic *ā*=*ān* M. guṇā=
        guṇān, AMg. āsā=*aśvān* (common in Apa-
        bhraṃśa.)

§ 93. *I and U stems.*

    (i) Abl. Sing. Examples. M. uahīu=*udadheḥ*, AMg.
        kucchīo=*kukṣeḥ*,   JM.   kammaggiṇo=*kar-*
        māgneḥ.

    (ii) Loc. Sing. In AMg. the commonest form is in
        ṃsi : kucchiṃsi=*kukṣau* ; in Apabhraṃśa *hī* :
        āihī=*ādau*.

    (iii) Nom. Plural. AMg. risāo=*ṛsayaḥ*, sāhavo=*sādha-*
        vaḥ, (Neuter) M.· acchīiṃ=*akṣīṇi*, also acchīṇi,
        AMg. maṃsūiṃ or maṃsūṇi=*śmaśrūṇi*.

    (vi) Masculines in *ī* and *ū* shorten these and are
        declined like nouns in *i* and *u*.

§ 94. *Feminine stems.* Ā stems.

    (i) 1. G.L. Sing. *-āe* is shortened *metri causa* to *āi*.

    (ii) A form in *-āa* is forbidden by some grammarians :
        but occurs as in M. jōṇhāa=*jyotsnayā*.

    (iii) Abl. Sing. Commonest form is in M. -āo Ś. Mg.
        -ādo. Ś. Mg. also have *-āe*. imāe maa-taṇhiāe
        =*asyā mṛgatṛṣṇikāyaḥ*.

(iv) N. Acc. Plur. sometimes in $\bar{a}$: M. rehā=*rekhaḥ*.
Ś. pūijjantā devadā=*pūjyamānā devatāḥ*.

§ 95. I, Ū stems.

(i) For -*īe* M. often has *ia*.

(ii) Ś. diṭṭhiā=*diṣṭyā* preserves the older form of the Instr.

(iii) Nom. Acc. Plur. *io ūo* become *īu ūu*, metri causa.

§ 96. **Stems derived from Skt. Ṛ stems.** The distinction between relations and agents is maintained. In the Nom. Acc. Sing. and Nom. Plural Prakrit follows the Sanskrit. Otherwise the stems become stems in *u* (or in *i*) or a new stem is made from the Accusative : piu-, pii-, or piara-=*pitṛ*- ; bhattu, bhaṭṭi-, or bhattāra =*bhartṛ*.

§ 97. Agent. bhattu=*bhartṛ* Relation. piu.=*pitṛ*.

Singular :	Nom.	bhattā	Ś. pidā, M. piā.
	Acc.	*bhattāram*	*pidaram, M. piaram.*
	Ins.	*bhattuṇā*	piduṇā, M. piuṇā.
	Gen.	bhattuṇo	piduṇo, M. piuṇo
	Loc.	*Ś. bhattāre*	
Plural :	Nom.	*bhattāro*	*Ś. pidaro, M. piaro.*
	Acc.		pidaro or pidare piaro or piuṇo.
	Ins.	*bhattārehiṃ*	piūhiṃ.
	Gen.	bhattārāṇa(ṃ)	piūnaṃ.
	Loc.	bhattāresu	piūsu(ṃ).

Note. 1. *bhartṛ*="lord" becomes an i-stem. Nom. bhattā. Acc. bhaṭṭāram. Inst. bhaṭṭiṇā.

2. *mātṛ* Nom. M. māā. Ś. Mg. mādā.
   Acc. M. māaraṃ. S. mādaraṃ.
   Inst. māāe. Ś. mādāe.

Can be declined as māā—māī—māū—or māarā—

§ 98. *AN stems.* These are mostly reduced to A stems by omitting N (=middling base before *pada* endings and in

compounds), or a new A stem is formed from the strong
base.

So **pĕmma**=*preman* Nom. Acc. pĕmmaṃ ; I. pĕmmeṇa ;
G. pĕmmassa : Loc. pĕmme (M pĕmmammi) ; Plur.
Nom. Acc. pĕmmāiṃ ; Gen. pĕmmāṇaṃ.

Muddhā or muddhāṇo=*mūrdhā*. AMg. Instr. muddheṇa
or muddhāṇeṇaṃ (the Nom. Sing. in ā is often the
only relic of the old declension). The old -*an* declen-
sion however is partially preserved, especially in the
common words rājan and ātman.

§ 99. Declension of **rāa**=*rājan*.

Singular : Nom.   rāā=*rājā*.

   Acc.   rāāṇaṃ=*rājānam*.

   Ins.   raṇṇā=*rājñā* (§ 36) or **rāiṇā** (with
      Svarabhakti vowel i).

   Gen.   raṇṇo=*rājñaḥ* or **rāiṇo**.

   Loc.   (rāimmi rāammi rāe).

   Voc.   rāaṃ=*rājan*.

Plural : Nom. (Acc). rāāṇo=*rājānaḥ*.

   Ins.   **rāīhiṃ** (as if from an I stem : from
      rāiṇā).

   Gen.   **rāīṇaṃ.**

Note. In Compounds *rāa* does not always follow the
A declension. Ś mahārāo=*mahārājaḥ*, juarāo=*yuva-
rājaḥ*, Vaccharāo=*Vatsarājaḥ*, but AMg. devarāyā=
devarājaḥ.

Ś. mahārāaṃ (acc.), mahārāeṇa (Ins.), mahārāassa (Gen.),
but AMg. devarannā, devaraṇṇo.

§ 100. *Ātman* becomes **atta-**or **appa-** (§ 36*b*).

M.	Ś. Mg.	
Nom. appā	attā.	
Acc. appāṇaṃ	attāṇaaṃ=*ātmānakam*	
Ins.	appaṇā	
Gen. appaṇo *or* attaṇo	attaṇo (Mg. attānaaśśa).	

AMg. also declines Nom. appo in the A declension.

New A stems are also formed ; appāṇo, attāṇo, and in Compounds attaṇa-, appaṇa-.

§ 101. *-IN stems.* These partly retain the Sanskrit method, and partly become I stems. As the I stems in Prakrit have borrowed from the -IN declension the difference is apparent only in a few forms.

Nom. Sing. **hatthī**=*hastī*, but Acc. hatthim=*hastinam* (occasionally Ś. has Acc. in *-iṇam*). Jain Prakrits often have Gen. in *-issa*, otherwise it is regularly *-iṇo*.

§ 102. *-AT stems.* Stems in *-at*, *-mat*, *-vat* form *A*-stems **anta, manta, vanta.**

Examples. Ś. **karĕnto**=*kurvan*, **puloanto**=*pralokayan*, karĕnteṇa-*kurvatā*, mahantassa=*mahataḥ*, gacchantehim=*gacchadbhiḥ*.

§ 103. *Exceptions.* Ardha-Māgadhī often retains the old declension, *e.g.* kuvvam=*kurvan*, mahao=*mahataḥ*. Other dialects do so in **bhavat** and **bhagavat.**

Nom.	bhavaṃ	bhaavaṃ
Acc.	bhavantaṃ	bhaavantaṃ
Ins.	M. bhavaā. Ś. bhavadā	M. bhaavaā. Ś. bhaavadā
Gen. „	bhavao. Ś. bhavado	„ bhaavao. Ś. bhaavado.

§ 104. *Stems in -S.* Nouns in *-as -is -us* form stems in *-a -i -u*.

Examples. Ś. Purūravassa, dīhāum=*dīrghāyuṣam*, AMg. sajoī=*sajyotiṣam*.

Exceptions. There are some traces of the old declension Ś. Purūravā (Nom.), Purūravasaṃ (Acc.), Purūravasi (Loc.) Old Instrumentals are common in AMg. JM. maṇasā, sahasā, tavasā=*tapasā*, teyasā=*tejasā*, cakkhusā=*cakṣuṣā*.

§ 105. Other exceptions or irregular forms consisting generally of the old forms subjected to phonetic changes, occur sporadically, and cannot be reduced to rules.

§ 106. **Pronouns.** A great variety of forms is found for the
pronouns of the first and second persons.

The following table gives only the commonest :—

		1st Person.	2nd Person.
Singular :	Nom.	**aham 'ham**	**tumam** (M. taṃ)
	Acc.	**mam** (M. ma-mam)	**tumam te**
	Ins	**mae**	**tae tue**
	Abl.	(mamāo)	(tumāhiṃto) (a plural form)
	Gen:	**mama me maha**	**tuha te** (AMg. tava)
	Loc.	**mai**	**tai** (M. tumammi)
Plural :	Nom.	**amhe**	**tumhe**
	Acc.	**amhe, ṇo**	**tumhe, vo**
	Ins.	**amhehiṃ**	**tumhehiṃ**
	Abl.	(amhehiṃto)	( )
	Gen.	**amhāṇaṃ, ṇo**	**tumhāṇaṃ**
	Loc.	**amhesu.**	(**tumhesu**).

§ 107. *Personal Pronouns. Variants.*

1st Person. Sing. Nom. A group is derived from a
form **ahakam* or *ahakaḥ*: M. ahaaṃ JM. ahayaṃ
Mg. hage, Apa. haũ. Acc. M. Amg. JM. mamaṃ
formed from Gen. mama. Ins. Apa. maĩ. also Acc.
Loc. Mg. maĩ. Abl. is rare.

Gen. M. uses maha(ṃ) majjha(ṃ) (derived from *mah-
yam*) and me.

Plur. Nom. amhe=Vedic *asme.* AMg. also vayaṃ.

Acc. Ś. amhe, ṇo ; M. amhe amha ṇe ; Mg. aśme.

Gen. Mg. aśmāṇaṃ. M. AMg. JM. amhaṃ. Saur : very
often ṇo.

2nd Person Sing. Nom. Commonest form is tumaṃ,
taṃ is common in M. AMg. has tume. Takkī has
tuhaṃ, Apa. tuhũ. Acc. mostly like the Nom. Apa.
taĩ. te in AMg. and in Ś. Mg. where as enclitic it
becomes de.

Ins. MSS. vary between tae tue. M. has also taï, tuï,
tumāe, tumāi, tume. Abl. Ś. tatto=*tvattah* also
tuvatto. M. tumāhi, tumāhimto, tumāo.

Gen. Ś. tuha, te M. also tuham, tujjha(m), tumham,
tumma, tu.

Loc. Ś. taï, tui M. taï tuvi tumammi tume.

Plur. Nom. tumhe by analogy with amhe. AMg. has
tubbhe.

Gen. M. also tumha. AMg. tubbham, M. Ś. also vo.

For the Abl. a great variety of forms is given by
the Grammarians. Tumhatto, tubbhatto, tujjhatto,
etc.

§ 108. *3rd Person.* sa- and ta-

		Masc.	Neut.	Fem.
Singular:	Nom.	so	tam	sā
	Acc.	tam		tam
	Ins.	tena(m)		
	Gen.	tassa		tāe *or* tīe
	Loc.	tassim or tammi		

Plural:	Nom. Acc. te tāim (AMg. tāni) tāo *or* tā	
	Ins.	tehi(m)	tāhi(m)
	Gen.	tesim *or* tāna(m)	tāsim *or* tāna(m)
	Loc.	tesu	tāsu.

§ 109. *Variants.* From sa are found also : Nom. *Sing.* Mg. śe.
Acc. AMg. se. Gen. M. AMg. Ś. se. Mg. śe (any
gender). *Plur.* Nom. AMg. se. Mg. śe, also se for
Acc. Gen.

From ta-, Abl. *Sing.* AMg. tāo. Ś. Mg. tado=*tatas.*
M. tā=Vedic *tāt.*

Gen. Mg. taśśa. M. also tāsa. Fem. M. also tissā.
AMg. tīse.

Loc. Ś. tassim. Mg. taśśim M. tammi. AMg. tamsi.

Plur: Nom. te becomes de in Ś. Mg. after any other
pronoun : ede de. Abl. AMg. tĕbbho tehimto.

§ 110. Similarly are declined :—

		Ś. edaṃ	M. eaṃ	(= *etat*)
eso	esā			
jo	ja		jaṃ	(=*yat*)
ko	kā		kiṃ	
imo	imā		imaṃ or iṇaṃ (=*idam*)	

The other stems used in Skt. with *idam* also occur :

Ś. aaṃ=*ayam*, AMg. aÿaṃ is used for all three genders.

Ś. iaṃ=*iyam*.   M. AMg. Ś. idaṃ (*only* Nom.).

M. assa=*asya*, eṇa=*anena*, AMg. Ś. aṇeṇa.

-iṇa becomes ṇa : ṇaṃ, ṇeṇa, ṇe.

AMg. has imeṇaṃ, imāo, imassa, imassiṃ.

Amū is declined like a Noun in u.

§ 111. *Pronominal adjectives* are similarly declined.

Examples.   Ś. aṇṇassiṃ=*anyasmin*, kadarassiṃ=*kata-rasmin*, avarassiṃ=*aparasmin*, parassiṃ=*parasmin-*aṇṇe=*anyān*. Ś. savvāṇaṃ AMg. savvesiṃ=*sarve*, sām.

§ 112. *Declension of Numerals.*

1. ĕkka (AMg. ega) follows the pronominal declension. Loc. Sing. Ś. ĕkkassiṃ Mg. ĕkkaśśiṃ M. ĕkkammi AMg. egaṃsi or egammi. Plur. ĕkke AMg. ege.

2. do (=*dvau*) duve (from *dve* Neut. Dual.) also Neuter (by analogy with tiṇṇi (=*trīṇi*) dŏṇṇi dŭnni. All are used without reference to gender. Ś. dŏṇṇi kumārīo=*dve kumāryau*. Ins. dohi(ṃ), Gen. doṇha(ṃ), Loc. dosu.

3. tiṇṇi=*trīṇi*, AMg. tao=*trayaḥ* (used without distinction of genders). Ins. tīhiṃ, Gen. tiṇh(aṃ)- Loc. tīsu.

4. cattāri is the commonest form. Cattāro from the Nom. Masc. and caüro from the Acc. occur and are used for either case. Ins. caühi(ṃ), Gen. caṇha(ṃ), Loc. caüsu.

5. pañca I. pañcahi(ṃ), G. pañcaṇha(ṃ), L. pañcasu.

6. cha I. chahiṃ, G chaṇha(ṃ), L. chasu, and so on up to 18.

19 to 58 are neuters in -aṃ or feminines in -ā in the Nom : other cases mostly like feminine singular, e.g. 20 Nom : vīsaṃ vīsā Acc. vīsaṃ I.G.L. vīsāe (also Nom. vīsaī and visaiṃ).

59–99 are neuters in iṃ or feminines in ī.

100. Ś. sada M. saa and 1000, sahassa are neuters and declined according to the A declension.

CHAPTER IX.

CONJUGATION.

§ 113. The Prākrit Verb has undergone greater changes than the Noun. The general phonetic laws have naturally disintegrated the consonantal conjugation, and by forbidding final consonants have tended to make the old forms ambiguous. There has been the same tendency, as in the case of declension, to reduce all verbs to one type. This process had not gone so far in the old Prākrits such as Pali, whereas by the Late Prākrit or Apabhraṃśa period only one conjugation remained, with a dwindling number of "irregularities," i.e. isolated survivals of the older system.

Moreover fewer forms were used. The **Dual** Number disappears : the **Ātmanepada** Voice has almost gone; apart from some scattered remnants all the wealth of **Perfects, Imperfects** and **Aorists** has been lost, and the past tense is expressed by a participle with, or without, an auxiliary verb. Thus of the old system there remain only : Present Indicative, Imperative, Optative, and Future : Active and Passive : Participles, Infinitive and Gerund.

In place of the old **Ten** classes of Verbs only two are
normal :—

> (i) the A-class including the great majority of verbs
> and the Passive.
> (ii) the E-class (with *e* derived from *aya*) including
> all Causatives, most Denominatives and some
> simple verbs.

The inflections of the two classes are the same.

§ 114. Present Indicative.   (*Normal Conjugation*)

A-Class.

Singular: 1. **pucchāmi**=*pṛcchāmi*
          2. **pucchasi**
          3. **Ś. pucchadi   M. pucchaï**

Plural :   1. **pucchāmo**
          2. **Ś. pucchadha M. pucchaha**
          3. **pucchanti.**

E-Class.

	Ś.	M.
Singular: 1.	kadhemi	kahemi=*kathayāmi*
2.	kadhesi	kahesi
3.	kadhedi	kahei
Plural : 1.	kadhemo	kahemo
2.	kadhedha	kaheha
3.	kadhĕnti	kahĕnti.

Note 1. AMg. follows M. in pucchaï, pucchaha. Māga-
dhī has the same endings as Śaur. puścadi, puścadha,
and of course puścaśi.

Note 2. Apabhraṃśa has   travelled   much   further :
Sing. 1. pucchaŭ, 2. pucchasi or pucchahi, 3. pucchaï.
Plur. 1. pucchahŭ, 2. pucchahu, 3. pucchahī. From
this stage it is not a long step to the modern forms,
e.g. Hindi. Sing. 1. pucchū̃, 2-3. pucche. Plur.
pucchẽ.

§ 115. *Ātmanepadam.*

In Śauraseni this is rare, occurring occasionally in verse, and in stock expressions. It is somewhat commoner in M. AMg. JM. The endings are shown in : Sing. 1. jāṇe, 2. jāṇase, 3. jāṇae (Ś. would have jāṇade if it occurred) Plur. 3. jāṇante.

Examples. M. Ś. jāṇe, M. manṇe=*manye*, Ś. lahe =*labhe*, icche, M. jāṇase, Mg. iścaśe=*icchase*, M. pūcchae=*prekṣate*, tīrae=*tīryate* (passive).

§ 116. **Imperative.**

Singular 1. (pucchāmu)
        2. **puccha, kahehi,** pucchasu, kahesu.
        3. **Ś. pucchadu**   **M. pucchaü.**
Plural   1. **pucchamha.**   **kahĕmha.**
        2. Ś. pucchadha   M. pucchaha (=Indic.)
        3. **pucchantu.**   **kahĕntu.**

Note 1. By rule hi is added to a long vowel in the 2nd Sing. AMg. generally, M. Mg. sometimes add it to a-stems lengthening the ă. AMg. gacchāhi (Ś. gaccha).

Note 2. The ending -su has been explained as a survival of the Skt. Ātmanepada ending -*sva*. Pischel (§ 467) explained it as a product of analogy : Indic. pucchadi, pucchanti : Imperat. pucchadu, pucchantu. ∴ Indic. pucchasi, Imperat. **pucchasu.** So also the 1st person Singular, Indic. pucchāmi : Imperat. *pucchāmu.* This -*āmu* however is found only in grammars. It is true that Śauraseni and Māgadhī often have the form in -*su* though otherwise they rarely use the Ātmanepadam. Ś. karesu=*kuru*, āṇesu=*ānaya*, kadhesu= *kathaya.* As however Pali derives -*ssu* from *sva*, and uses this also with Parasmaipada stems (E. Müller, Pali Grammar, p. 107), this is probably its origin, though analogy may have aided its adoption in the active voice.

Note 3. 1st Plur. -mha=*sma* is from the Aorist accord-
ing to Pischel (§ 470), who compares Vedic *jeṣma
deṣma* (Whitney 894 c.).

§ 117. **Optative.** This is common in AMg. JM., rarer in M. and
exceptional in the other dialects.

There are two types—(i) the usual form in M. AMg.
JM. derived from the Opt. of the 2nd conjugation.
=*yām*, -*yāḥ*, -*yāt*, etc.

e.g., Singular   1. **vaṭṭĕjjā̆**, (vaṭṭejjāmi, analogy with Indic.)
             2. **vaṭṭĕjjāsi** (°ā̆hi) (°ā̆su).
             3. **vaṭṭĕjjā̆.**
     Plural   1. vaṭṭĕjjāma.
             2. vaṭṭĕjjāha
             3. vaṭṭĕjjā̆=3rd Sing.

(ii) the only form in Śauraseni, also found in the others
derived from the Opt. of the 1st conjugation,
-*eyam*, -*eḥ* -*et*.

Singular   1. **vaṭṭeam** (vaṭṭe analogy with 2, 3, persons).
           2. **vaṭṭe.**
           3. **vaṭṭe** also used for 3rd Plural.

Note. The short ĕ in -*ĕjja* seems to be for ĭ (§ 72). So
jāniyāt becomes AMg. jāṇijjā, jāṇĕjjā, but doubtless
its prevalence is partly due to the influence of the 1st
conjugation.

§ 118. **Future.**   (-*issa*- from -*iṣya*-)
     Singular   1. **pucchissaṃ,** AMg. pucchissāmi.
                2. **pucchissasi** (M. AMg. pucchihisi).
                3. **pucchissadi,** M pucchissaï (or pucchihii).
     Plural   1. **pucchissāmo.**
                2. **pucchissadha,** M. pucchissaha.
                3. **pucchissanti** (AMg. pucchihinti).

Note. The forms in *ihi* arose from forms in *hi* after
diphthongs or long vowels. The 3rd Sing. pucchihii

contracts to pucchihī as the metre requires. The grammarians give also 1st Singular in *ihāmi, ihimi* : (Apabhraṃśa has pĕkkhīhimi=*prekṣiṣye*), 1st Plural -*ihimo*, 2nd Plural -*ihiha ihittha*.

§ 119. **Passive.** The Prakrit passive either (i) corresponds to the Sanskrit form in -*ya* (*y* being omitted in Ś Mg. and becoming -*jj*- in the others), or adds -*īa*- (S. Mg. *īa*, others -*ijja*) to (ii) the root, or more commonly to (iii) the present stem.

The endings are those of the (A-class) parasmaipàda ; but M. AMg. often have ātmanepada endings especially in the Present Participle.

Examples. (i) M. jujjaï. Ś. jujjadi=*yujyate*. M. gammaï, M. dijjaï, Ś. **dijjadi**=*dīyate*.

   (ii) From√*gam* M. gamijjaï, Ś. **gamīadi**.
   (iii) From gacch- Ś. **gacchīadi**.

		Śauraseni.	*Māharāṣṭri.*
Singular	1.	**pucchīāmi**	pucchijjāmi,
	2.	**pucchīasi**	pucchijjasi,
	3.	**pucchīadi**	pucchijjaï,
		and so on.	and so on.

§ 120. **Causatives.** This is formed as in Skt. by the addition of *aya* (becomes e) to the *strong* form of the root. hāseï=*hāsayati*. After *ā* Skt. inserts *p* ; -*paya* becomes Pkt. ve.

ṇivvāvedi=*nirvāpayati*. Prakrit extends this usage to many other stems, lengthening the *ă* of the present stem, e.g. **pucchāvedi**.

§ 121. **Participles.** The normal forms are shown in the following scheme :—

Active.

Present. **pucchanto**, F. **pucchantā**, N. **pucchantaṃ**, causal, **pucchāvento**..etc.

Future. **pucchissanto, -tā, -taṃ.**

Perfect. *nil.*

    Middle (active meaning, common in AMg.)

Present. pucchamāṇo -ṇā (ṇī), -ṇaṃ.

Future. pucchissamāṇo etc.

<p align="center">*Passive.*</p>

Present. Ś. **pucchīanto,** M. pucchijjanta, AMg. puc chijjamāṇo.

Future. ("Gerundive") **pucchidavvo** – M. pucchiavvo (pucchaṇīo). M. **pucchaṇijjo.** [kajjo=*kāryaḥ*] (§ 137).

Past. Ś. **pucchido,** M. **pucchio** (§§ 124-5).

§ 121*a*. **Infinitive.** Sanskrit -*tum* becomes Ś. Mg. -*duṃ*. M. -*uṃ*. The ending is added (*a*) to the root, (*b*) to the present stem (with i). Ś. **pucchiduṃ** M. **pucchiuṃ.**

    Examples. gantuṃ, Ś. gacchiduṃ, gamiduṃ Ś. kāmeduṃ=*kāmayituṃ*, dhāriduṃ=*dhārayituṃ*, Ś. kāduṃ, and kariduṃ M. kāuṃ=*kartum.*

    (For Inf. in -ttae see § 136.)

§ 122. **Gerund.**

    Ś. **pucchia.** M. **pucchiūṇa.** AMg. pucchittā or pucchidūṇa. Ś. Mg. have **kadua**=*kṛtvā*, **gadua**=*gatvā.* Ś. has sometimes in *verse* the ending ūṇa-dūṇa, e.g. pekkhiūṇa, otherwise only **-ia** is correct.

    Examples. Ś. **ṇaïa** (for *nītvā*)=*nayiya* but avaṇīa=*apaṇīya*, **odaria**=*avatīrya* (Mg. odalia), pĕkkhia, bhavia, pavisia.

    In Māgadhī the form in -*ūṇa* is the commonest. *Examples.* haūṇa, gantūṇa, hasiūṇa, kāūṇa.

    AMg. prefers the form in *ttā* (*tā* after a nasal): bhavittā, gantā, hasittā, karittā, also *ttāṇaṃ* : bhavittāṇaṃ.

§ 123. **Irregular Verbs.**

    The normal or regular conjugation being as given above, there are also numerous "*irregular*" forms. These

are of two kinds : (*a*) those that agree with Sanskrit in their formation, only undergoing phonetic changes; (*b*) those that are irregular by both Sanskrit and Prakrit standards. These latter, which are not very numerous, may be due to analogy, or to the survival of forms used in the ancient spoken language, but not recognised by classical Sanskrit.

§ 124. A large number of "irregular" verbs in Prakrit differ from the normal conjugation only in the **Past Participle Passive.** It was natural that older forms should be preserved in the case of this participle. Some words like *gatah, krtah* were in such constant use, that their phonetic equivalents, e.g. gado, gao, kido, kao, were likely to hold their own against new forms suggested by analogy such as *gacchido, karido. Moreover in many cases this participle has acquired a width of meaning as an adjective over and above its literal meaning as a participle. Words, e.g. like *snigdha, mugdha, Buddha* are not necessarily thought of as parts of verbs, though their derivation is clear. The degree to which normal analogous forms prevailed, or older forms survived (or were introduced from Sanskrit) varies with different dialects and different writers. It is not a matter of precise rule, nor would an extensive list of occasional exceptions be of much value. There are, however, a number of forms of more frequent occurrence, with which the student should be familiar from the outset (§ 125).

§ 126. Irregularities in Present Indicative.

Regular or Normal Indicatives are of the type **pucchadi** or **kadhedi** (§ 114) and are either (a) the phonetic equivalents of Sanskrit Indicatives of the 1st Conjugation, or (b) from roots in the 2nd Conjugation, equivalents of what Sanskrit would most naturally have had, if they had been included in the 1st Conjugation. Thus we may class as *regular* such forms as (a) gacchadi, icchadi, siñcadi, muñcadi, maradi, sumaradi pivadi, phusadi, kuppadi, naccadi, kadhedi, takkedi, cintedi, (b) hanadi ($\sqrt{han}$) sasadi ($\sqrt{śvas}$).

'*Irregular*' forms comprise (i) forms not of the normal type, e.g. ṭhāï; (ii) verbs attracted into the E class, e.g. karedi: (iii) forms diverging from Skt. types in (a); (iv) nasalised roots; (v) addition of *n* original or by

analogy; (vi) other survivals of Skt. conjugation; (vii) anomalies.

§ 127. (i) Type with 3rd Sing. in *āï* (S. ādi) arises (*a*) by *contraction*. Apa. khāï=khāaï=*khādati*; (*b*) *survival* of form in Skt. 2nd class. M. vāï=*vāti* but also vāaï (Ś. vāadi), M. paḍihāï=*pratibhāti* (Ś. paḍihāadi), Ś. bhādi=*bhāti*, vihādi=*vibhāti*; (*c*) by *analogy* M. ṭhāï=**sthāti* for *tiṣṭhati* (Ś. ciṭṭhadi) and so with all roots ending in ā. dhāi or dhāaï, gāi, jhāi (= Epic *dhyāti*).

Other *contracted* forms are Ś. bhodi=*bhavati*, **ṇedi**=*nayati*.

√dā to give has demi desi dedi—děnti.

dedi is from **dáyati*, cf. Ś. Fut. daïssaṃ. Absol. daïa.

§ 128. (ii) Many verbs are attracted to the E class (10th class in Skt.). *Examples.* **Karedi** (=*Karoti*) (distinguish from causal kāredi=*kārayati*), muñcedi (causal moāvedi), hasedi, sumaredi, ciṇedi, **suṇedī**, bhaṇedi, dhuvedi, etc.

§ 129. (iii) √ *ru* has ravaï (1st class), ruvai (6th) and **rovaï** Inf. rovium. (Ś. has forms from *rud.* rodiduṃ).
√ *dhau.* M. dhuvaï. AMg. dhovaï dhoveï Ś. dhoadi.
√ *bhū* has M. **hoi** huvaï. Ś. **homi hosi bhodi.** Opt. bhaveaṃ bhave. Infin bhaviduṃ.

ruccadi=**rucyate* (transferred to 4th class) (also roadi Mg. loadi)—similarly **laggadi**, vajjadi (√*vraj*), jujjadi =**yujyati* (Epic *yuñjati*).

§ 130. (iv) From *chid* come chindaï **chindadi**. This is natural as the root was nasalised in the Sanskrit Present. Similarly with other roots of the 7th class. Bhindai, bhañjai, bhuñjadi.

The nasal in rambhaï (√ *rabh*) is also familiar in Skt. derivatives. (Epic *rambhati*).

muñcadi (M. muñcaï) is regular, but M. has also muasi
=*mucasi*.

§ 131. (v) Ṇ. is preserved in ciṇai Ś. ciṇedi (*Skt. cinoti*), kuṇaï
(Vedic *kṛṇoti*), suṇedi (M. suṇai), jāṇāï Ś. jāṇādi,
na āṇādi, kiṇaï=*kriṇāti*, gēṇhadi=*gṛhṇāti*, Ś. sak-
kaṇomi sakkuṇomi=*śaknomi*, dhuṇai (Ś. dhoadi,
Pāli dhovati) : by analogy in jiṇaï (Ś. jaadi), thuṇai
(√ *stu*).

§ 132. (vi) √i " to go " has emi esi edi (M. ei)—ēnti : √ *as* to
be..mhi si atthi, mha (M. mho) ttha santi.

(*Note.*—Atthi the only common non-enclitic form is used
with all numbers and persons).

√ *bhī*. M. bihei (Ś. bhāadi).

(vii) bhaṇādi as if from bha-ṇā-mi (9th class) also bha-
ṇedi. suṇādi=suṇedi as if in 9th class.

√ *svap* becomes suv, hence suaï and (by analogy with
ruaï rovaï) sovaï Ś. sovadi.

§ 133. *Survivals of other conjugational forms.*

Imperfect. āsī=*āsīt* used for all persons of both num-
bers.

Optative. AMg. siyā=*syāt*, kujjā=*kuryāt*, būyā=*brūyāt*,
sakkā=Vedic *śakyāt* (Pischel § 465).

Precative M. AMg. hojjā=*bhūyāt*. AMg. dĕjjā=*deyāt*.

Aorist. AMg. akāsī=*akārṣīḥ* or *akārṣīt*. Plural -*iṃsu*
akariṃsu (cf. the Aorist in Pali).

Perfect. AMg. āhu=*āhuḥ*. Plural āhaṃsu.

§ 134. **Irregular Futures.**

Futures in -*issadi* (or M. *ihiï*) are normally formed from
the Present base : pucchissaṃ, kadhissaṃ, M. pucchi-
haṃ kahehaṃ (§ 118). They are also formed from
the root as in Sanskrit. M. ṇehii=*nesyati*, but Ś.
ṇaissadi, Ś. **gamissadi.**

From √ *bhū* various present bases are used to form the
future. Ś. bhavissaṃ, huvissaṃ, Mg. huvisśaṃ M.
hohii hossaṃ.

√ *Sthā* M. ṭhāhii (pres. ṭhāi). Ś. **ciṭṭhissadi** (pres. ciṭ-
ṭhadi). Other forms represent the Sanskrit—*syāmi*
especially in M. AMg: so **daccham**=*drakṣyāmi*, (2. s.
dacchisi, 3. s. dacchii, 3 pl. dacchinti), mŏccham (√*muc*)
vĕccham (√ *vid*), rŏccham (√ *rud*) vŏccham (√ *vac*).
daccham and the rest are not used in Ś. Mg.

Ś. **pĕkkhissam** (M. pĕcchissam) **rodissam, vedissam.**
Causatives and others in E-class form Futures (*a*) as in
Sanskrit (omitting intervocal *y*). Ś. **kadhaissam moā-
vaïssasi**=**mocāpayiṣyasi*. ṇiaṭṭaissadi=*nivartayiṣ-
yati* (b) M. AMg. from the e-stem : vattehāmi=*vartayiṣ-
yāmi* (c) omitting *aya*=e. M.kahissam, Ś. kadhissam,
M. puloissam=*pralokayiṣyāmi* Ś. takkissadi=*tarkay-
iṣyati*, sussūsaïssam=*śuśrūṣayiṣyāmi* Mg. māliśśaśi=
mārayiṣyasi.

√ *dā* has Ś. daïssam M. dāham, √ kr̥ has Ś. karissam
M. also kāham.

§ 135. Irregular Passives.

(*a*) Many passives that are often called irregular as
not being formed with the commonest ending
-*ijjaï* Ś. *īadi*, are regular equivalents of Sanskrit
passives. (§ 119. (i)) e.g. **jujjadi**=*yujyate*, gam-
maï=*gamyate*. Other examples are :—Khippaï
(*kṣip*), luppaï (*lup*), bhajjai (*bhaj*), bajjhai (*badh* :
dhy becomes jjh § 44), rujjhai (*rudh*), ārabbhaï (*ā-
rabh*), gijjaï (*gā*), khajjai (*khād*), labbhaï Ś. lab-
bhadi (*labh*), chijjaï (*chid*), bhijjaï (*bhid*), bhujjai
(*bhuj*), muccaï (*muc*), vuccai (*vac*), tīrai (*tr̥*) kīraï
(*kr̥*).

(*b*) Others are similarly formed from obsolete roots or
modified forms of roots, e.g. vubbhaï=*uhyate*
(from **vubh*), dubbhai=*duhyate*, libbhaï=*lihyate*,
rubbhai=*rudhyate*, ghĕppaï=*gr̥hyate* ; and with *uv*
for ū̆ ruvvaï=**ruvyate* (Ś. rodīadi), suvvaï (*śru*)
(Ś. suṇīadi), thuvvaï (*stu*), dhuvvai (*dhū*) also

dhuṇijjaï. Similar are civvaï (*cīv* for *ci*) also ciṇij-
jaï, Ś. cīadi, jivvaï (*jiv* for *ji*).[1]

(c) ādhappaï is a causative passive=*ādhāpyate*, so also
vidhappaï.

(d) jammaï, "is born," is derived from *janman* Pkt.
jamma; similar is the case with hammaï (√*han*)
khammaï (√*khan*).

Anomalous summaï (*śru*), cimmai (√*ci*).

Note.—Śaurasenī and Māgadhī often prefer the form from
the present base. M. labbhaï, Ś. labbhadi, but also
lambhīadi ; M. muccaï, Ś. *muñcīadi* ; M. suvvaï, Ś. *suṇī-
adi*, Mg. śuṇīadi; M. ruvvai, Ś. *rodīadi* ; M. bhujjaï,
Ś. *bhuñjīadi* ; M. kīraï, Ś. *karīadi* (AMg. kajjaï=
*kāryate) ; M. ṇajjaï, Ś. *jāṇīadi*; M. bhaṇṇaï, Ś.
bhaṇīadi.

§ 136. **Infinitives** (Variations).

The commonest form especially in Śaurasenī is that
derived from *itum* (M. *ium*, Ś. *idum*) added to the pre-
sent base, *i.e.* gacchidum, aṇucitthidum (*sthā*), geṇhi-
dum (*grah*), jāṇidum (*jñā*), dahidum (*dah*), khividum
(*kṣip*), haridum (*hṛ*). Causatives, kāredum, dhāre-
dum, daṃsedum=*darśayitum* (sometimes uncontrac-
ted Ś. ṇiattāidum=*nivartayitum*), or by analogy with
A-stems : dhāridum, māridum, kadhidum.

Equivalents of Sanskrit forms in -*tum* are also found in
Śaur.: but are commoner in M.

Ś. thādum (*sthā*), pādum (to drink), kādum, M. kāum (*kṛ*),
gantum (*gam*). M. bhōttum=*bhoktum*, daṭṭhum=
drastum, dāum (*dā*), ṇeum (*nī*), pāum (*pā*), Ś. pādum,
JM. pivium, soum (*śrotum*), jeum (*ji*) (AMg. jiṇium),

• [1] The two passives civvai jivvai are assigned to *ci* and *ji* by the
Grammarians. They have been explained as analogous to the forms
from roots in u or ū. Pischel held that civvai was a regular passive from
cīv given in the **Dhātupāṭha** (='take' or 'cover') and jivvai probably
from *jiv* (='please'). Vide Pischel, § 537.

laddhuṃ (*labh*), voḍhuṃ (*vah*), chĕttuṃ (*chid*), bhet-
tuṃ (*bhid*), mŏttuṃ (*muc*), nāuṃ (*jñā*). Similarly
formed are ghĕttuṃ (§ 19) (=*ghṛp-tum* for *grahītum*)[1]
sŏttum(=*sov-tum for *svaptum* cf. rŏttuṃ=*rotum*).
√*vac* has M. vŏttuṃ Ś. vattuṃ.

Ardha-Māgadhī often uses the -*tum* form as a gerund, so
that kāuṃ means *kṛtvā*. For the Infinitive this dialect
prefers a form in *ttae* or *ittae*, ciṭṭhittae (*sthā*), gacchittae
(*gam*). This is derived from a Dative Infinitive as
found in Vedic.

§ 137. **Gerundives** (Varieties). (cf. § 121.)

(*a*) From -*tavya*, either (i) with the present stem, or (ii)
with the root (strong form).

(i) pucchidavva, gacchidavva, hodavva (§ 4) or bhavi-
davva, aṇuciṭṭhidavva, dādavva, suṇidavva, jāṇi-
davva, gĕṇhidavva.

(ii) sodavva M. soavva (*śru*), ghĕttavva, kādavva (§ 63),
M. kāavva (*kṛ*).

(*b*) From -*nīya*. M.AMg. -*aṇijja*, Ś. Mg. -*aṇīa*: karaṇīa,
daṃsaṇīa, (from Present stem pucchaṇīa), M. kara-
ṇijja, daṃsaṇijja.

(*c*) From -*ya*. kajja (§ 50)=*kārya*. AMg. vŏjjha=*vāhya*;
from Present stems: gĕjjha (§ 70)=*grhya* from
present stem *gṛha*.[2]

---

[1] Also M. gahiuṃ, AMg. giṇhiuṃ, JM. gĕṇhiuṃ, Ś. gĕṇhiduṃ.

[2] This is Pischel's derivation. However *grāhya* would become *gaj-
jha, and association with the group gĕṇhadi ghĕttuṃ, etc., might account
for the change of vowel *a* to *ĕ*.

CHAPTER X.

CLASSIFICATION OF PRAKRITS.

The rules and examples given in the last six chapters deal mainly with Māhārāṣṭrī and Śauraseni, other languages being mentioned incidentally.

The principal peculiarities of some of these may now be brought together.

Māgadhī. It is a matter for regret that the sources of information about this language are not more abundant, as it is in some ways the most interesting of the Prakrits. We have here striking variations in phonetics that are not easily accounted for.

Ś for S (श for स) is an equation that is reflected in the modern languages of the East of India, where people speak, and even write of the "Shām Ved" and "Sheeta." As other Prakrits use only स *s* this law should cause the student no difficulty : **bhaviśśadi** is easily recognised as the equivalent of Ś. *bhavissadi,* **taśśiṃ** of *tassiṃ,* **śā** of *sā,* **puttaśśa** of *puttassa,* and so on.

L for R (ल for र) is more striking, especially at the beginning of a word. **lāāṇo**="kings."

puliśe=Ś. *puriso,* **galuḍa**=Ś. *garuḍa,* Cāludatta, ovālida-śalīla=*apavāritaśarīra,* **śamale**=*samare,* ṇagalantala=*nagarāntara.*

This change *l* for *r* is found occasionally in other Prakrits (§ 26) and in Pali (taluṇo=*taruṇo*) : it is found also in the Vedic language, where *alam* √ *kṛ* replaces *aram-(kṛṇoti),* and √ *luc* replaces *ruc.* There are many instances in other languages, and it is often difficult to determine which was the original sound.

It is, however, remarkable to find an Aryan dialect without an R sound at all. The modern dialects of Bihar and Bengal have not replaced every *r* with an *l.* Perhaps this rule for dramatic Māgadhī is a conventional exaggeration of a marked

tendency of the Eastern dialects.   Possibly as Māgadhī is put
in the mouths of only low-class people, it represents only the
habit of a non-āryan stratum of society, which like the Chinese
coolies of to-day may have had no R's.

On the other hand if we go back to Aśoka's time (3rd cent.
B.C.) we find the same change in the Eastern dialect of the
Inscriptions which seems to have been the language of the
Court at Patna and which was used on the Pillars now at
Allahabad and Delhi and with slight variations in the Rock
Inscription at Kalsi.

Y remains and replaces J (य for ज).

> yadhā=Ś. jadhā (§ 1), yānadi=jānāti.
>
> yāṇidavvaṃ=Ś. jāṇidavvaṃ, yaṇavada=janapada.
>
> yāyade=jāyate.   (jh becomes yh.   Yhatti=jhaṭiti.)

Dy. rj. ry. all become yy.   So that where Śauraseṇī has jj,
Māgadhī has yy.   **(य्य for ज्ज).**

> ayya=adya or ārya (Ś. ajja).
>
> avayya=avadya, mayya=madya.
>
> (dhy becomes yyh : mayyhaṇṇa=majjhaṇṇa § 74).
>
> ayyuṇa=arjuna, kayya=kārya (kajja § 50).
>
> duyyaṇa=durjana.

From these examples it is clear that य in Māgadhī represents
a front palate fricative different from the semi-vowel sound in
English "yes."   The equivalent of य was used in the North-
west to express a foreign sound written Z in Greek.   So on
coins of King Azes we find the genitive Ayasa.   Words spelt
in Bengali with the equivalent of ज, are pronounced in some
dialects with a sound resembling Z in 'zeal' or zh in 'azure.'
A similar sound is commonly given to य in many words, e.g.
(य=यॆ pronounced zhe.

Ñy, ny, jñ, ñj become ññ.

> puñña=puṇya (Ś. puṇṇa § 48).   añña=anya (Ś. aṇṇa).
>
> kaññakā=kanyakā.   lañño=rājñaḥ (Ś. raṇṇo § 99).
>
> aññali=añjali (Ś. keeps ñj).

Medial cch becomes śc. (च्छ becomes श्च.)[1]

> gaśca=gaccha, iścīadi=icchati (*icchyate), uścaladi=uccha-
> lati, puścadi=prcchati.

> tiliści peskadi=M. tiricchi pĕcchai=tiryak prekṣate.

A sibilant is retained at the beginning of a group of con-
sonants. Grammarians differ as to which sibilant should be
written. MSS. vary too much to give much help in the
matter.

> Ṣka. षुष्क becomes षुश्क according to Hemacandra, other-

> wise we find षुश्के śuśke=suṣkah, Tuluśka=Turuṣka.

> Ṣta ṣṭh become ṣṭa (or śṭa): कष्ट becomes कष्ट or कश्ट
> suṣṭhu becomes śuṣṭu or śuśṭu.

Ṣpa, ṣpha become ṣpa, ṣpha, niṣphala=niṣphala (M.Ś. ṇip-
phala, § 38).

Ska, skha. paskhaladi=praskhalati.

> Sta. stha become sta (or śta) **haśte** or **haste**=hastaḥ (M.Ś.
> hattho § 38), uvastida=upasthita.

Spa. Buhaspadi=Bṛhaspati (or Bihaśpadi).

> Kṣa becomes ska. **peskadi**=prekṣate (or it is written śka.
> paśka=pakṣa. Hemacandra says pahka, i.e. with visarga
> jihvāmūlīya).

The real Māgadhī sound may have been neither the ष nor
the श of the Midland Sanskrit. These groups being difficult,
it is not surprising to find that MSS. generally write the
assimilated forms tth, etc.

---

[1] As verbal forms in ccha go back to I.E. forms in -SKA the Māgadhī
śc might be regarded as more archaic than the Vedic cch (however pro-
nounced): cf. Slavonic, but this is considered inadmissible as Māgadhī
has śc also for secondary cch as in uścaladi, maścalī (=Fish. matsya-lī-
Pr. maccha), cf. Hindī machlī. On the other hand if originally correct for
icchadi, etc., the same group would be readily introduced in other cases
where Śaurasenī, etc., had cch.

rth becomes st. (or śt) so tista=*tīrtha*. aste=*arthaḥ*. This
may be merely conventional analogy,[1] e.g. Śaurasenī hattho :
Māgadhī haste ∴ Ś. attho : Mg. aste. In **grammar** the two
characteristic points are Nom. Sing. in -e. śe haste=so hattho
and hage="I" (§ 107). Otherwise the grammar closely
follows Śaurasenī.

Some *Dialects of Māgadhī* appear in the plays.

Śākāri is spoken by the King's brother-in-law in the Little
Clay Cart.

Peculiarities.—A weak y before palatals. Yciṣṭha=*tiṣṭha*.[2]
ḍa in Past Participles especially from roots in *r*. kaḍa=*kṛta*
(the same feature is found in AMg.). Gen. Sing. in *āha* as well
as *aśśa* Cāludattāha. Loc. Sing. āhiṃ. pavahaṇāhiṃ=*prava-
haṇe* Voc. Plur-āho. (Vedic-*āsaḥ*). These last three points
resemble Apabhraṃśa.

Cāṇḍālī and **Śābarī** appear to be dialects of Māgadhī.

Māthura and the two gamblers in the Mṛcchakaṭikā speak a
dialect called **Ḍhakkī** by Pischel, who supposed it to be a
dialect of Māgadhī. Sir George Grierson has shown that the
form **Ṭakkī** has better authority and ascribes it to the country
of the Ṭakkas round about Sialkot.[3]

Ardha-Māgadhī. Jacobi called this Jaina Prākrit and
regarded it as an older, more archaic Māhārāṣṭrī. The Indian
grammarians called the language of the old Jain Sūtras

[1] On the other hand the change *rt* becomes *š* is found in Iranian.
Avestan mašyo=*martyaḥ*. G.I.P., I, § 289.

[2] Mārkaṇḍeya gives this for Māgadhī and Vrācaḍa Apabhraṃśa,
Ycilaṃ=*ciraṃ*. The pronunciation is not clear (*vide* Selections, Māgadhī).

[3] If Ṭakkī was a Panjab dialect it is strange that Mārkaṇḍeya should
identify this with the Drāviḍī Vibhāṣā. (See Grierson, J.R.A.S., 1913.
p. 882 ; 1918, p. 513.) Ṭakkī according to Mārkaṇḍeya is a "mutual
mixture of Sanskrit and Śaurasenī" employed by "professional gamblers
and by merchants of lowly position." The vowel *u* often appears at the
end of a word, but not always. It has both *sa* and *śa*, *la* and *ra*. In the
Panjab Hills there is a common script called Ṭakrī or Ṭākrī generally
derived from the same name of a people, Ṭakka.

"Ārṣam" from Ṛṣi. Hemacandra explains that all his rules have exceptions in "Ārṣa." Trivikrama, another grammarian, excluded "Ārṣa" from his treatise, because its meanings were *rūḍha*, or conventional, not strictly in accordance with etymology, i.e. not based on Sanskrit.

Namisādhu commenting on Rudraṭa's Kāvyālaṃkāra (2-12), derives the word Prākrit from *prakṛti* in the sense of natural speech free from the rules of grammarians, or from *prāk kṛta*, 'created of old!' because, says he, the Prakrit of the Ārṣa canon, Ardha-māgadhī is the language of the gods. *Ārisa-vaṭjane siddhaṃ devānaṃ Addhamāgahā vāṇī*. Obviously Namisādhu was a Jain. The Jains indeed supposed that Ardha-Māgadhī, the language in which Mahāvīra preached, was the original language from which all others were derived.[1]

There is some difference between the prose and verse portions of the Canon. Verses often have Nom. Sing. in -*o* instead of the characteristic -*e* (like Mg.), gerunds in *tūṇa ūṇa* (like M.) while prose prefers *ttā* or *ttāṇaṃ* (§ 122).

Other points are : Verse mĕccha, prose milakkhu. Verse kuṇai, prose kuvvaī (=*kurvati). The verse dialect is thus somewhat nearer to M. than the prose.

Ardha-Māgadhī agrees with Māgadhī in the Nom. Sing. in -*e*, the use of Gen. Sing. *tava*; past participles in *ḍa* for *ta* after roots in *ṛ* (but not always) ; in *ka* becomes *ga* "Asoga" (but this is rare in Mg.) ; and in Pluti of -*a* in Voc. Sing. (common in Apabhraṃśa).

It differs markedly in the retention of *ra* and *sa*. In general AMg. (like Pali) retains more archaic features than the dramatic Prakrits. AMg. is assigned by the Bhāratīya-nāṭya-śāstra (followed by Sāhityadarpaṇa) to servants, Rajputs, and the heads of guilds. The Jain monks in the plays who might be expected to speak AMg. appear to speak ordinary Māgadhī.[2]

---

[1] *Vide* Pischel, § 16.

[2] One of the dialects in the fragments of Buddhist dramas found in Central Asia is classed by Lüders as Old Ardha-Māgadhī.

AMg. differs in many respects from Māhārāṣṭrī.[1]

Phonetics.—am becomes ām before eva and avi (=*api*).

> iti becomes i after pluti vowel or in *iti vā*.
>
> prati drops i : paḍuppanna=*pratyutpanna* (rare in other dialects).
>
> dentals for palatals.   teicchā=*cikitsā*.
>
> ahā=yathā.
>
> use of sandhi consonants (§ 78).

Noun : dative in -ttāe (§ 92),

> instrumental in sā (§ 104),
>
> locative in -msi (§ 92 v.).

Verbs : √khyā āïkkhaï (Pāli ācikkhati) M. akkhāï,

> kuvvai (in prose, see above).
>
> Relics of Aorists, e.g., 3 plur. pucchiṃsu.
>
> Infinitives in ṭṭu -ittu used as gerunds, e.g., kaṭṭu (means *kṛtvā*), avahaṭṭu (means *apahṛtya*) suṇittu, jāṇittu.
>
> Infinitives in -ttae, -ittae (§ 136).
>
> Gerunds in -ttā, -ttāṇaṃ, -ccā, -ccāṇa(ṃ), -yāṇa(ṃ).

Moreover, where they agree what is common in AMg. is often rare in M. Cerebralisation is much commoner in AMg. and so is the change *la* for *ra*.

The vocabulary is also often quite distinct.

It will be obvious that AMg. differs still more from Śaurasenī.

The later Jain writings belong to times when the sect had spread more widely and were influenced by other dialects. Owing possibly to the popularity of this religion among the rich mercantile communities on the West coast, the non-canonical writings of the Śvetāmbara Jains are in a language which may be regarded as a form of Māhārāṣṭrī, although it

---

[1] Jacobi considered the language of the Jain Canon to be an older form of Māhārāṣṭrī. Kalpa Sūtra, S.B.E., XXII. Pischel showed this view to be untenable. Pr. Gr., § 18.

retains a number of the peculiarities of AMg., e.g., infinitive in -*ittu,* gerund in -*ittā* and *ga* for *ka.* This is the main dialect of Jacobi's Selected Narratives in Māhārāṣṭrī, and is generally known as **Jain Māhārāṣṭrī.**

The language of the Digambara canon has Nom. Sing. in *o*: t, th become d, dh.   Hence it has been called **Jain Śaurasenī.** It has however much that is foreign to Śaurasenī, but found in either M. or AMg.   In the direction of Gujarat were many strongholds of Jainism, and here the Śaurasenī type of dialect would meet Māhārāṣṭrī.   That JŚ. preserves rather more of the peculiarities of AMg. than JM. does, is probably due to the fact that it is somewhat older.

The resemblances and differences of the principal Prakrits given above would not necessarily lead to a closer classification.   We have an Eastern Prakrit (Māgadhī), a Southern Prakrit (Māhārāṣṭrī), and a Central Prakrit (Śaurasenī).   Ardhamāgadhī appears to resemble the Southern more than the Central Prakrit.   **Hoernle,**[1] on the basis of a comparative study of some of the modern Indo-Aryan languages, supposed that the whole of Aryan-speaking India was at one time divided between two languages, a "*Śaurasenī tongue* " and a "*Māgadhī tongue.*"   Māhārāṣṭrī he regarded as an artificial literary language, without any direct relation to the spoken language of Mahārāṣṭram.   Further study of the Prakrits and of the modern dialects has shown that this view is untenable.

Māhārāṣṭrī (and Jain Māhārāṣṭrī) has peculiarities which can be traced in modern Marāṭhī, and there can be no doubt that this Prakrit was based on the language of the Marāṭha country.[2]

Grierson[3] with more abundant material has developed the

idea of the geographical classification of the Prakrits on the
basis of a comparison with modern dialects. His classifica-
tion is—

Central Prakrit	..	.. Śaurasenī.
Outer Prakrits	..	.. E. Māgadhī.
		S. Māhārāṣtrī.
Intermediate	..	.. Ardha-Māgadhī.

This is a convenient classification inasmuch as Śaurasenī
is the most Sanskritic, and the representative of the Madhya-
deśa, which was the centre of Hindu culture after the early
Rigvedic times : while literary centres at a distance from this
middle point naturally show more independence from Sanskrit.
This classification is indeed connected with a theory relating to
the immigration of the Aryan-speaking tribes into the Penin-
sula. The speakers of the dialects out of which classical Sans-
krit was created, and on which later on Śaurasenī was based,
are supposed to have forced their way into the Madhyadeśa
some time after a previous Aryan invasion. The descendants
of those first-comers produced the " Outer Band " of languages.

Much may be said both for and against this particular
theory as an explanation of certain linguistic facts. It is
however possible to accept a classification based on such facts,
without necessarily accepting this particular explanation.

A weak point in the classification might appear to be the
position of Ardha-Māgadhī. If this was centred in Oude, one
would expect the language to be roughly speaking half Māgadhī
and *half Śaurasenī*. Now Māgadhī, as far as we know it, hardly
differs from Śaurasenī except in striking phonetic variations.
If we allowed Ardha-Māgadhī a Nom. Sing. in e, a certain
amount of l for r, and ś for s with perhaps some traces
of the other phonetic peculiarities of Māgadhī, we could invent
a Prakrit that would fit in with the scheme, but it would be
quite different to the real Ardha-Māgadhī of the old Jain
Canon. Eastern Hindi does indeed lie between Western Hindi
and the dialects of Bihar, and combines some of the peculiarities

of the languages on either side; but the Prakrit Ardha-Māgadhī does not look as if it occupied the same position or was the ancestor of Eastern Hindi.

It must, however, be remembered that this classification deals primarily with the spoken languages on which the literary languages were based. The literary Prakrits were not all crystallised at the same time, and so do not represent strictly contemporary dialects. Ardha-Māgadhī is obviously more archaic than Śaurasenī. It has indeed been suggested that the Eastern dialect of Aśoka's inscriptions should be regarded as an older form of Ardha-Māgadhī. Lüders calls it Old Ardha-Māgadhī. This, it is presumed, was the current language of the Mauryan court. Very similar, it is thought, was the language in which the teachings of Gautama Buddha were first recorded, before either the Pali Canon or the Sanskrit Canon was established.

A language widely used in the Ganges valley would be quite likely to be neither pure Māgadhī nor pure Śaurasenī. Without necessarily being exactly the dialect of Kāśī either, it might very well be based on the speech of the country lying intermediate between the two ends of the valley. Later on when the centre of Jainism had travelled further to the West, Later Ardha-Māgadhī would have taken on the Māhārāṣṭrī colouring which we find in the Jain Canon. Other circumstances had in the meantime led to the conversion of the Buddhist scriptures into Pāli. (See S. Lévi: Journal Asiatique, 1912, p. 495.)

Paiśācī Prākrit.—Paiśācī lies outside the circle of languages dealt with so far. The term seems to have been used (*a*) of the language of demons " Bhūtabhāṣā," (*b*) of a number of uncivilized languages, including some Apabhraṃśas, (*c*) the Paiśācī dialect of the grammarians (especially Hemacandra) with a subdialect Cūḷikā Paiśīcī (C.P.). This Paiśācī dialect is archaic in character. Its chief peculiarity is the substitution of surd mutes for sonants. Tāmotara=*Dāmodara*. C.P. nakara =*nagara*, rācā=*rājā*, khamma=*gharma*, kantappa=*kandarpa*.

ṇa ण becomes *na* न, ळ *la* becomes ळ *ḷa* : य *ya* remains. Intervocal consonants are not dropped. Aspirates are not reduced to *h* ; *jñ*, *ny* become *ññ* (as in Mg. and probably every other dialect at a sufficiently early stage).

Who were the speakers of this dialect? The Shāhbāzgarhī Edict agrees with this dialect in a number of particulars. The Bṛhatkathā of Guṇādhya was composed, according to the story, in Paiśācī. This work was popular in Kashmir in the 11th century. Somadeva produced one version in the Kathā-saritsāgara, and Kṣemendra a shorter one in the Bṛhatkathā-mañjarī. Some scholars have concluded that Cūlikā Paiśācī was a dialect of the North-West of India. Sir George Grierson connects it with the Dard and Kāfir languages of the Hindu Kush, including Shiṇā and the under-layer of Kashmīrī.[1]

On the other hand it is admitted that Guṇādhya was a South-Indian. The Bṛhatkathā was composed many centuries before that late literary development in Kashmir which produced Kṣemendra, Bilhaṇa, Somadeva and Kalhaṇa. ण ṇa becomes न *na*, and ळ becomes ळ ḷ are suggestive of Dravidian influence. Other features, such as the retention of medial *t*, and of *y*, are merely archaic. Surd for sonant can be paralleled in the South as well as in the North. It is a common corruption when a language is adopted by an alien race.[2] The student will remember the Welsh parson, Sir Hugh Evans, in the Merry Wives of Windsor. Speakers of Gaelic have the same tendency. Any such corrupt dialect on the fringes of Aryan speech would

[1] *Vide* the Piśāca Languages of North-Western India. R. As. Soc. Mon. Vol. VIII, 1906. The author's theory that these, mostly mixed, dialects should be provided with a separate compartment between the Iranian and Indian subdivisions of Aryan, because they combine Indian and Iranian peculiarities, is not convincing. Nor is the connection with C. Paiśācī obvious, as the main peculiarity of C.P. (surd for sonant) is *exceptional* in this area.

[2] It is quite probable that the same change in Armenian (tasn = ' ten') and Teutonic (Gothic taihun) is due to the same cause.

necessarily disappear with the continued extension of Aryan speech. So that it seems quite as possible that the original Cockscomb[1] Demons belonged to the Vindhyas as that they were Cannibals of Kashmir.[2]

Old Prākrit. The oldest Prākrit recorded is found in the **Inscriptions of Aśoka.** The Kharoṣṭhī script was used in the North-West (Śāhbāzgarhī and Mānsehrā) but all the other inscriptions, whether on rocks or on pillars, are in the oldest form of Brāhmī writing. The language used is not so uniform. There is a marked contrast between the Eastern dialect and the Western.

The Eastern dialect is found with only minor variations on the pillars in the Ganges-Jumna basin and in the rock edicts of Kālsī and Orissa.

In this dialect *ra* is represented by *la* and the Nom. sing. of masculine and neuter nouns of the *-a* declension ends in *-e* as in Māgadhī. On the other hand we have *sa* and not the palatal *śa* (but also *ṣa* at Kālsī.) This language has been called Māgadhī but Lüders claims that it is really Ardha-Māgadhī. Whatever be the best name for it, this seems to have been the language used by Aśoka and his Court. The influence of this official language shows itself in the other inscriptions of the West and North, which are evidently not in pure local dialects. Forms due to this influence are generally called *Magadhisms.*

The West is represented by the Rock Edict of **Girnār.** The language here has Nom. sing. in *-o* and neuter *-aṃ*, with *ra* and *sa*. (Magadhisms are *priye, jane* for *priyo, jano,* and *mūle* for *mūlam,* etc.) In a number of particulars it reminds us of Pali, but it is not identical with that language.

One may suppose that this Western dialect represents more or less closely the current language of Ujjain, which was the capital of an important province in the Mauryan Empire.

Inscriptions found in the South of India resemble the Western rather than the Eastern edicts, but have their own peculiarities.

The **North-Western** edicts differ from both East and West, Mānsehrā has more Magadhisms than Śāhbāzgarhī. Both have *ra*, *sa* and *śa*. Śāhb. prefers Nom. sing. *-o* neut. *-aṃ* while Mān. prefers the *-e* of (Ardha)Māgadhī. Both preserve many conjuncts with *r*, often with metathesis : *Priyadrasi* instead of *Piyadasi* ; *bhulapruva*=Girnār *bhūtapurvaṃ*=Dhauli *hūtapulavā* ; Śāhb. *trayo*=Girnār *trī* ; Śāhb. *mrugo*, Mān. *mrige*= =Girnār *mago*=Eastern *mige*.

This last example illustrates another difference between East and West. (Cf. § 60.)

Śāhbāzgarhī retains *kṣ* as in *kṣamitaviya* but at Girnār we find *chamitave* and in the East *khamitave*. (Cf. § 40.)

Conjuncts such as *pr* in *priya* which are found both in the West and the North-West, were regarded at one time as *Sanskritisms*. They are rather survivals of the old phonetics. In the modern dialects of the North-West such conjuncts still exist *e.g.*, Lahndā *tre* ' three ', cf. Sindhi *traṇ*.

When comparing the North-West forms with others it should be borne in mind that Kharoṣṭhī does not distinguish long vowels from short.

It should also be remembered that neither the Kharoṣṭhī nor the Brāhmī of Aśoka's inscriptions writes doubled consonants. Thus we have *cakavāke* not *cakkavāke, cakhudāne* not *cakkhudāne.*

The Bairāt-Bhābrā inscription now at Calcutta mentions some of Aśoka's favourite passages of Scripture. The language of this inscription has been much discussed. The forms *Lāghula* which appears as Rāhula in Pāli, and *adhigicya* (=*adhikṛtya*) cannot be paralleled in the edicts. They seem to indicate an

earlier language of the Buddhist scriptures. (See above p. 64.) The forms *Priyadasi, sarve, prāsāde,* and *abhipretam* which Hultzsch reads on this rock appear strange in a dialect which has *la* for all the single *ras.* It must be admitted that all these conjunct *ras* depend on the perception of a small dash, which is in no case very clear and is perhaps in every case nothing but a slight unevenness in the stone.

It will be seen that the division of the Aśokan dialects does not coincide with that of later Prākrits. This is not surprising. Unless several centres of literary culture maintain a continuous tradition the distribution of languages used for general purposes is likely to be different after the lapse of several centuries. Among the Prākrits used in the Drama there is nothing to represent the language of the Panjab and North-West. We have noted the claim put forward on behalf of Paiśācī Prakrit. There is evidence of another Prākrit being used by the Buddhists of the North. The fragments of a Kharosthī manuscript of the Dhammapada found near Khotan, which is known as the Dutreuil de Rhins manuscript, show certain peculiarities that are found in modern dialects of the North-West. Journal Asiatique (Senart.), 1898, p. 193. (J. Bloch.), 1912. p. 331.

Pāli. *Pāli* originally meaning a "boundary, limit, or line" was applied to the *Canon* of the Hīnayāna Buddhists. Thence it is used of the *language* of that Canon, found also in some non-canonical books : all being preserved in what were originally the missionary Churches of Ceylon, Burma and Siam. Thence again 'Pali' is sometimes applied to (*a*) the inscriptions of Aśoka, although these comprise three or four distinct dialects ; (*b*) the official court language of Aśoka's Empire, a form of Middle Indian widely understood,[1] and (*c*) 'monumental Prakrit' including all the inscriptions down to the time when Sanskrit ousted Prakrit (or "Pali").[2] The Pali language of

the Buddhist books forming a separate academic subject (a classical language appropriate to Buddhists of Burma), has not been much studied in India.   Nevertheless it is important for the study of (a) the history of Indian speech, and (b) the Old Prakrit inscriptions.

For the study of classical Pali numerous grammars, readers, texts and translations are available.[1]   Only a very general description need be given here.

Characteristics of Pali.   Pali retains more of the old grammatical system than AMg.   The ātmanepada is commoner ; Aorists, especially the S-Aorists, abound.   (The Aorist and Imperfect have fused together).   The reduplicated Perfect is rare, but occurs.   There are more survivals of the old conjugational classes, e.g., suṇoti=Ś. sunādi; karoti (Ātm. kubbate)=Ś. karedi; dadāti (also deti)=Ś. dedi.

In Phonetics the striking points are :—the sibilant is dental स, y remains, r sometimes becomes l, but not always as in Mg., n is sometimes cerebralised but not always.   Intervocal consonants generally remain, and surds are only exceptionally replaced by sonants.   Hence we have bhavati, or hoti, katheti, pucchati, gacchati, etc. : mato=*mṛtaḥ*, kato=*kṛtaḥ*.

In some words conjuncts like dr-, br- remain.

Svarabhakti is common.   Ārya becomes ayya or ariya.

From these examples it will be seen that Pali is more archaic than the Prakrits described above, with the exception of the Aśokan dialects.

The geographical basis of Pali has been disputed.   The Buddha was supposed by tradition to have preached in Māgadhī.   The Scriptures were naturally supposed by Southern Buddhists to be in the language of the Buddha.   Therefore Pali should be Māgadhī.   As a matter of fact it is not.   The Nom. Sing. in -o, the presence of sa, ra, ja show this clearly. Some regard it as the language of Ujjain, whence Mahinda,

---

the son of Aśoka, took the sacred Canon to Ceylon, others as the Aryan language of the Kaliṅga country.

Another view, finding some points of resemblance with Paiśācī (unvoicing of sonant stops), prefers some point near the Vindhyas, while others again would bring Pali to Taxila to get this colouring. Geiger returning to the tradition of Māgadhī thinks Pali may have developed from some kind of Ardha-Māgadhī, though it is not the unmixed language of any area.

If however the Pali Canon is not the oldest literary version, the argument based on tradition vanishes. Buddha's preaching and the earliest records thereof were doubtless in an Eastern speech. Afterwards they were rendered in other dialects and one of these new versions became the Pali Canon. Dr. S. K. Chatterji says that this Pali is shown by its phonology and morphology to be a Western dialect of the Midland (an old form of Śaurasenī) but retaining many relics of the original dialect. When the domination of the Mauryas declined the wide use of the Eastern official language (Ardha-Māgadhī) came to an end. It was succeeded, it would appear, in many districts by a Western *lingua franca* akin to Pali, which appears in the inscription of Khāravela.

Whatever may be the exact truth of the matter, it is clear that Pali contains several different strands in its composition and that it varies also according to its age. The oldest type is seen in the Gāthās, then come the prose portions of the Canon followed by non-canonical literature and finally still later layers. The development of Pali has been influenced by Sanskrit.

Of the **Prakrit Inscriptions** later than Aśoka many are too brief for their dialect to be classified with certainty. Khāravela's inscription at the entrance to the Hāthīgumphā Cave, usually assigned to the second century B.C., resembles the Western or Southern dialects of Aśoka's inscriptions rather than the Eastern. In many respects it resembles Pali but in others it differs from that language.

An inscription in the Jogīmārā Cave on Rāmgarh Hill appears to be in an old form of Māgadhī.

Aśvaghosha. Some fragments of palm-leaf manuscripts found in Central Asia [1] and pieced together by Prof. Lüders reveal portions of two Buddhist dramas. In one of these only Sanskrit is used, at any rate in the surviving portions. In the other play, which is ascribed to Aśvaghosha the famous Buddhist writer of Kanishka's time, more than one Prakrit has been used. The Rascal speaks a form of Māgadhī : $s > ś, r 7 l$, nom. sing. e for o. In some respects the Prakrit is more archaic than the Māgadhī of the Grammarians and the Dramas : *ahakaṃ* "I" for *hage, kiśsa* for *kiśa.* Lüders classes this as Old Māgadhī. The speech of another character, which closely resembles the dialect of the Pillar Inscriptions is thought to represent an old stage of Ardha-Māgadhī. The dialect of the Courtesan and the Jester appears to be Old Śauraseni. It retains intervocal consonants, n is not cerebralised and y does not become j.

An intermediate form of Prakrit representing a stage of development roughly half-way between Aśvaghosha and Kālidāsa, Bhavabhūti, etc. has been recognised by some scholars in the Trivandrum plays ascribed by their discoverer to **Bhāsa.** At first sight no doubt the Prakrit in these plays appears to be later than that used by Aśvaghosha and more archaic than that of the Gupta poets. If we date Bhāsa in the second or third century A.D. and if we can accept these plays as the work of Bhāsa, several points fit in quite well. [2]

Unfortunately we do not know that the plays were written by Bhāsa. We know them only from South Indian MSS. and South Indian MSS. of plays written in the seventh century and even later preserve similar features.

---

[1] They were found by Dr. von Le Coq in one of the Cave Temples of Ming Öi to the West of Kucha. They have been reproduced in facsimile and edited with a translation and notes by Prof. Lüders. *Bruchstücke Buddhistischer Dramen.* Berlin, 1911.

[2] See V. Lesný. Z.D.M.G. 1918, 203–208, and Wilhelm Printz. Bhāsa's Prakrit. Frankfurt, 1921.

The South Indian traditional spelling of Prakrit was evidently more archaic than that of the North. In the South, where the ordinary speech was Dravidian, the pronunciation of Prakrit would be less liable to change than in the North.

The archaic forms found in the Southern MSS. are of interest for the history of Prakrit, but there is no conclusive evidence so far to connect them with Bhāsa in particular or with the second century, though doubtless they have come down from a time previous to our MSS. of Kālidāsa, etc. and to the Prakrit Grammarians.

In the Trivandrum plays we find Śaurasenī and Māgadhī. Indra in the Karṇabhāra and the two warriors speak a dialect which resembles Ardha-Māgadhī.

In the Śaurasenī the chief peculiarities are: $l > l̤, j̃ñ > ñ̃ñ$ as well as $ṇṇ$ but $ny > ṇṇ$.

Late Prakrit. Apabhraṃśa. (See Ch. II, p. 6.)

For the student of philology it will be of interest to notice some of the main features of the Apabhraṃśa stage. Whereas in Old Prakrit the typical phonetic and grammatical changes are not carried so far as in Dramatic Prakrits, so naturally in this Late Prakrit such changes are carried further. When

more archaic forms occur in an Apabhraṃśa text, these may be
ordinary Prakrit words used by the author for literary purposes,
or occasionally they may retain ancient features that had
survived in local dialects outside the main current of linguistic
development. Some dialects of the " Outer Band " preserve
quite ancient features to the present day.

The following tables of typical declension and conjugation
(based on Hemacandra's account) gives only forms peculiar to
Apabhraṃśa, not those shared with the Prakrits.

Declension.

Sing.	Nom.	Acc. puttu
	(Neut.	phalu)
	Ins.	puttẽ
	Abl.	puttahẽ puttahu
	Gen.	puttassu puttahŏ puttaha
	Loc.	putti puttahĭ.
Plur	Nom.	Acc. putta (Neut. phalaĭ)
	Ins.	puttahi (ṃ)
	Abl.	puttahũ
	Gen.	puttahã
	Loc.	puttahĭ

If the oblique forms be compared it is apparent that it
needed only the blurring of the final vowels to reduce these to
one form for the singular and a nasalised form for the plural.
(See Beames, II. § 42.) The Apabhraṃśa Nom. Sing. in *u* is
seen in the Sindhi forms with a very short *u*.[1]

In the Gen. Sing. an *s* form survives in Apabhraṃśa. This
s appears in the pronominal declension of Hindi tis-kā kis kā.[2]
It occurs in the " Romani " of Gypsies in Europe, cores-kero—

---

[1] Nom. Sing. in *o* (*Rājasthānī* and Western Hindi dialects) or *ā* (Standard
Hindi and Panjabi) is derived directly or by analogy from forms in *-aka-*.
K was dropped, hence from **-ako* we get **-a-o*, Apa. *-a-u* which becomes
either *o* or *ā*.

[2] These forms have fused with the old feminine *tissā*, etc.

'of a thief.' Kashmiri has an oblique form in -s, tsuras nish—
'near a thief,' guras nish— 'near a horse,' which is used as a
dative. Marāṭhī also preserves the form in the dative.

Conjugation.

Sing. 1.	**pucchaŭ**	Plur. 1.	pucchahŭ
2.	pucchasi or -hi		**pucchahu**
3.	**pucchaï**		**pucchahī.**

This is very close to Old Hindi and not far from the modern
forms pucchŭ, pucche, puccho, pucchẽ.

Among the more striking of the phonetic innovations of
Apabhraṃśa may be mentioned the following :—

Loss of *v* before *u* : āhau for *āhava* ; sahāu for *svabhāva* ;

Loss of *m* before *u* and also before *a* : Jauṇā for *Jamunā*,
bhauhā for bhamuhā meaning *bhrū* ; duggau for *durgama* (also
duggamu).

Nasalisation of final *i* and *u* : 3. sing. suṇaĭ, bhaṇaĭ ; 2. sing.
ramahĭ ; nom. sing. bhaṇiŭ, bhamiŭ.

Intervocalic *m* becomes ṽ or *v* (written also *ṃv*): kuṽara for
kumara ; bhaṃvaṇa=*bhramaṇa* ; savaṇa=*śramaṇa* ; pavāṇa=
pramāṇa.

Shortening of vowels: vaṇijja=*vāṇijya* ; karaṇa=*kāraṇa* ;
niya=*nīta* ; piya=*pīta*.

Contraction : andhāra=*andhakāra* ; bhaṇḍāra=*bhāṇḍāgāra* ;
uṇhāla=*uṣṇakāla* ; piyāra=*piyayara=priyatara.*

Shortening double consonants (and lengthening vowels) :
sahāsa for sahassa=*sahasra* ; bhavīsa for bhavissa=*bhaviṣya.*

Noun stems are frequently extended by adding -*a*, -(*a*)*ḍa*,
ulla. These suffixes are found in earlier Prakrit but not so
frequently. Thus we have in Prakrit -*āla, -ālu, -illa, -ulla,*
in the sense of -*mat, -vat* or of place ' belonging to.'

Examples. -*āla* : M. sihāla for *śikhāvat* ; AMg. saddāla for
śabdavat ; dhaṇāla for *dhanavat.*   -*āla + ka* : AMg. mahālaya for
mahat.

-*ālu* : niddālu=*nidrālu.*   (This suffix appears in Sanskrit.)

-*illa* (common in M. JM. AMg.) M. kesarilla, kandalilla, tūlilla,

ṇeurilla. AMg. niyaḍilla=*nikṛtimat*; māilla=*māyāvin*; bhāillaga
=*bhāgin*; goilla=*gomat*; kaṇailla 'parrot' from *deśī* kaṇa;
bāhirilla 'external'; M. AMg. gāmilla 'peasant'; AMg. JM.
puvvilla 'previous.'

-*ulla* is rarer in Prakrit: dappulla= -*darpin*.

Other adjectival suffixes are -*alla* (for -*ala*) and -*ira*. M.
AMg. mahalla=*mahat*; navalla=*nava*; bhamira 'wandering';
lambira 'hanging'; hasira 'laughing.'

Without change of meaning -*ka* and -*ḍa* (Sanskrit -*ṭa*.)
desaḍaa=*deśa*; dosaḍa=*doṣa*; raṇṇaḍaa=*araṇya*.

These two become very common in Apabhraṃśa.

In general it may be said that the Apabhraṃśa forms, when-
ever these can be ascertained, should be taken as the starting
point for the derivation of words in the modern languages and
the comparative study of their phonology.[1] Thus to derive
Hindi *pahlā* "first" we should start from an Apabhraṃśa
form *pahilaü* rather than from *prathamaḥ* or paḍhamo.[2]

According to the older grammarians the three varieties of
Apabhraṃśa, that is literary Apabhraṃśa, were Vrācaṭa,
Nāgara and Upanāgara. Jacobi has shown [3] that **Vrācaṭa**
or **Vrācaḍa** is the oldest of the three. Grammarians of the
17th century say it belongs to Sindh. It appears to be the
same as *Ābhīrī bhāṣā*, the language of the Ābhīras (modern
Ahīrs). The name Vrācaṭa Jacobi derives from *vraja* 'herds-
men's station' and compares the similar name of a Hindi
literary language Braj Bhākhā. The chief peculiarity of this
Apabhraṃśa was the maintenance or addition of *r* after
consonants and the maintenance of *ṛ*.

Nāgara ('urban') Apabhraṃśa seems to have been a more
polished and sophisticated medium, distinguished from the

rougher herdsmen's dialect and from the less cultivated Upanāgara and Grāmya. This is the Apabhraṃśa which Hemacandra describes and illustrates. Two varieties of it differing somewhat from Hemacandra's Nāgara are described by Jacobi. One of these is represented by the Nemināhacariu of Haribhadra written 1159, A.D. at Anahilla-Pāṭaka, the Gurjara capital. The language may be called "Gurjara Apabhraṃśa" and seems to have been preferred by the Śvetāmbara Jains. The Bhavisattakaha of Dhanavāla, which may be older and is written in a more popular style with less Prakrit and less ornament, is in another form of Nāgara Apabhraṃśa, which Jacobi calls "Northern." It may have been preferred by the Digambara Jains. The differences in the grammar lie mainly in the vowels used in the declension of the noun.

The term Apabhraṃśa as used by the older grammarians and poets seems to have connoted literary dialects like Nāgara, which may have arisen in a particular centre, but which came to be used over a much wider area. Apabhraṃśa in this sense belonged to the West of India, the region now occupied by Gujarātī, Sindhī and Mārwārī, but might be imitated elsewhere. The term was also used, at any rate later, for various local speeches, or *deśa-bhāṣā*. In this sense there were various forms of Śaurasenī Apabhraṃśa actually spoken in the districts round Muttra when Śaurasenī Prakrit had become a literary language. Similarly in the Māgadhī and Māhārāṣṭrī areas there should have been Māgadhī and Māhārāṣṭrī Apabhraṃśas. Unless, however, the differences were clearly marked they would hardly be noticed and ordinarily nothing would be recorded of a dialect that had produced no literature.

A number of *vibhāṣās* are mentioned by Bharata as suitable for certain characters in plays, including Śākārī (based on Māgadhī), Cāṇḍālī, Śābarī, Ābhīrī and Ṭākkī.[1]

Mārkaṇḍeya gives some details about these and mentions a list of twenty-seven including Drāviḍa. Drāviḍa here seems to

mean not a Dravidian language such as Tamil, but the corrupt form of late Indo-Aryan spoken in the Tamil country.[1] Rāmatarkavāgīśa gives some notes on these *vibhāṣās* such as Pāñcālī, Mālavī, Madhyadeśīyā, etc. These all seem to have been local variations of the Apabhraṃśa in general use, that is of the literary Apabhraṃśa of the West rather than independent local dialects. In the development of Marāthī and of Bengali from the Māhārāṣṭrī and Māgadhī Prakrits no Apabhraṃśa stage has been recorded. The older *vibhāṣās* would have been local (or tribal) variants of a recognised Prakrit rather than the records of a mediaeval Linguistic Survey. Consequently though we may attempt to classify elements in them we cannot locate these varieties in a family tree of the Indo-Aryan languages.

CHAPTER XI.

PRAKRIT LITERATURE.

The earliest recorded Prakrit is in **Aśoka's Inscriptions** of the third century B.C. There were Buddhist scriptures before that. As we have seen, Aśoka quotes a few titles of his favourite passages. The form in which he quotes them indicate that those scriptures were not yet in the Pali of the Canon, as known to the Church of the Little Vehicle in Burma and Ceylon. We cannot date any Pali text as certainly older than Aśoka.

Inscriptions do not usually figure in an account of literature. If, however, Aśoka's edicts had been preserved in a manuscript copy they would obviously be taken into account as the earliest dated documents of Prakrit literature. Of the dialects used and their variations something has already been said. The style is

of interest for the history of prose. Free of all ornament they express the sincerity and earnestness of the Emperor. It is reasonable to suppose that they were drafted by the royal hand for there is no trace of the habitual flattery of the courtier or scribe.

The style has been compared with that of the famous Rock Inscription of Darius the Great. It is quite possible that the idea of engraving the deeds of the Great King on solid rock had come from Persia. That the Old Persian language was well enough known in the court at Pāṭaliputra to influence the phrasing of Aśoka's edicts is an interesting suggestion, that is far from being proved. In any case there is a vast difference in the outlook of the two series. Darius rejoices in the defeat of his opponents by the aid of Ahuramazda and in the establishment of his wide Empire. Aśoka almost repents of his conquest of Kaliṅga. His main purpose is to promote Dhamma, the moral law or "law of piety," far and wide. He recounts the measures he has taken and issues orders in that behalf. Incidentally some light is thrown on the organisation of the Mauryan Empire and the nature of the public works carried out by a benevolent ruler of that period.

Some of Aśoka's measures however must be regarded as peculiar to himself. In their simplicity the Edicts possess a dignity of their own, which is missing in the flowery panegyrics of later times.

Taking Prakrit literature in the wide sense, we must assign the most important place to **Pali**. Its claim to this place is due not only to its antiquity, but also to the inherent worth and historical interest of the early Buddhist literature. Of all the Indian religions, Buddhism has had the profoundest effect on Asia as a whole. The Pali **Tipiṭaka** or "Triple Casket" contains the oldest surviving scriptures of that religion. Moreover from the Pali books we get incidentally a view of Indian life, that serves to supplement the more pedantic outlook of the orthodox priesthood and the romances of the bards.

6

Every student of Indian History should at least read some of the **Jātakas** or Birth Stories of the Buddha.[1] Representations of these stories and scenes from the life of the Buddha occur continually on the sculptured panels of Buddhist *stūpas* and *vihāras*. Indeed without a knowledge of the outlines of the Buddhist doctrine, and some comprehension of the lives of Buddhists, lay and cleric, as revealed by these old scriptures, the student cannot really grasp what was one of the dominant factors in Indian History for more than a thousand years after the Founder's death. The student of Indian Philosophy will find that acute reasoning and bold speculation were not confined to the orthodox schools of thought, but also found among the Bauddhas.

History is represented by the versified monkish chronicles contained in the **Mahāvaṃsa** dealing with the early history of Ceylon.

The term Prakrit Literature however does not ordinarily include Pali Literature. If Pali works be excluded, then the greater part of the whole of Prakrit Literature is made up of **Jain Literature.** This, as we have seen, is found in three distinct Prakrits.

Ardha-Māgadhī is the language of the oldest Jain books, which form the Canon of the **Śvetâmbara** sect. This canon comprises 45 *āgamas* including eleven *aṅgas* and twelve *upâṅgas*. These are sometimes spoken of under their Prakrit names and sometimes uuder the Sanskrit equivalents, e.g.,

1st Aṅga.	Āyāraṅga-suttaṃ	$=\bar{A}c\bar{a}r\hat{a}nga$-*sūtram*.

the work is given as 980 years after the entrance to *nirvāṇa* of the Founder of Jainism, i.e., A.D. 454 (or possibly A.D. 514).

The older books, called *Pūrvas*, on which this redaction was based, have completely disappeared. Thus the collection contains materials of different centuries mixed together, so that it is difficult to distinguish them. Some portions are ascribed to Bhadrabāhu (about 300 B.C.). One such work is the **Kappa-suttaṃ**[1] (*Kalpa-sūtram*) which contains a life of Mahāvīra. This apparently is not really older than the 5th century A.D.

The style of the oldest prose books is diffuse, delighting in elaborate descriptions and endless repetitions. Their chief interest to the general student lies in their incidental references to facts and circumstances of the ordinary everyday life in India.

The oldest *Kāvya* work in Jain literature is the Paümacariÿa, which gives a version of the Rāmāyaṇa. It dates perhaps from the 3rd century A.D.[2]

In **Jain Māhārāṣṭrī** there are non-canonical books of the Śvetâmbaras, consisting mainly of collections of stories : stories from the lives of famous saints, and narratives of the conversion of various people to the Jain religion. The Śvetâmbara literature has as yet been only partially explored by modern scholars, and much material both for philology and for history awaits scientific treatment. Even less known are the works of the **Digambara** sect in **Jain Śauraseni**. Bhandarkar has published extracts from the Pavaÿaṇa-sāra of Kundakund-âcārya and the Kattigeÿânupĕkkhā of Kārttikeyasvāmin, both of which are in verse.

Jain literature is neither so famous, nor so widely studied as the Pali Buddhist literature. Much of it is still in manuscript, or in uncritical editions. Much of it again is difficult without (and even with) a commentary.

[2] It contains a number of vulgarisms, which foreshadow the Apabhraṃśa stage.

Apart from the Jain Canon the early literary development of Ardhamāgadhī has been deduced from its occurrence in certain inscriptions, and in fragments of plays [1] ascribed to Aśvaghoṣa or his contemporaries. Jain Māhārāṣṭrī is found in the Kakkuka inscription.

For the purposes of **Kāvya** however the most important Prakrit was from an early date **Māhārāṣṭrī**.[2] This was the language of the Prakrit Epics and Lyrics, and formed the starting point for Prakrit Grammarians.

Most famous of the Epics is the **Setubandha**, a work of such excellent technique, that it has often been ascribed to Kālidāsa. The poem, which is called in Prakrit *Rāvaṇavaho* or *Dahamuhavaho*, relates the story of Rāma, but is supposed to commemorate the building of a bridge of boats in Srinagar by Pravarasena, king of Kashmir.[3]

The **Gaüḍavaho** celebrates the conquest of Bengal by Yaśovarman of Kanauj about the end of the seventh century A.D. Its author's name was **Bappaïrāa** (= *Vākpatirāja*) possibly a *nom de plume*. The same author composed another Epic *Mahumahaviaa* of which only one or two verses have been preserved.

The Rāvaṇavaho and the Gaüḍavaho have both been much influenced by Sanskrit models, and delight in long compounds.

The last eight cantos of Hemacandra's *Dvyāśraya-Mahākāvyam* form a small Prakrit Epic entitled *Kumārapālacarita* describing

[2] Jacobi (Selected Narratives, Introd., 1886) suggested the 4th century A.D. as about the time when M. attained this position. Early inscriptions of M. country are of the Pali type: the latest of these (showing some instances of elision of single intervocal consonants) date from 150 and 200 A.D. The Jain Canon according to tradition was written down in 454 A.D. Its language [AMg.] was influenced by M. [Pischel denies this]. Daṇḍin praises the Setubandha.

the deeds of Kumārapāla of Aṇhilvāḍa in Gujarat. The object of these cantos, as of the whole work, is to illustrate the rules of the author's compendious Sanskrit and Prakrit grammar called Siddha-Hemacandra.

The most important work for the study of Māhārāṣṭrī is the **Sattasaī** (*Saptaśatakam*) of **Hāla**. This is an anthology comprising verses by many poets. One commentary gives 112 names, another, that of Bhuvanapāla, gives 384. The various recensions differ very much in the distribution of the verses, and probably few can now be definitely assigned to their authors. The collection is evidence of the immense amount of Māhārāṣṭrī poetry that must have been composed, but not preserved. Besides *Hāla* who is identified with *Sātavāhana* (spelled variously Śālivāhana, etc.) there are a few names known from other sources. *Hariuḍḍha, Nandiuḍḍha* and *Poṭṭisa* are mentioned in Rājaśekhara's Karpūramañjarī, Act I, p. 19,2. The Vidūṣaka says, "tā ujjuaṃ jeva kiṃ ṇa bhaṇīadi : amhāṇaṃ cediā Hariuḍḍha-Nandiuḍḍha-Poṭṭisa-Hāla-ppahudīṇaṃ pi purado sukaī tti."[1]

The date of this anthology has not been determined. Weber put it in the 3rd century at earliest, but earlier than the 7th century. Macdonell says, the poet Hāla probably lived before 1000 A.D. Some confusion has been caused by the identification of this Hāla-Sātavāhana with the 17th king of the Andhra dynasty (68 A.D.).[2] Jacobi on the other hand identified him with the Sātavāhana, king of Pratiṣṭhāna, who induced the Jains to change their Church Calendar in 467 A.D.

There can be no doubt that this anthology, including lyric poets well known in the time of Rājaśekhara, was not put

together in the 1st century A.D.[1] when we should rather expect early Prakrit of the Pali stage. The introductory verses of the Sattasaī rather suggest that these love lyrics of the South were not so universally on the lips of men as they had formerly been.

Another anthology of similar material is the **Jaavallaham** or Vajjālagga of Jayavallabha a Śvetâmbara Jain. It contains some 700 verses. Some of these are common to Hāla's collection.

Dramatic Prakrits. The ordinary use of three Prakrits (M. Ś. Mg.) in Sanskrit plays is familiar to every student of Sanskrit. The authorities however differ as to the precise allotment of the Prakrits among the rôles. The Mrcchakaṭikam is one of the richest in its variety of Prakrit dialects.

The Hero of course, and male characters of similar standing, except the Vidūṣaka, speak and sing in Sanskrit. It is exceptional for a woman to speak Sanskrit, but the Nun in Mālatīmādhavam does so. A purely Prakrit play in which even the Hero speaks Prakrit is also exceptional. A well-known instance is the Camphor-cluster.

The author however thinks it well to explain why no Sanskrit has been used. In the Prologue the Stagemanager reflects, "Then why has the poet abandoned the Sanskrit language and undertaken a composition in Prakrit?" His assistant replies in Māhārāṣṭrī—

" parusā Sakkaabandhā Pāua-bandho vi hoï suumāro ǀ

" purisa-mahilānaṃ jettiam ihantaraṃ tettiam imāṇaṃ ǁ

"Sanskrit poems are harsh : but a Prakrit poem is very smooth : the difference between them in this respect is as great as that between man and woman." ·

Śaurasenī is the ordinary prose language of ladies and of the

[1] Vincent Smith has evidently given too much weight to his " latest leading authority, on the relations between the vernacular language and the ' classical ' or ' secondary ' Sanskrit," i.e., Professor O. Franke's "Pali and Sanskrit," 1902. This is a book of some ingenuity, but little historical judgment.

jester. Māhārāṣṭrī is the corresponding verse dialect. Māgadhī is used by menials, dwarfs, foreigners and the like, e.g., the two policemen and the fisherman in Śakuntalā. It is also spoken by Jain monks and small boys.[1] MSS. and texts often assign the dialects contrary to the rules of Poetics and the statements of commentators. They also confuse the dialects, so that Māgadhī appears almost the same as Śauraseni.

This mixture of languages in the Indian Drama has been much discussed, and various explanations suggested.

There is no exact parallel to the Indian usage. Comedy has always made fun of the speech of foreigners. Aristophanes brings in the Thracian barbarian Triballos, who speaks a jargon with a vague resemblance to Greek. The Phoenician tongue was parodied in Latin comedy, though the readings are too corrupt for much to be made of it now. Shakespeare's Welshmen and Frenchmen are familiar. Again the vulgar speech of common people, as opposed to the language of the educated, has always found its way on to the comic stage. Dialect also, in a more or less conventional form, has appeared even in serious plays from Shakespeare's time onwards. Moreover in Greek Tragedy we have the chorus singing in a dialect different to the general language of the play. The Doric chorus

[1] The following note of characters supposed to speak Māgadhī as recorded by Pischel (§23) may be useful to students of the Drama.

Mṛcchakaṭikam : Śakāra, his servant Sthāvaraka, the shampooer-Kumbhīlaka, Vardhamānaka, the two Cāṇḍālas and Rohasena. *Śakuntalā* : Fisherman and two policemen; Sarvadamana, Śakuntalā's young son. *Prabodhacandrodaya* : the Cārvāka's pupil and the messenger from Orissa. *Mudrārākṣasa* ; servant, Jain monk, messenger, Siddhārthaka and Samiddhārthaka while they appear as Cāṇḍālas. *Lalita-vigraharāja* : the bards and the spy (who also speaks Ś.). [Otherwise Turuṣka captives and spy. The Indian spy speakes Ś.]. *Veṇīsaṃhāra* : the Rākṣasa and his wife. *Mallikāmārutam* : elephant-keepers. *Nāgānanda* : servants. *Caitanyacandrodaya* : servants. *Caṇḍakauśikam* : Cāṇḍālas and Rascal. *Dhūrtasamāgama* : barber. *Hāsyārṇava* : Sādhuhiṃsaka. *Laṭakamelaka* : Digambara Jain. *Kaṃsavadha* : the Hunchback. *Amṛtodaya* : Jain monk.

in the Attic play, like other lyric poetry, is in a *conventional* dialect, a literary poetic language based on the Doric dialects,[1] in fact what in India would be called a (literary) Prakit.

The Indian usage however differs from all these partial parallels. In the first place we may find four, and regularly three, different dialects used in the same household, nay by members of the same family; secondly, one of these is a learned ('dead') language belonging to a previous stage of linguistic development; thirdly, dialects purporting to represent widely distant areas are combined in a single play, and assigned to particular characters without any obvious reason; and finally, the practice has been reduced to definite rules.

The systematisation of the Dramatic Prakrits is not surprising. Everything else about the Drama has been classified and codified, from the virtues of the various sorts of Hero to the 'faults' in the endless kinds of poetic ornament. The making of minute rules seems to have characteristic of the Brahman in all ages.

Explanations of this Sanskrit-Prakrit Drama may follow two or three different lines. One line is the **Realistic :** namely that the conversations in the plays represent the actual conditions of Indian life in say the Gupta period. Grierson writes: "In India there is nothing extraordinary in such a polyglot medley. It is paralleled by the conditions of any large house in Bengal at the present day, in which there are people from every part of India each of whom speaks his own language and is understood by the others, though none of them attempts to speak what is not his mother tongue."[2]   Beames suggested a similar explanation.[3]   Of course it is admitted that the dialects are conventional in form, not faithful copies of spoken vernacular,

also that the assignment of a particular dialect to a particular
sort of menial may have been more or *less* true to fact. Again,
granted that educated men could speak Sanskrit and that
ladies generally could not, it is not to be supposed that the
men could speak nothing but Sanskrit, and habitually addressed
not only their wives but even their grooms in that language.

The well-educated man was able to speak Sanskrit. The
hero therefore spoke Sanskrit, and by a stage convention
spoke it always, just as stage kings almost always, and real
kings rarely, wear a crown.

Of course this explanation implies that the form of the classic
drama was fixed in the Śauraseni country. Another line must
be adopted to explain the use of Māhārāṣṭrī in verse. This
is clearly a case of Literary convention. A school of lyric
poetry developed in the South and became famous far beyond
the borders of the Great Kingdom. Māhārāṣṭrī verses were
doubtless sung throughout India as Persian verses still are.
It was natural to regard this dialect as the only appropriate
one for Prakrit songs.

It is more difficult to account for the use for the other dialects
along this line.[1] The solution of the problem is obviously
bound up with the history of the origin and development of
the Indian drama. Of this we have little direct knowledge.
Opinions have differed as to whether richness in Prakrit, as in
the case of the Mṛcchakaṭikam, is a sign of early or of late
date. Again some authorities believe in an original Prakrit
drama to which Sanskrit was added later.

A Prakrit origin has been proposed not only for the Drama,
but also for the Epic and Purāṇas,[2] that the Bṛhatkathā was

[1] Sylvain Lévi—Le Théatre Indien (1890), p. 331, suggested that the
use of Śauraseni was connected with the development of the Krishṇa cult
at Mathurā, the capital of the Śūrasena country. The use of Māgadhī
he would regard as a legacy from the ancient *Māgadhas,* the bards of

p. 253. Compare also the theories of the origin of the Pañcatantra

composed in Paiśācī Prākrit is recorded by literary tradition (*vide* p. 79 above). The evidence for Prakrit originals of the Mahābhārata and Purāṇas consists in small points of grammar and metre considered to point to *translation* from Prakrit. The question cannot be discussed here. It should be remembered however that all poetry and verse, that has had a *popular* origin, must have existed (in some form however indefinite and fluctuating) in the popular speech before it was crystallised in Sanskrit. If the poem be old enough, the original must have been current in Primary Prakrit, not in Middle Indian. Primary Prakrit would not be identical with the "Sanskrit" of Pāṇini but it would bear a strong family resemblance thereto. Progressive Sanskritising at a later period, acting unevenly on various portions of the work, would produce much the sort of phenomenon we actually find in the Epic Dialect. Such a Sanskritisation of Primary Prakrit is very different in its significance from translation out of a Middle Indian Prakrit into the Classical Sanskrit.

A special section of Prakrit Literature is formed by the **Prakrit Grammars.**

The oldest authority is the *Bhāratīyanāṭyaśāstra* which gives only a short description of Prakrit grammar in verses 6–23 of Chapter 17. Chapter 32 contains examples in Prakrit. Unfortunately the text of this work is so corrupt, that little use can be made of it.

There seems to be no good authority for ascribing to Pāṇini a grammar called *Prākṛtalakṣaṇa*. The oldest Prakrit grammar extant is the **Prākṛtaprakāśa** of **Vararuci Kātyāyana,** who has been identified with the author of the *Vārttikas* on Pāṇini.[1] The oldest commentary on the *Prākṛta-prakāśa* is the Manoramā of Bhāmaha. With this commentary the work has been edited

and translated by Cowell. (See Bibliography.) In Chapter X on Paiśācī Bhāmaha gives two short quotations which may be from the lost Bṛhatkathā.[1]

Caṇḍa in his **Prākṛtalakṣaṇa** deals with M. and the Jain Prākrits (AMg. JM. JŚ.) together. The arrangement of the work shows it is comparatively ancient.

The most important of the Prakrit grammars is that of **Hemacandra** of Gujarat (1088–1172 A.D.).

This forms the eighth chapter of his Siddha-Hemacandra, the first seven chapters of which deal with Sanskrit grammar. The same author compiled a Deśīnāmamālā.

Other grammars are :—The last chapter of the *Saṃkṣipta-sāra* of *Kramadīśvara* ; this follows Vararuci and is of little value. *Prākṛtavyākaraṇa* of *Trivikramadeva* (about 13th century) follows Hemacandra.

Prākṛtasarvasvam of *Mārkaṇḍeya Kavīndra* who lived in Orissa in the reign of a Mukundadeva (perhaps 17th century).

Prākṛtakalpataru of Rāmatarkavāgīśa and many others of less importance.

Isolated verses in **Apabhraṃśa** occur in Jain works, in treatises on poetics and in late collections of stories like the Seventy Tales of a Parrot and the Twenty-five Tales of the Vampire. More remarkable is the inclusion by many MSS. of Apabhraṃśa verses in the 4th Act of the Vikramôrvaśīyam to be recited by King Purūravas.[2] Another source of Late Prakrit or Apabhraṃśa verses is the Prākṛta-Paiṅgalam, a work on metre of the fourteenth century or later.[3] The language is so late that Jacobi questions its right to be called Apabhraṃśa.

[2] S.P. Pandit (Bombay Sanskrit Series) omits them as spurious. His reasons for doing so have been disputed, but they are now generally regarded as later additions.

[3] Edited by C. M. Ghosh in the Bibliotheca Indica, with commentaries, various readings and glossary.

It is almost to be classed with the old forms of the modern vernaculars.

The most important Apabhraṃśa work now available is the **Bhavisattakaha** of **Dhaṇavāla**.[1] This describes the adventures of a merchant's son Bhavisyadatta, his travels abroad and the part he took in the war between Kurujāṅgala and Potana, which last Jacobi thinks may be Taxila. Then comes the history of the chief characters in former and later births.

I will avoid her line of vision and find out what she is up to. What? drawn the master, Bravo, Sāariā bravo! Of course a swan does not delight in ought but a lotus-pool.

Sā : I have drawn him, but my sight is drowned in falling tears and cannot see him. What Susaṅgadā? Sit down here my dear Susaṅgadā.

Susan : Who is this you have painted ?

Sā : The Revered Lord of Love, whose great Festival it is.

Susan : Ah, how clever you are ! But the picture seems rather empty. So I will paint in Rati at his side.

Sā : Why have you drawn *me* there ?

Susan : My dear, why are you angry without any reason ? I have drawn a Rati to match your God of Love ! So, dissembler, away with circumlocution, and tell me all about it.

Sā : So she has found me out—the dear !

My dear, I am much ashamed. So do take care that nobody else comes to know of it.

Susan : My dear, there's nothing to be ashamed of.

Śaurasenī.   **Extract No. 3.**

This extract is taken from the Bengal recension edited by Pischel (1877) p. 29. (Act II, beginning.) A comparison with usual or "Devanāgarī" version will show that considerable liberties must have been taken with the original text. Here the king carries a bow in his hand and wears a garland of

forest flowers, in the other version he is attended by **Javanīhiṃ** 'with Yavana women' who carry the bows and wear the flowers. There the king passes a sleepless night thinking of his beloved, here it is the Vidūṣaka who cannot sleep though worrying about his return—to luxury!

The Vidūṣaka in the second act of Śakuntalā describes his troubles as companion to a sportive monarch.

being mixed with leaves. Meals at ungodly hours, and nothing
to eat but meat, burning hot ! Even during the night it is im-
possible to get proper sleep for the noise the horses and
elephants make. At earliest dawn the rascally[8] fowlers wake
me with the earsplitting din of a forest drive.[9] And with all

Śak: (*Aside*) When such love has so changed, what use is there in bringing it to mind? Yet it is for me to clear myself. Well, I will try. (*Aloud*) My sweet lord! (*Breaks off*) Nay this address may now be questioned. Scion of the Purus! It is meet forsooth for thee after union with me at that time in the hermitage, after a solemn pledge to me, that am open-hearted through good nature, now to repulse me with such words as these.

hence your attitude, then I will remove your doubts with a token—alas! there is no ring on my finger.

Gautamī: Why, your ring must have slipped off when you were worshipping the water at Śacī's tīrtha in Śakrâvatāra.

Śak: In this indeed Fate shows its power! I will tell you another thing.—One day then in the Cane Bower some water lying in a lotus-leaf cup was resting in your hand—at that moment my fosterling, the fawn came up. Then you coaxed it gently that it should drink first. But it would not come to drink the water from your hand, as you were a stranger. Afterwards when I took that very water it gained confidence. Then you laughed and said—"Truly, everything trusts its kin, and both of you are forest-born."

Caitiff! You look at all this in the light of your own conscience. What other could resemble you airing the garb of virtue, but all the while like a hidden well in the grass?

Very well! Now am I become a wanton, who through trust in this race of Puru sought refuge with a man of honey-lips and a heart of stone.

Karpūra-mañjarī.   Act. IV.[1]

The Heroine "Camphor Blossom" has been shut up in a room in the Queen's section of the palace, but there is a subterranean passage from this room to the palace-garden. The Queen has had the garden end of this passage closed up.

Sārangikā enters to the King and Jester with a message from the Queen.

Amia=*amṛta*. pāüa, Śaur. pāüda, § 12. kavvaṃ § 50. paḍhiuṃ, 'to read,' H. parh. souṃ " to hear." āṇanti, 'know' § 131. tatta-tantiṃ. This is the reading in the Kāvyamālā, which represents it by *tattva-cintām* in the Sanskrit version, in accordance with Gaṅgādhara Bhaṭṭa's commentary, which adds, however, *tantravārtāṃ vā*. Weber (1870) finding the reading taṃttatamttiṃ conjectured *tantratantrīm*. In his edition (1881) he read on the authority of other MSS. tattatattiṃ (=*-taptiṃ*). We may translate it either—'practise the mysteries of love;' or 'take thought on the principles of love,' i.e. on the principles laid down in the Kāmaśāstra. kaha= kahaṃ, 'how.'

Verse 3. Satta saāiṃ [1] kaï-vacchaleṇa koḍīa majjhaārammi ı

"The Seven Centuries of embellished verses were arranged from among a *crore* by Hāla devoted to the poets."

attā cf. attiā in Mṛcch. (p. 110). Commentators "mother-in-
law." Apparently used to any elder lady in the household,
mother, elder-sister, etc. lua, 'cut' (=*luta for lūna). vāḍi,
'garden' (=vāṭī). cf. H. bārā (vāṭa + ka-).

"Oh mother! so the mass of lotuses that was so delightful
and the ornament of our village, the cold has made like a
garden of cut sesamum."

Thus the lady gives a hint to a lover. As to her precise
meaning the paṇḍits differed. Some said the lotus-tank was
to replace the sesamum garden as a meeting place, as people
would be going and coming to harvest the sesamum. The
frost-bitten lotuses would be deserted. Another view was,
that neither place was suitable.

"Skilled in the work of destruction," i.e. in love's magic.
jhūrasu, 'be angry,' √jvar or jūr, 'get hot' (because the fire
does not burn). dhūmāi=*dhūmāyate*. The denominative -*āya*-
becomes -āa-, so Mg. cilāadi=*cirāyati*, Ś. sīdalāadi=*śītalāyati*;
this -āa- often contracts to -ā- in M., etc. pajjalaï 'blazes'

mouth, fragrant as red pāṭalas he will only smoke and not
burst into flame, for then thou wouldst blow no more.

Khavio vānaraloo dūraṭṭhia-virala-pavvaaṃ mahi-vedhaṃ, ṇa a dīsaï seu-vaho, mā hu ṇamejja guruaṃ puṇo Rāma-dhaṇuṃ.

Khavio 'exhausted' (*kṣap* caus. of *kṣi*). pavvaa 'mountain.' mahi 'earth.' vedha=*veṣṭa* 'enclosure' § 38, cf. M. vedhia, Śaur. vedhida, Comm. gives the meaning as *mahī-pṛṣṭham*. dīsaï= *dṛśyate*. -vaho= -*patho*. ṇamejja, opt. 3rd person sing. or plur.

The Comm. is uncertain whether -dhaṇuṃ is nom. or acc.

(*a*) Nom. then neuter, 'may Rāma's bow not bend,'

(*b*) Acc. 'let not him (i.e. Rama) bend Rāma's bow.' Comm. suggests *namayata* but ṇamejja is not 2nd person plural.

"The monkey-people are exhausted, the surface of the earth has mountains left, but few and far between, yet the mole of the Bridge is not in sight, so let not Rāma's bow bend [1] heavily again.

also cea. (caiva cf. ṇeya=naiva). vīhatthaṃ=bībhatsam. sa-
hiaṃ 'endured.'

'Though frightful in its onset the end of sorrow is not so
terrible, if I can view a sight loathsome to women and endure

Sītā not knowing that the vision is unreal, marvels that she
should continue to exist. The commentary takes mahilā-

dacchāmi 'I shall see,' also dacchimi and daccham ; Śaur.
uses pekkhissam. kaha vi=*katham api,* kaham is commoner.
Final anusvāra in pronouns and adverbs tends to be optional.
So maham=maha. esa=eso. esa is used freely, according to
Hemacandra, for all genders. sa on the other hand is rare.

"In separation from thee my life was barely stayed by the

common in M. paī=*patih.* hohii "will be." 'tā=Vedic *tāt.*
nīsāmannam=*nihsāmānyam.* uatthia (*upa+sthā*). vehavvam
'widowhood.'

"Now that thou hast gone to the other world, and I may see thee with joy though only through tribulation, in place of that joy my heart burns, not to have seen the slaying of the Ten-Headed demon."

rumbhai means *ruṇaddhi* (*rudh* forms rundhaï); this is from
a root *rubh, analogous to libbhaï=*lihyate* from a root *libh
(Pischel §§ 266, 507). ṇavari " thereupon," some say from
na pare, Pischel disputes this (§ 184) : cf. ṇavaraṃ "only."

  uggāhihi ' will sing.'   gaṇeūṇa ' counting.' gerund. ṇiattihii.

bharaï; *mbharai *mharai=*smarati* Śaur. sumaredi, sumaria.
kahaṃ ' story.'

above, Pischel's objection (§ 184) to the derivation from *na

'policeman,' Jacobi (for this passage) 'nightwatchman,' 'beggar', (Probably slang), *laghu-mṛgo* (?) and *nāpitaḥ* 'barber.' adda 'damp' (*ārdra*). avaleva 'ointment, (*ava+lip*). litta 'smeared.' vaṇa 'wound' (*vraṇa*). -paṭṭa 'bandage' whence *paṭṭikā* modern paṭṭī. This context suggests that duṭṭhagaṇḍo is bahuvrīhi and means 'one with a bad boil.' The trick is still familiar enough.

[4] cakkamai 'goes in circles,' 'wanders.' pāeṇa 'with his foot.' Kilimmanto pres. part. kilimmai 'gets weary' (*klam*).

[5] khattaṃ 'hole.' -jāya (*jāta*) "quantity." -saṇṇihie 'in the vicinity' (*saṃ+nidhā*). egadesa "portion," cf. § 11.

Maṇḍio.

In the town Bernātaḍa there lived a beggar named Maṇḍio
addicted to taking other people's property. He used to practise
the beggar's art on the high-road, tied up in bandages, with
a smear of grease, kept always wet, about his knee, to show
that he suffered from a virulent sore. Mouching wearily
around with his foot supported on a crutch he wandered at
random. And at night he would dig a hole (in a wall) and
taking a lot of property—to a cellar [6] in a corner of a garden
near the town—would bury it there. And there lived his
unmarried sister. In the middle of that cellar, there was a
well. Anybody the thief brought with him to carry his loot,
having allured him therewith, the sister would have sit down
on a seat previously arranged at the edge of the spring, and
then, taking hold of his feet on the pretence of washing them,
she would tip him into the well. And so he perished. Thus
time went on while he robbed the town. The thief-catchers
were unable to catch him, and a great noise about it arose in
the town.

Now Mūladeva had become king there in the manner re-
lated above. The citizens told him about the thief ; that a

certain thief had been for some time robbing the town, and
that nobody had succeeded in catching him—so he should
devise some remedy. Thereupon he appoints another superin-
tendent of the town police. He also is unable to catch the
thief. Then Mūladeva himself put on a dark cloak and went
out one night. Mūladeva goes and lies down *incognito* in a
certain hall and stays there. The thief Maṇḍio comes and
says, ' Who is it stopping here ? ' Mūladeva said, ' I am a
pilgrim.' The other said, ' Come I will make a man of you.'
Mūladeva got up. A hole was cut in a certain rich man's
house. He took out a great quantity of plunder and piled
it up on Mūladeva. They set out for the outskirts of the
town. Mūladeva goes in front, the thief comes up behind
with a drawn sword. They came to the cellar. The thief set
to work to bury the loot, and he said to his sister, ' Wash
the feet of this guest '; she set him on the seat placed on the
edge of the well, and took hold of one of his feet as if to wash
it, meaning to shove him into the well. As his feet were very
delicate she perceived that this was some one who had enjoyed
royalty and had sensitive limbs. She took pity on him, and
made a sign on the surface of his foot. " Flee, lest you be
slain." After that he made his escape. She raised a cry—
" He's fled, he's fled," and the other drew his sword and
pursued him down the road. Mūladeva finding he was very
close to him on the highway, stood hidden behind a *liṅgam* in
a square. The thief mistook this Śiva's *liṅgam* for a man,
split it in two with his heron-bill sword, and went back to his
cellar. He stayed there till the night grew light ; and then he
came out and went abroad. He plays the beggar in the mar-
ket-place. The king sent men to summon him. He thought
to himself, " so that fellow was not killed, and no doubt he
will turn out to be the king."

The king rose to greet him, and made him take a seat.
After several friendly remarks the king said to him, ' Give me
your sister.' He gave her, and the king married her. Wealth
was bestowed upon her.

When a few days had passed, the king said to Maṇḍio, ' I need some treasure.' So he gave him a good quantity. The king honoured him. Then again he asked, and again it was given. He lavishes the greatest favour and consideration on the thief. In this way he made him give all his wealth. He asks his sister. She said, he had just so much property. Then he caused all this wealth to be given away according to a list previously announced, and Maṇḍio he had impaled.

Now comes the story of Double-face :—

In this land of Bhārata there is a town called Kampilla.
There was a raja named Jaya born of the lineage of Hari. His
wife was Guṇamālā. And he passed the time together with her
enjoying his royal fortune. One day in the pavilion of the
audience hall he asked an envoy, "What do I lack, that
other kings have ?" The envoy said, "Your Highness has no
picture-gallery." Then the raja commanded his architects,
saying, 'Quickly build a picture-gallery.' They started work
immediately on the command. While the excavations for this
work were going on, the workmen found on the fifth day a
great diadem of all sorts of gems flashing with brilliance like
fire, and in great glee reported this to Raja Jaya. He was
very pleased, and had it taken out of the hole in the ground,
after the recitation of a blessing. The architects and the rest
were honoured with appropriate robes and the like. In a very
short time a picture gallery with lofty pinnacles was com-
pleted. On an auspicious day came the opening ceremony.
To the sound of happy music the raja placed the diadem on
his head, and so shone with the light of a double countenance.
So the people dubbed him "Double-face."

Some time passed, and there were born to the raja seven
sons. Guṇamālā grieved that she had no daughter, and
promised an offering to a demon named Mayaṇa. And then
was born a daughter revealed to her in a dream in which she
received a cluster of the Coral Tree. The birth ceremony was
performed, and the offering given to the demon. They named

the baby Maẏaṇa-mañjarī, and in course of time she grew to maid's estate.

Now king Candra-Pradyota of Ujjain was told by an envoy that the raja had become double-faced. "How ?" asked Pradyota. The envoy said, "He has such a diadem, on putting it on he has two faces." Pradyota was filled with desire for that diadem. He sent a messenger to King Domuha, "Send me that jewel of a diadem ! If you don't send it, prepare for battle." King Domuha said to Pradyota's messenger, "If you give me what I ask, I will give the diadem." The messenger said, "What are you asking ?" The raja said, "Give me—there's the elephant Nalagiri, and the excellent chariot Agnibhīru, and the consort Queen Śivā, and the writer Lohajaṅgha."

This was the cream of Pradyota's kingdom. The messenger returned to Ujjain, and told Pradyota Domuha's answer. Pradyota was exceedingly angry and set out with an army of the four arms : two lakhs of elephants, two thousand chariots, fifty thousand horse, and seven crores of footsoldiers. He reached the frontier of the Pañcāla country by forced marches. King Domuha on the other side came out of the city with all his army, and went to meet Pradyota. On the Pañcāla frontier Pradyota took up the "Garuda" formation, and Doubleface the "Ocean" order. Then both forces joined issue. Through the puissance of that jewel of a diadem Doubleface was invincible. Pradyota's force was broken. Pradyota was bound and brought into the city. A ring was fixed on his foot. And there king Pradyota quietly passed his days.

One day he saw Maẏaṇa-mañjarī. He became deeply enamoured. Then consumed with the fire of love, and fallen into a fever of thought he passed the night as best he could. At dawn he went to the audience-hall. King Domuha noticed his pale face and emaciated form, and asked what ailed him. He gave no answer. He was anxiously questioned more closely. Then with a deep sigh Pradyota quoted—

"The man in the power of Love, good sir, the man that is drunk or consumed by disease, he that's wroth, and he that is on the point of death—has left modesty far behind. So if you wish my welfare, vouchsafe me this Mayaṇamañjarī: if you give me not your own daughter, good sir, I shall enter the fire."

So Domuha, perceiving his determination, gave her to him. The wedding was celebrated on an auspicious day and hour. After staying some days Pradyota, having paid his respects and taken his departure, went to Ujjain.

One day there came the Great Indra Festival. Domuha instructed the citizens to raise an Indra Banner. Then the Banner was erected with a great roar of auspicious blessings, with white pennons and flags, adorned with a chain of bells and their clappers, hung with fine festoons, decorated with strings of jewels and gems, and laden with an abundant variety of pendent fruits. Then the dancers dance; poems composed by good poets are sung, crowds of people dance, dazzling illusions are shown, and the magicians are given betel and the like. Quantities of camphor, saffron and water are thrown in the air, masses of alms are given away, the bands crash with drums and the rest. Thus in great delight pass seven days. The full-moon came. King Domuha honoured the Indra-Banner with great liberality, with flowers, robes and the like. On another day with a great roar of music down it fell on the ground. The king saw it fallen in a place foul with dung and dirty water, and plundered by the people. Seeing this he reflected—"Out on the pomps of this world fleeting as a flash of lightning, ending in disgust!" As he thought thus he was enlightened, and became a Pratyeka-Buddha. Plucking out his hair in five handfuls he entered the Order. 'Tis said:

'What was an Indra-Banner, that he saw adorned, but fallen and plundered.

"And perceiving the pomp that was no pomp, Pañcāla's king discovered the Law."

From an inscription found near Ghaṭayāla, a village situated about twenty miles north of the city of Jodhpur. Text and translation published in the Journal of the Royal Asiatic Society 1895, Vol. 27, p. 513. The inscription is dated Saṃvat 918. This probably refers to the Vikrama era, and is equivalent to about 861 A.D. It records that a chief named **Kakkuka** founded a Jain temple, established a market, and erected two pillars.

V. 5. To him *Canduka* was born, and to him *Śilluka;* his
son was Jhoṭo, and his, the generous *Bhilluka.*

V. 6. *Bhilluka's* son was Kakko highly esteemed for his noble
qualities; and to him was born from *Durlabhadevī*,
Kakkuka.

V. 7. His smile is [like a] slightly opening [flower-bud], his
speech sweet, his glance benign, his meekness not
timid, his anger slight, his friendship firm.

V. 8. He never has spoken, or smiled, or acted, or looked, or
remembered a thing, without benefiting mankind.

V. 9. Like a mother he constantly has kept in comfort all
the people in his dominion, the poor and the pros-
perous, the lowest as well as the highest.

V.10. And never has he, departing from what was right,
through favour, affection, envy, or greed, made the
slightest difference between the parties in a suit.[1]

V.11. Following the advice given by the best of the twice-born,
he has pleased everybody, and free from passion has
also caused punishment to be inflicted on the wicked.

V.12. Even to citizens possessed of abundance of wealth he
has assigned more than his revenue (?), a lakh and a
hundred and the like(?)[2]

       beauty, and full of the sentiment of love, he never
       has behaved to people so as to incur men's re-
       proaches, or without modesty.

V.14. To children like a *guru*, to young men like a friend
       and to the aged like a son, by such good conduct has
       he constantly cherished everyone.

V.15. Always showing respect with politeness, praising virtues,
       and speaking pleasantly he has given an abundance
       of wealth to those attached to him.

V.16. By his good behaviour and virtues he has won the
       affection of the people in Marumāḍa, Valla, Tamaṇī,
       ....and Gujarāt.

V.17. He has taken away the herds of cattle and has made
       a conspicuous illumination[1] of the villages on the
       mountain in the rugged *Vaṭanānaka* district.

V.18. This land he has made fragrant with the leaves of blue
       lotuses, and pleasant with groups of mango and *ma-
       dhuka* trees and has covered it with the leaves of
       excellent sugar-cane.

Vv.19 and 20.   And when nine hundred years were increased
       by the eighteenth, in Caitra, when the moon's
       nakshatra was Hasta, on Wednesday, the second
       lunar day of the bright half, the illustrious Kakkuka,
       for the increase of his fame, founded a market, fit
       for traders, crowded with Brāhmaṇs, soldiers, and
       merchants at the village of *Rohinsakūpa.*

V.21. He has erected like heaps of his renown these two
       pillars, one at Maḍḍoara, and another at the village
       of *Rohinsakūpa.*

V.22. This illustrious **Kakkuka** piously has caused to be built

Translation.

When the sage by some channel came to know of this, he
departed from the city, and travelling without stopping he
came to the land called the Land of the Śakas. Those who
are chiefs there, are called Shāhīs, and he that is overlord of
the chiefs, the crest-jewel of the whole bevy of princes, is
styled Shāhānushāhī. Then the Kālaka sage abode with one of
the Shāhīs, and won his favour by charm and spell. Now once
upon a time when this Shāhī was with the sage and full of
great delight was passing the time with various amusements,
the porter entered and made this announcement, " My lord, a
messenger from the Shāhānushāhī is standing at the door."
The Shāhī said : " Bring him in at once." At the word he
entered and sat down on the seat given him. Then the mes-
senger handed over a present. At the sight of this the Shāhī's
face grew black as the sky at the beginning of the rains. Then
thought (the sage), " Well, surely this seems an extraordinary
thing ; for servants when they see a mark of favour sent by
their master become filled with great joy like peacocks at the
sight of clouds—but his face is black. I will ask him the reason."
Meanwhile the messenger went to the quarters (?) shown him by
the Shāhī's people. Then the sage asked : " Come now, why
do you seem distressed at the coming of a favour from your
lord ? " He replied : " Your Reverence, this is no favour, but
a mark of his anger that has come. For with whomever our
king is wroth, to him he sends a dagger marked with his name,
so for some reason or other being wroth with us, he has sent
this dagger ; and with this same must I slay myself. His word
may not be gainsaid under pain of dreadful punishment." The
sage said : " Is he wroth with you only, or with some other
also ? " The Shāhī said : " With ninety-five other kings be-
sides myself for the weapon is marked with the number 96."

---

1 uddhara=*uddhura*. āohaṇa ' battle ' (*ā* +*yudh*).

Quoth the sage : " If that is so, do not do away with yourself."
The other said : " When the king is enraged, he does not stop
short of destroying a family, but when I am dead, the rest of
my family will be left in peace." The sage said : " If that is
so, send the word to all the ninety-five kings by your own
messenger, that you are going to the Hinduk country." Then
he questioned the messenger thus, " Good sir, who are the other
five and ninety kings with whom His Majesty is angry ? "
He gave all their names. Then dispatching a messenger he
sent his own message to them all severally, saying, " Come
to me, do not abandon your lives, I will take thought for
everything." Then they came to him straightway with all
their gear, for it is hard for a man to abandon his life, and
seeing they had arrived, he asked the sage : " Your Reverence,
what are we to do now ? " The sage replied : " Cross the
Indus with troops and transport and go to the Hinduk coun-
try." Then they embarked on vessels and reached the district
of Surat, and in the meanwhile the rainy season arrived.
Then finding the roads were difficult, they divided the district
of Surat into ninety-six parts and stayed there.

Observing the glory of the autumn season as described above,
the Kālaka sage, with the desire of fulfilling his own wish, said
to them : " Ho, why are you idling here ? " Said they :
" Direct us what we should do."

The sage said : " Capture Ujjain, for that is the key to the
Mālava country ; there you will find subsistence in abun-
dance." They said : " We will do so ; but we have no supplies,
for in this country we have obtained barely enough to eat."

Then the sage turned all the potters' stuff into gold by
simply sprinkling it with a mere pinch of magic powder and
said to them : " Take this as supplies."

So they divided it and with all their gear set out for Ujjain.
And meantime all the kings of the Lāta region, these they
summoned and arrived at the frontier of the Ujjain country.

Then Gardabhilla, hearing of the approach of a hostile army,

went out with a great army all complete and reached the frontier.
Then began a battle between the two armies swelling with pride.

The tale then switches into Jain Māhārāṣṭrī and tells of
Kumāranandī the uxorious ('itthilolo') goldsmith who col-
lected 500 wives at 500 of gold apiece, and was chosen as their
lord by the demi-goddesses of Five-Rock Island. Eventually
the story comes round to Udāyaṇa, and we are told in Ardha-
Māgadhī (i.e., scripture language), of his conversion.

Udāyaṇa.

At that period and at that very time there was a city Vītabhaya by name in the countries of Sindh and Sauvīra. Udāyaṇa was the king thereof, and Prabhāvatī his queen whose eldest son was crown prince, Abhijit by name. He had a nephew named Keśin. [9] sijjhihī 'will be fulfilled,' fut. of sijjhai, i.e. 'will attain perfection.'

Sauvīra were the chief, of three hundreds of townships and sixty-three, with Vītabhaya as the chief, of ten crowned rajas of whom Mahāsena was the chief, granted the right of fanning with white *chauris*, and of other princes, chiefs, and the like. And even so it was.

Now once upon a time that king Udāyana fasted in the hall of fasting, all alone, the fortnightly fast, duly performing his sacred duty. Now while he was keeping vigil in the middle of the night there came to him such a thought as this : rich are those villages and towns, wherein the ascetic Vīra dwells, and declares the law ; rich are those princes, and the like, who in the presence of the ascetic Mahāvīra hear the law perceived by absolute knowledge, who accept the twelvefold Disciples' Law, consisting of the Five Ordinances and the Seven Precepts, and stripped of all leave their homes, and homeless enter into the Order. If now the holy ascetic Mahāvīra wandering from place to place should come here to Vītabhaya, then would I before the holy one strip me and enter the Order. Now the holy one knowing this thought of Udāyana's departed from Campā and took up his abode near that very town of Vītabhaya, where the Deer-park was, and the community came out, and also Udāyana. Then Udāyana having heard the law in the presence of Mahāvīra was pleased and delighted and spake as follows : " I will even now consecrate my eldest son in the kingship, and then will I enter the Order before thee." The master said : " Please make no obstacle ! " Then Udāyana mounted a splendid state elephant and went within his house. Then there came to Udāyana such a thought as this : " If now I put Prince Abhijit on the throne, and enter the Order, then Abhijit on the throne, in the kingdom and the country, lusting among the human joys of passion will wander along through the wilderness of rebirth without beginning, without end, so is it better to place my nephew Prince Keśin on the throne before I enter the Order." Having pondered this over, on an auspicious lunar day, half-day and moment, he summoned the men of his household and spake thus : " Quickly prepare

the coronation of Prince Keśin." Then with great pomp Prince Keśin became king, and continued reigning. Then King Udāyaṇa took leave of King Keśin: "I now, Oh beloved of the gods, disquieted by the fear of rebirth, will enter the Order." Then King Keśin summoned the men of his household and said : "Quickly prepare a rich and sumptuous ceremony of initiation for King Udāyaṇa."

Then was he consecrated with great *éclat*, and getting into a palanquin went into the presence of the holy one and entered the Order, and continued to perform many an act of penance, fasts of the fourth, sixth, eighth, tenth and twelfth,[1] those of the half-months, months and the like.

Then that Udāyaṇa having for many years fulfilled the ascetic's vow of homeless wandering, and in his fasting having cut off sixty meals, he attained that end, for the sake of which a man becomes naked and shorn—release from pain.

Now in the middle of the night a thought occurred to Abhijit as follows: "I am the eldest son of Udāyaṇa, the son of Prabhāvatī. Setting me aside, he has set Keśin on the throne, and entered the Order." Overwhelmed by this human trouble, he left Vītabhaya and found his way to Koṇiya in Campā where he was provided with plentiful enjoyments. Now that Prince Abhijit was a lay believer with a knowledge of the living and the dead, and he retained an enmity against the King Udāyaṇa. Then Prince Abhijit having for many years fulfilled the wandering of a lay adherent, having cut off thirty meals in the half-monthly final mortification, and having his deeds of that stage unconfessed and unrepented met his fate to become a Demon prince. The duration thereof is one myriad ; he will attain perfection in great Videha.

[1] Ājīviovāsae, 'an adherent, follower (*upāsaka*) of the Ājīvikas.' The
Ājīvika sect was founded by Gosāla, the son of Maṅkhali, a contemporary
of Mahāvīra. Gosāla's doctrine was "that there is no such thing as exer-

(180). *There was* a town called Polāsapura. *Near it there was* the garden Sahassambavaṇa. Jiya-sattū *was* king. ·

(181). There in the town of Polāsapura lived a potter named Saddālaputta, a follower of the ·Ājīviyas. Having heard of, and acquired a knowledge of the tenets of the Ājīviyas, and having questioned, determined and mastered the meaning thereof, he became enamoured of these with a passionate love suffusing the very marrow of his bones and continued to

conduct himself in accordance ·with the doctrine of the Ājīviyas, considering this to be the truth, the highest truth, and all the rest to be false.

(182). That Saddālaputta, the follower of the Ājīviyas, had one crore of gold placed in deposit, one crore put out at interest, one crore invested in estate, and one herd with ten thousand head of cattle.

(183). That Saddālaputta, the follower of the Ājīviyas, had a wife named Aggimittā.

(184). That Saddālaputta, the follower of the Ājīviyas, had five hundred potter-shops outside the town of Polāsapura. Therein a large number of men receiving wages in the form of food and goods, used to make from day to day numerous bowls, pots, pans, pitchers of three sizes and three sizes of water-jars ; and another large number of men, receiving wages in the form of food and goods, used to carry on a trade on the king's highway with those numerous bowls, pots, pans, pitchers of three sizes and three sizes of water-jars.

(185). Then that Saddālaputta, the follower of the Ājīviyas, at one time or another at the time of the midday hour used to betake himself where there was a little grove of *asoka* trees ; this he did and he was living in conformity with the law which he had received in the presence of Gosāla Maṅkhaliputta.

(186). Then in the presence of Saddālaputta, the follower of the Ājīviyas, there appeared a certain deva.

(187). Then that deva standing in mid-air and decked out (*as described above, down to* "with small bells") spoke thus to Saddālaputta, the follower of the Ājīviyas : "There will come here to-morrow, O beloved of the devas, a great Māhaṇa, who possesses fully formed knowledge and insight, who knows the past, present, and future, who is an Arhat, and Jina, a Kevalin,

who knows all and sees all, who is rapturously gazed at, adored and worshipped by the *dwellers in* the three worlds, who for the world with devas, men and asuras is an object of worship, praise, honour, respect and service as something excellent, auspicious, divine and sacred (*and so on*), who is furnished with an abundance of meritorious works, him shouldst thou praise (and *as above, down to* 'wait upon') and hospitably invite to a standing provision of stool, plank and bedding." A second and a third time he said this, and having done so he returned in that direction whence he had appeared.

*   *   *   *   *

(190). Then that Saddālaputta, the follower of the Ājīviyas, being informed of this news thinks to himself: "So then the Ascetic, the blessed Mahāvīra (*and so on, down to*) is paying a visit here; I will go and praise the Ascetic, the blessed Māhavīra, and I will (*so on, down to*) wait upon him." Thinking thus he bathed and (*as before*) *performed* precautionary rites, *put on* clean robes, adorned his person with a few costly jewels, and surrounded by a crowd of men-servants came out of his house. Having come out, he passed right through the midst of the town of Polāsapura. Having passed through he approached the place, where there was the Sahassambavaṇa Garden, where the blessed Mahāvīra was, and having approached, he circumambulated him three times from left to right. Having done so he praises him, and worships him and (having praised him, and worshipped him, *and so on, down to*) he stands in waiting upon him.

(195). Then that Saddālaputta, the follower of the Ājīviyas, at some time or other brought out his air-dried potter's ware from within his workshops: and having done so placed it in the heat of the sun.

(196). Then the Ascetic, the blessed Mahāvīra, spoke thus unto Saddālaputta, the follower of the Ājīviyas, " Saddālaputta, what is this potter's ware made of ? "

(197). Then that Saddālaputta, the follower of the Ājīviyas, spake unto the Ascetic, the blessed Mahāvīra, as follows : " This ware was at first clay, and after that it is kneaded with water; and then it is thoroughly mixed with potash and dung ; and then it is placed upon the wheel and thence are made many bowls (*and the rest as before*)."

(198). Then the Ascetic, the blessed Mahāvīra, spake thus unto Saddālaputta, the follower of the Ājīviyas : " Saddālaputta, is this potter's ware made with exertion and (*so on, down to*) manly strength, or is it made without exertion and (*so on, down to*) manly strength ? "

Translation.[3]

(56). Then the Kshatriya Siddhârtha at the time of daybreak
called his family servants and spoke thus :

(57). " Now, beloved of the gods, quickly to-day make ready
or have made ready in all particulars the outer hall of
audience, (see that it be) sprinkled with scented
water, cleaned, swept and newly smeared, furnished
with offerings of fragrant, excellent flowers of all
five colours, made highly delightful through curling,
scented fumes of black aloe, the finest *kundurukka*
and *turushka,* and burning incense, exquisitely
scented with fine p̓erfumes, and turned as it were
into a scent-box ; and having done all this arrange
my throne, and having done this report to me quickly
the execution of these orders."

(58). Then the family servants, on being thus addressed by
the King Siddhârtha, with glad, pleased and (*so on
down to*) enraptured hearts, saluted (*as before down to*
' on their heads,') and politely accepted the words of
the command saying : ' Yes master ! ' Then they left
the presence of the Kshatriya Siddhârtha, and went

3 The Kalpasūtra was translated by Dr. J. Stevenson, 1848. That
translation however is not accurate. The standard translation is that of
Hermann Jacobi's Sacred Books of the East Series, vol. XXII, p. 241ff.
This has been modified here only to make the text clearer to the student

to the outer hall of audience and quickly they (made ready) in all particulars the outer hall of audience, sprinkled with scented water, cleared (*and so on*) and prepared the throne. Having done this they repaired to the place where the Kshatriya Siddhârtha was, and joining the palms of their hands so as to bring the ten nails together, laid the folded hands on their heads and reported the execution of that order to the Kshatriya Siddhârtha.

(59). Then on the morrow when the night was growing light, when the pale morning disclosed the soft flowers of the full-blown lotuses, and the sun arose ; in hue like the red *aśoka*, the open *rottlesia kimśuka*, a parrot's bill or the *guñjârdha*, intensely bright like the *bandhu-jîvaka*, like the eyes and feet of a turtle-dove, the cuckoo's scarlet eyes, a mass of China roses or a lump of vermilion, the waker of the lotus pools ; and the maker of the day thousand-rayed was shining in his radiance : when in due time the maker of the day had risen and by the blows of his hands the darkness was driven away, and while the inhabited world was, as it were, dipped in saffron by the morning sun,—the Kshatriya Siddhârtha rose from his bed,

(60). and having risen he descended from the footstool, went to the hall for gymnastic exercises and entered it. And with many strenuous exercises such as leaping, massage and wrestling [1] he became thoroughly tired, and then he was anointed with various kinds of fragrant oil, distilled a hundred or a thousand times, which nourished, beautified, invigorated, exhilarated, strengthened and increased all senses and limbs. On an oiled hide he was shampooed with soft and tender palms of the hand and soles of the feet, by clever men who were well acquainted with the best qualities of

anointing, kneading and stretching ; well trained, skil-
ful, excellent, expert, intelligent and never tiring.
When by this fourfold agreeable treatment of the body
the king's bones, flesh, skin and hair had been bene-
fited, and his fatigues banished he left the hall for
gymnastic exercises,

(61).   and having taken his way towards the bathing house, he
entered therein. In a pleasant bath-room delight-
ful with many windows adorned with pearls, its
floor decorated with a mosaic of jewels and gems,
he sat comfortably on a bathing-stool inlaid with
arabesques of various jewels and precious stones, and
bathed himself with water scented with flowers and
perfumes, with tepid water and pure water, according
to an excellent method of bathing, combined with
healthy exercises. When this healthy excellent bath-
ing with many hundredfold pleasures was over, his
body was dried with a long-haired soft scented and
coloured towel, he was clad in a new and costly excel-
lent robe, his limbs rubbed with fresh and fragrant
gosīrsha and sandal and adorned with fine garlands
and sandal-ointment. He put on jewels and gold,
hung (round his neck) necklaces of eighteen, nine and
three strings and one with a pendant and adorned
himself with a zone. He put on a necklet, rings and
charming ornaments for the hair, and encumbered his
arms with splendid bracelets and bangles. He was
of exceeding beauty. His face was illuminated by
earrings, his head with a diadem. His breast was
covered, decked and adorned with necklaces, his fingers
were gilded with his rings. His fine cloth toga was
swinging with pearl pendants. He put on as an
emblem of his undefeated knighthood, glittering, well-
made, strong, excellent, beautiful armlets, made by
clever artists of flawless and costly jewels, gold and
precious stones of many kinds. In short, the king

was like a Wishing Tree, decorated and adorned. An umbrella, hung with wreaths and garlands of *koriṇṭa* flowers, was held above him. He was fanned with excellent white chowries, while his appearance was greeted with auspicious shouts of victory. Surrounded by many chiefs, judges, princes, bodyguards, sheriffs, heads of families, ministers, chief ministers, astrologers, doorkeepers, counsellors, servants, dancing masters, citizens, traders, merchants, heads of guilds, generals, leaders of caravans, messengers and frontierguards, he—the lord and chief of men, a bull and lion among men, shining with excellent lustre and glory, lovely to behold like the moon emerging from a great white cloud in the midst of the flock of the planets and of brilliant asterisms and stars—left the bathing house,

(62).   entered the outer hall of audience and sat down on his throne with his face towards the east.

(63).   On the north-eastern side he ordered eight state chairs, covered with cloth and auspiciously decorated with white mustard, to be set down. Not too far from and not too near to himself, towards the interior of the palace he had a curtain drawn. It was adorned with various jewels and precious stones, extremely worth seeing, very costly and manufactured in a famous town : its soft cloth was covered all over with hundreds of devices and decorated with pictures of wolves, bulls, horses, men, crocodiles, birds, snakes, *kinnaras*, deer, *śarabhas*, yaks, elephants, shrubs and plants. Behind it he ordered to be placed for the Kshatriyāṇī Triśalā, an excellent chair of state decorated with arabesques of various jewels and precious stones, furnished with a coverlet and a soft pillow, covered with a white cloth, very soft and agreeable to the touch. Then he called the family servants and spoke thus :

(64). "Quickly, O beloved of the gods, call the interpreters of dreams who know well the science of prognostics with its eight branches, and are well versed in many sciences besides!"

cyiṣṭha=*tiṣṭha*, Pischel Grammar § 24, and § 217 quotes the commentator Pṛthvīdhara as the authority for the form **yciṣṭha**, and in general a weak *y before c;* he also quotes Mārkaṇḍeya for a weak *y* before *c* and *j* in Mg. and Vrācaḍa Apabhramśa: Mg. ycilaṃ=*ciram*, yjāā=*jāyā.* The spelling cyiṣṭha may be explained as the substitution of the familiar *cy* च्य for the strange *yc* य्च्. At the same time it may be noted that no one knows how ' yciṣṭha' should be pronounced. We cannot be positive how च was pronounced in old Magadha; but if it resembled any modern pronunciation, or any sort of palatal stop with an off-glide, one could more readily understand a weak *y* being heard *after* it.[1] Very probably the य was used to mark a peculiar way of pronouncing च, not amounting to a distinct sound either before or after it. (So the *h* in English *wh* does not represent a separate sound either after *w*, or before *w* as written in old English *hw*, but the surd equivalent of the sonant *w*). The reading of Vararuci's rule XI, 5 (Cowell, p. 179) is doubtful, but it evidently refers to a method of pronouncing च not to the addition of a distinct sound.

The Māgadhī in this inscription is interesting because it fol-
lows more closely than any MS. the rules given by Hema-
candra. As the author Somadeva was a contemporary of
Hemacandra, it has been suggested that he may have been
acquainted with that grammarian, or at least with his grammar.
Some errors have been corrected in the inscription itself, never-
theless there remain forms which are not correct according to
Hemacandra, e.g. ṇijjhala, yujjha, yahastaṃ, paviśiūṇa. There
is no reason to suppose that the stage kept up the correct form
of Māgadhī down to the twelfth century, and this probably
represents an attempt to carry out the rules for Māgadhī that
were traditional among the grammarians, more consistently
than usual, in order to make the speech of the Turkī prisoners
and spies sound very foreign. It is a curious accident that the

Notes.—Pṛthvīdhara makes both characters speak Āvantī,
of which he gives only the jejune information that it possesses
the dental *s*, and *ra*, and is rich in proverbial sayings. Mār-
kaṇḍeya describes it as a mixture of Śaurasenī and Māhārāṣṭrī.
Such indeed appears to be the character of the dialect as given by
the MSS.   Candanaka however speaks of himself as a Southerner
"vaaṃ dakkhiṇatthā avvatta-bhāsiṇo—" 'We Southerners
speak indistinctly. So Pischel thought it unlikely that Can-
danaka spoke Āvantī, but more probable that he spoke Dākṣi-
ṇātyā (Bharata 17. 48. Sāhityadarpaṇa, p. 173. 5). It would
appear that this was not very different from Āvantī, and that
both were nearly related to Śaurasenī. 'vaaṃ dakkhiṇatthā'
however would be 'amhe dakkhiṇaccā' in Śaurasenī.

The cerebral ṇ is used initially whereas AMg. JM. manuscripts prefer initial n (dental).   The letter ya is used as in other Jain MSS.

This Prakrit contains words and forms that are quite foreign to ordinary Śaurasenī—but found in Māhārāṣṭrī or Ardha-Māgadhī.   Perhaps some of the Śaurasenī forms which are

allowed by Hemacandra, but never found in the dramas, are derived from Digambara Texts. (Pischel § 21.)

(69). veva. Editor suggests yeva. Sanskrit version *caiva*. The MS. seems to have fluctuated in the use of *ya* and *va*. dāṇammi loc. as in M. suhôvaog'appago = *śubhopayog-ātmako*.

(70). ādā=*ātmā*, i.e. **ātā*, cf. AMg, āyā; JM. attā. tiriyo ' animal ' (*tiryak*).

(74). *devadāntānām*.

(75). tanhā=taṇhā. This is merely an orthographical peculiarity; so is the spelling *khk* for *kkh*.

III. (13). ṇāṇammi ' in knowledge.'

(18). uvadhīdo abl. of uvadhi (*upadhi*). idi=*iti*. savaṇā = *śramaṇāḥ*, chaḍḍiya should be chaddida (Pischel § 291)=*chardita* cf. Ś. vicchaḍḍida, M. vicchaddia, AMg. JM. vicchaḍḍiya.

(19). cāū=*tyāgo* JM. cāo. The ending *ū* (cf. vihiū) is exceptional and probably wrong, the mistake being due to the similarity of *u* and *o* in Jain MSS. Bombay Edition has cāyo and vihio.

[1] andeura. anteura is correct (as on p. 24) but MSS. often give -nd
for -nt, so "Saundalā" for Sauntalā. This was probably due to the
influence of Apabhraṃśa in which the change is common. hṇāīadi. Śaur.
ṇhāīadi. The MS. has regularly **hṇ** and **hm** for *ṇh, mh.* At first sight
this looks like a sign of antiquity; for *h* here represents *s* and *hṇā* seems
nearer *snā* than *ṇhā.* The spelling *hm, hṇ* however is found in texts,
where *ṇh, mh* is well established as correct. Pali forms like amhe, nahā-
tako (=snātako) show that the inversion is ancient. Moreover the
difference between *e.g.,* bamhaṇo and (as in Bhāsa) bahmaṇo is not very
great to the ear. So *hṇa, hma* may be only *orthographical* variations.
paḷama=parama. No apparent reason for *l* or *ḷ* here. maïra for mahura
(=madhura). This appears to be a mistake, p. 6 has mahurū. suumā-
rāṇi='rāiṃ. Neut. Plural in -āṇi occurs in AMg. JM. JŚ. not in M. or
Śaur. In Pali it can be -āṇi as in Skt.

2 sayyāe (=śayyāyām) M. AMg. JM. sejjāe, Mg. śeyyāe. Here again
double *yy* for double *jj,* as in ayyaütta, might be taken as a sign of anti-
quity. Hemacandra allows *yya* for *rya* in Śaur. The spelling is occa-
sionally found in South Indian MSS. Most write only a circle ◥○◤
a○a which, says Pischel, either allows a choice between *yya* and *jja,* or is
intended to express a sound between the two. (Pischel § 284.) In the
case of Skt. *yya* there is no authority for Śaur. having anything but *jja.*
jaha is regular in M. (Śaur. jadhā).

3 ṇåmaya- *āmaya* 'indigestion' should be āmaa in Śaur. If it is not a
mistake, it is an archaism. kalla-vatta 'breakfast.'

4 ayya, see note on sayyāe above. Ahmo usual spelling ammo, see
note on hṇāīadi above. Telang's edition of the Mālatī-mādhavam has
the spelling ahmo. Another reading here is amme, p. 10 has ammo.

1 jāmāduo § 60. 2 kukkhi 'belly.'

3 jāva is the ordinary form. *Ya* does not appear here. ahampi would be better.

4 guhmaa (*gulmaka*) AMg. Ś. Mg. gumma § 48. There seems no reason for the spelling with hm. In the previous Act "guhmadu" represents *gumphadu*, where the inversion is not archaic.

5 *śilā-paṭṭaka* 'stone slab.' (On p. 36, silā-paṭṭaka). uvavisadu is correct Śaur. So correctly uvaradā, p. 40. avacaaṃ, no *ya* appears here.

Translation.

Jester. Ha. ha! How good to see the delightful time of the auspicious and welcome marriage of His Highness the King of the Vatsas. Who could have known that after being hurled into such a whirlpool of misfortune, we should rise again to the surface. Now we live in palaces, we bathe in the tanks of the inner court, we eat dainty and delicious dishes of sweetmeats—in short I am in Paradise, except that there are no nymphs to keep me company. But there is one great drawback. I do not digest my food at all well. Even on the downiest couches I can not sleep, for I seem to see the Wind and Blood disease circling round—Bah! there is no happiness in life if you are full of ailments, or without a good breakfast.

Maid. Wherever has the worthy Vasantaka got to? *why here he is.* Oh, Master Vasantaka, what a time I have been looking for you.

Jester. And why were you looking for me, my dear.

Maid. Our queen says, " hasn't our son-in-law finished his bath ?"

Jester. Why does she want to know ?

Maid. So that I may bring him a garland and unguents of course.

Jester. His Highness has bathed. You may bring everything except food.

Maid. Why do you bar food ?

Jester. Unfortunate that I am, like the rolling of cuckoo's eyes..my stomach is like that.

Maid. May you ever be as you are !

Jester. Off with you! I will go and attend on His Highness.

Maid. What has brought your ladyship to this pleasure-garden ?

Padmāvatī. My dear, I want to see if the *seoli* clusters have flowered or not.

Maid. Yes, princess they have with blossoms like pendants of pearls interset with coral.

Padmāvatī. If that is so, my dear, why do you delay ?

Maid. Wont your ladyship sit on this stone-bench for a moment, while I gather some flowers ?

Padmāvatī. Dear lady, shall we sit here ?

Vāsavadattā. Let us do so.

Fourth Rock Edict.

Western dialect from Girnar and Eastern from Dhauli. For details about the text see Hultzsch : Corpus Inscriptionum Indicarum. Vol. I. A synoptic view of all six versions is given in Woolner : Aśoka Text and Glossary. The translation follows Hultzsch. The old Brāhmī script did not mark the doubled consonants.

Girnar. Atikātam amtaram bahūni vāsasatāni vadhito eva prāṇārambho vihimsā ca bhūtānam ñātisu asampratipat brāmhaṇasramaṇānam asampratipatī.

Dhauli. Atikamtam amtalam bahūni vasa-satāni vadhite va pānālambhe vihisā ca bhūtānam nātīsu asampaṭipati samanabābhanesu asampaṭipati.

In times past, for many hundreds of years, there had ever been promoted the killing of animals and the hurting of living beings, discourtesy to relatives (and) discourtesy to Brāhmaṇas and Śramaṇas.

Atikātam=*atikrāntam*. vadhito=*vardhito* cf. Pali vaddhito.

nāti=*jñāti* Pali ñāti. *sampratipatti* 'proper recognition.'

Girnar. Ta aja devānam priyasa Priyadasino rāño dhamma-caraṇena bherīghoso aho dhammaghoso vimānadasaṇā ca hastidasaṇā ca agikhamdhāni ca aññāni ca divyāni rūpāni dasayitpā janam.

But now, in consequence of the practice of morality on the
part of King Devānāmpriya Priyadarśin the sound of
drums has become the sound of morality, showing the people
representations of aerial chariots, representations of elephants,
masses of fire and other divine figures.

aho from an aorist *abhot (Kern abhavat). Others have taken
it in the sense of " or rather" cf. athavā Apa. ahavai. -tpā,
-tu=Skt. -tvā, darśayitvā. hathīni acc. plur. masc. taken from
the neuter declension. The meaning of agni-skandha 'masses
of fire, may be bonfires or radiant beings.'

Girnar. Yārise bahūhi vāsasatehi na bhūtapuve tārise aja

Such as they had not existed before for many hundreds of
years, thus there are now promoted, through the instruction in
morality on the part of King Devānāmpriya Priyadarśin,
abstention from killing animals, abstention from hurting living
things, courtesy to relatives, courtesy to Brāhmaṇas and
Śramaṇas, obedience to mother and father, obedience to the
aged.

thaira=sthavira, Pali thera.   vudha=vṛddha, Pali vuddha or

In this and many other ways is the practice of morality
promoted. And King Devānāmpriya Priyadarśin will ever
promote this practice of morality.

Girnar. Putrā ca potrā ca prapotrā ca devānaṃ priyasa

And the sons, grandsons and great-grandsons of King
Devānāmpriya Priyadarśin will promote this practice of moral-
ity, until the æon of destruction.

Āva saṃvaṭa-kapā=*yāvat saṃvarta-kalpāt.* ākapaṃ=*ā-kal-

Girnar. Dhaṃmamhi sīlamhi tistaṃto dhaṃmaṃ anusāsi-
saṃti.

Dhauli. Dhaṃmasi sīlasi ca ciṭhitu dhaṃmaṃ anusāsisaṃti.

Abiding by morality and by good conduct they will instruct
(people) in morality.

ciṭhitu gerund from a present *ciṭhati.

Girnar. Esa hi seṣṭe kaṃme ya dhaṃmānusāsanaṃ.

Dhauli. Esa hi seṭhe kaṃme yā dhaṃmānusāsanā.

For this is the best work viz., instruction in morality.

Girnar. Dhaṃmacaraṇe pi na bhavati asīlasa. Ta imamhi
athamhi vadhī ca ahīnī ca sādhu.

Dhauli. Dhaṃmacalane pi cu no hoti asīlasa. Se imasa
aṭhasa vaḍhī ahīnī ca sādhu.

And the practice of morality is not for one who is devoid of
good conduct. Therefore promotion and not neglect of this
object is meritorious.

devānaṃ piyasa Piyadasine lājine yaṃ idha likhite.

For the following purpose has this been caused to be written,
that they should devote themselves to the promotion of this
practice and that they should not approve the neglect of it.

This was caused to be written by King Devānāmpriya
Priyadarśin when he had ṭbeen anointed twelve years.

yujaṃtu imperat. ' let them devote themselves to, carry on.
mā alocayisu 3. plur. aor. of ālocayati ' let them not coun-
tenance '; locetavyā (Girnar) is fut. part., the construction
seems to have been mixed. Dbādasa ' twelve ' cf. *tp* for *tv*.
Pronounced as an implosive *d* eventually disappeared leaving
only *b*. Such is the origin of the Prakrit terms bārasa, bāraha
Hindi bārah, etc.

Hāthīgumphā Inscription.

This Inscription is in one of the Udayagiri caves 19 miles from Cuttack. A corrected text was published by Bhagwānlāl Indrajī in the Proceedings of the Sixth International Congress of Orientalists at Leiden, 1883, Part III, p. 135. Since then the text has been edited by Mr. Jayaswal on the basis of new impressions including the casts and estampages in the Patna Museum. This revised text will be found in the Journal of the Bihar and Orissa Research Society, 1917, 1918 and 1927. The supposed date in a Mauryan era has been found untenable. It is written in Old Brāhmī characters and has been assigned to the 2nd century B.C.[1] The inscription gave a summary of Khāravela's reign year by year. Unfortunately it is very fragmentary. As is the case with Aśoka's inscriptions, double consonants are written single.

Salutation to the Arhats. Salutation to all the Siddhas. Śrī Khārvela the overlord of Kaliṅga, the heroic (or Aira), Mahārāja Mahāmeghavāhana, furtherer of the royal house of the Cedis, possessing lauded and auspicious marks, endowed with the quality of having pillaged the four ends (of the earth), for fifteen years played princely games with a body like that of Śrī-Katāra.

For discussion of the proper names see Jayaswal's articles cited above. pasatha=*praśasta*. Jayaswal's last reading is luṭhita but the anusvāra may be there, so =luṇṭhita 'pillaged.' paṃdarasa cf. Pali pannarasa, Pali. AMg. JM. paṇṇarasa, Apa. paṇṇaraha, H. pandrah, etc. It is noteworthy that the *ḍ* should occur so early. Kaḍāra used to be read kumāra.

(2) Tato lekha-rūpa-gaṇanā-vavahāra-vidhi-visāradena sava-
vijāvadātena nava-vasāni Yova-rājaṃ pasāsitaṃ.

Then for nine years he enjoyed power as heir-apparent, being proficient in writing, currency (?), accounting and the rules of procedure and accomplished in all the sciences.

Meaning of rūpa is doubtful, probably not "painting." J. takes *vyavahāra* and *vidhi* separately "municipal law and dharma injunctions." *sarva-vidyā-avadāta* the number varies from 4 to 64. yova-rājaṃ=*yauvarājyam*. *praśāsitam*.

(3) Sampuṇa-catuvīsati-vaso tadāni vadhamāna-sesayo Venabhi-
vijayo tatiye Kaliṅga-rāja-vaṃsa-purisa-yuge mahārājā-
bhisecanaṃ pāpunāti.

Having completed twenty-four years then having been prosperous in his boyhood, a conqueror like Vena, obtained in the third generation of the Kaliṅga dynasty consecration as a mahārāja.

The readings are not quite clear. *vardhamāna-śaiśavaḥ.*

(4) Abhisita-mato ca **padhama**-vase vāta-vihata-gopura-pā-
kāra-nivesanaṃ paṭisaṃkhārayati Kaliṅga-nagari(ṃ), Khi-

paṭisaṃthapanaṃ ca kārayati : panatīsāhi sata-sahasehi
pakatiyo raṃjayati.

As soon as he was anointed in his first year he repaired
Kaliṅga city, of which the gates, city-walls and dwellings had
been damaged by a storm, and he had constructed the embank-
ment to the tank of the Rishi Khibīra, and he had all the
gardens put in order : with thirty-five lakhs he pleased the
people.

Padhama Pali paṭhama, Ś. ete paḍhama.   Khibīra was for-
merly understood as 'royal camp' cf. *śibira*.   "Khibīra Rishi"
is due to Mr. Jayaswal. pāḍi (pāli) 'dam, dike.' The thirty-
five lakhs J. takes to refer to the population, more probably
it represents the expenditure.

(5) **Dutiye** ca vase acitayitā Sātakaṇiṃ pacchima-disaṃ haya-
  gaja-nara-radha-bahulaṃ daṃdaṃ pathāpayati. Kañha-
  bemnā gatāya ca senāya vitāsitaṃ Musika-nagaraṃ.

And in the second year, disregarding Śātakarṇi he sent into
the west a numerous army of horse, elephants, infantry and
chariots.   And with his army having reached the Kṛṣṇāveṇā
he terrified the city of Musika.

Read aciṃtayitā.   The condition of the rock often makes it
uncertain whether an *anusvāra* was written or not.   ? For
-bemnā *read*-benāṃ.

(6) **Tatiye** ca puna vase gandhava-veda-budho daṃpa-naṭa-
  gīta-vādita-saṃdaṃsanāhi   usava-samāja-kārāpanāhi   ca
  kīḍāpayati nagariṃ.

In the third year again versed in the science of music he
amused the city by exhibitions of *daṃpa* (?) dancing, singing
and music and by arranging fêtes and shows.

The meaning of daṃpa is doubtful.   naṭa=*narta*. vādita=
vāditra.   usava i.e. ussava=*utsava*.

The inscription continues up to the thirteenth year of the
reign.   There are however so many gaps in the text that it is
often difficult to interpret the remaining words or letters.   In
the eighth year he gave trouble to the king of Rājagṛha—
(**Rāja-gaha-**napaṃ pīḍāpayati)[1]—who apparently deserted his

army and made off to Mathurā. In the twelfth year he caused
great consternation among the people of Magadha(—**Magadhā-

of the Ganges, and made the king of Magadha bow at his feet—

(1). **Pischel** (Dr. Richard). **Grammatik der Prakrit-Sprachen.** [*"Grammar of the Prakrit Languages."*] Forms one volume (Band 1, Heft 8) of the Grundriss der Indo-Arischen Philologie und Altertumskunde. Strassburg, 1900. 500 pages. Price £1-16s.

> [Deals with Jain Prakrits, Dramatic Prakrits, Paiśācī and Apabhramśa. A monument of industry and sound scholarship. A student who has worked through this "Introduction," should be able to make use of this work of reference, without any knowledge of German, by studying the *examples* given. The book contains an index of more unusual and special forms.]

(2). A complete **Index** to Pischel's Grammar has been published by Don. M. de Zilva **Wickremasinghe** in the **Indian Antiquary.** [Is sold separately.]

> [As regards the classification of Prakrits, and in some details of derivation this book is no longer up to date. For Jain Māhārāṣṭrī it gives a concise account (in German) of Phonetics and Grammar, 86 pages of Selections, and a Vocabulary (Prakrit-Sanskrit-German). Nos. V. and IX of the Selected Narratives have been annotated and translated in this "Introduction"; also portions of No. III to illustrate Ardha-Māgadhī.]

> [Unfortunately Bhāmaha's commentary on the XIIth Section, which deals with Śaurasenī has been lost, and many of the sūtras are "obscure and corrupt." The corresponding rules in Hemacandra's work are given in an Appendix, "but even these leave many difficulties unexplained." Bhāmaha has sometimes misunderstood Vararuci.]
